Thread: [\[VB.NET\]\[Source\] Steam Username Available Checker](#)

Marketplace - March 28, 2012, 4:36 pm

With this program, you can check if username is available. It's pretty quick and easy to use. This program is intended for aSmoo (<https://hackforums.net/showthread.php?tid=2344849&pid=21171268>)

aSmoo - March 28, 2012, 4:40 pm

Thank you very very much man, really.
Gonna test it right now :D

EDIT :

Just tried it and it works awesomely!
Thanks again, gonna see the source to understand how it works.

Onin42 - March 28, 2012, 5:02 pm

Nice One. work perfectly.
Nice coding.
My code was stupid compared to that !
Good job.

I'm depressed now....
Continue the good job.

No one's codes are stupid. If it works then it's good

Fantik - March 28, 2012, 7:55 pm

Thank you i am going to try it right now bro ;)

Fake. - March 28, 2012, 9:43 pm

You do realise this doesn't check usernames? i.e. the name you use to login..

Moen - March 30, 2012, 3:49 pm

Why are you using <http://www.sly-gaming.com/>
aint it easier to use <https://store.steampowered.com/join/checkavail/?accountname=NAME>

```
Code Private Function checkavia(Name)
```

```
Dim b As Boolean
```

```
If New
```

```
System.Net.WebClient().DownloadString("https://store.steampowered.com/join/checkavail/?account  
name=" & Name).Contains("{}bAvailable":true,"") Then
```

```
b = True
```

```
End If
```

```
Return b
```

```
End Function
```

```

How is it easier if it does the same thing?

It doesn't do the same thing; I already told you but you chose to ignore me ???

Moen - March 30, 2012, 5:00 pm

You can also see it is incorrect

(my steam username in both fields)

Edit: Check the username hackforum

Username $\neq$ Login Name [email=]You are not supposed to be reading this. Please do not
continue reading and exit your browser immediately.[/email]

aSmoo - March 31, 2012, 4:22 am

Yep actually i can confirm that this program is working differently from what i want,Anyway it's a
good example.

This program checks the "screen name" on steam wich can be changed.

I was in need of something to check the actualy login username.

STORE - August 7, 2016, 4:42 pm

I want download this but Link no work! :(

stefisa - August 8, 2016, 8:31 am

Link doesn't work! Please fix it

SIM-2914476 - August 9, 2016, 1:32 pm

Guys ffs this thread is 4 years old stop reviving it.

Decim - August 10, 2016, 6:57 am

The thread is pretty old. To anyone looking for it, just create a webrequest to:
Code <http://steamcommunity.com/id/TargetUsernameand> check the response.

nigga learn to spel wtf

haxx123456789 - August 11, 2016, 9:13 pm

i never thoght that people can be interested in such easy litle programs, but well :3?

stefisa - August 12, 2016, 7:21 am

Looks good. Might be useful :)
