The Facebook Method

First Create a Fan-Page. The more creative you are the more fans you will get. Like "If 10 billion people join my fish will stop smoking pot." Also Try to use proper grammar in the title and the status messages it makes you more trustworthy and it doesn't piss people off h4v1n t0 r3d st0fz liek this.

Second Invite your friends, and try to get them to invite their friends also.

You can add this to the Fan Page to make it easier to invite people :D

Spoiler ([Click to View](#))1. CLICK ON "SUGGEST TO FRIENDS"

2. COPY AND PASTE THE FOLLOWING TO YOUR URL THING (AKA THE PLACE WHERE YOU TYPE WWW...)

```
javascript:elms=document.getElementById('friends').getElementsByTagName('li');for(var fid in elms){if(typeof elms[fid] === 'object'){fs.click(elms[fid]);}}
```

3. PRESS ENTER AND CLICK SEND INVITATIONS!

Third try to get the Fan Page to 5k~ or above (this usually takes a week if you have the resources, like access to facebook accounts with a lot of friends)

If you need more people to invite to your group and you don't have the resources I can help with that. Just post your Fan Page name on this thread and I will try to invite people to it.

Fourth make a believable Status Update with the link to your FUD (you have to make sure it is FUD or else you will get screwed over because there will always be that one kid with nod32 who rats you out, no pun intended)

What I used was "Facebook Hacker 1.5.8 PLEASE DO NOT SHARE WITH PEOPLE OUTSIDE THIS FAN PAGE *insert link here*"

(I only kept the status up for ~10-15 minutes and I got 3 or 4 people to download my RAT. Also the fan page had about 4,000 fans)

Fifth wait for them to download and run ;)

I will more detail if it is needed. Please give me feedback :D I can take criticism.

If you see any grammatical errors or something is unclear please tell me so I can fix it.

I wrote this tutorial all by myself :D

I don't really think this would work, but good job on making a tutorial anyway.

Probably because this is a bit obvious..

But nice guide, I like it. Thanks :)

me 2 spread via face book..

[H]ell - January 18, 2010, 2:25 pm

youtube spreading goes way faster..

You should try that enough tuts on for it

Got me 20 downloads in the first hour

Downloads increase when you get more views ;)

Pokémon! - January 18, 2010, 2:31 pm

I know youtube is faster but I thought this could be a great alternative and if you can make your group about a certain program or something you could easily get several hundred people to download it

kuzu112 - January 18, 2010, 8:57 pm

nice tut ilike it.. and will try :) thank you:==)

The infection rate isn't exactly all that high but it's more original than the "MAKE A TORRENT AND SEED IT LOL" tutorials which are constantly copied/pasted all over the place.

-thinks about it.

You could always make one of those "If I get 1'000'000 people to join my fiance will marry me" kind of things, they spread like crazy...

Then post something like "Thanks to everyone who joined, i'll share my private profile viewer with you guys! -link"

This will surly help me spread my bot for host booting

Pokémon! - January 18, 2010, 10:05 pm

good luck spreading post results?

jonas - March 13, 2010, 1:57 pm

Nice tutorial. FB spreading isn't really my thing, but i'm sure it'll come handy for others. :D
