To me it seems like all the other defaces, but a different layout, nice job though

do you mind elaborating on how it looks the same?

Loading a few long.. :S ..But a nice deface.. :)

It's nice but what would be even more awesome was if you made that text just a tad smaller or made it autoscroll as new lines are added, so that all the text can be seen properly :)

So far i used the "F12 button" method to view your source. not that i'd steal it but if your gonna add a js alert about finding another method, i'd at least encrypt your source if your trying to /hide it.

Just a thought. ?

Sure, the same green text as normal, the same script that types it out
it also has the same "exploits detected" type message as well as the "exploiting" now
what i am trying to say is, if some one else saw this deface, they would forget it when they saw another one

try adding your own logo, something to set it apart from the thousands out there

dont make your text green, change the color. things like that

Nice work, you should add some graphics to the deface. :)

I'm sure someone will do it for free, well you still made a nice job on defacing it. :)

I like it. Mox Venit ~ "Soon after came" in latin?

Room for one more?

Bacardi - March 28, 2012, 4:00 am

Where is the deface? The homepage is still intact..

What happened to your other skidgroup james ;-)?

Bill Nye - March 28, 2012, 12:24 pm

I would make an auto scroll for each new line that is written in the UI.

we kicked a member out and got a new member :3

we felt that team plague grew too much to be team plague, considering that we use payloads, and integer overflows unlike your sql injection loving team :3

O dear lord, please master show me your elite skills, then i show a little of mine ;-)?

.Anon - March 29, 2012, 10:47 am

Need new members, OP?

I'm looking for a group!
