Thread: [Coders - News Update - Coders will be no more.](#)

Super Scumbag - March 30, 2012, 12:20 am

Guys, it was a great ride. I enjoyed leading Coders, and I think we may have brought something HQ to HF.

If you where a member of Coders, I want to say thank you for the experience. It was an amazing one.

Tomorrow Coders will be dismantled, and Coders will be no more.

Please carry on what we had and have as a group, to the HF community. The classes we had, take them to the programming sections.

Teach something to someone because it's the right thing to do, not because you think it will make a group look at you better.

Again, thanks for the ride. I really enjoyed it.

Phayzon - March 30, 2012, 12:34 am

Hmm, I'm really getting more into programming, so if this group becomes official, it could help me out a lot.

I can work really well with VB.Net

I'm getting more into PHP and C++

Foco - March 30, 2012, 12:36 am

I am a good programmer in some niche languages (Objective-C, delphi, perl) but I doubt you can scrape together \$2500

Justice - March 30, 2012, 12:37 am

Sounds like a promising group, bro. Good luck with everything.

Super Scumbag - March 30, 2012, 12:41 am

(Mar 30, 2012 12:36 AM)Uncle Dolan Wrote: [\[CITE\]](#) I am a good programmer in some niche languages (Objective-C, delphi, perl) but I doubt you can scrape together \$2500
I own eMonetize.org.

My net profit last week was 3k+

I've got the funds do start a group :)

(That is after I fly to MA and see my fiancée for a week <3)

Phayzon - March 30, 2012, 12:46 am

Yeah I skyped you and hopefully all works out. I'm really eager to see this group bloom out. :). And looking forward to helping you out with it. :)

Chunked - March 30, 2012, 12:55 am

Have you got the funds to start an official group?

Super Scumbag - March 30, 2012, 12:56 am

(That is after I fly to MA and see my fiancée for a week <3)

I have a considerably nice stream of income.

Phayzon - March 30, 2012, 1:31 am

Alright, here's a simple userbar I designed. Not that good, just simple ^^:

Super Scumbag - March 30, 2012, 2:33 am

(Mar 30, 2012 01:31 AM)Phayzon Wrote: [\[CITE\]](#) Alright, here's a simple userbar I designed. Not that good, just simple ^^:

Thanks for the userbar idea :)

I'll stick it in the OP at some point.

Social Engineer - March 30, 2012, 5:27 am

I'm not a programmer but I'm willing to learn, would be interesting to see the tutorials your group can offer.

Sugawara - March 30, 2012, 6:26 am

I Would like to have this group,!

I Would like to be more of a Programmer,!

Currently done with C#,Ruby

Now VB.NET :)

?rtificial - March 30, 2012, 8:35 am

This would be a group that I would be interested in joining. Hope there is no fees to join and if there is, make it after it has become worth joining.

ven0m - March 30, 2012, 9:11 am

It's a nice group idea mate.

If you are really making it then I might wanna join if you have any student category to learn coding.

BTW what you think about the old HF Coders userbar

I has a coding look :)

The group will be awesome imo.

~ven0m

Super Scumbag - March 30, 2012, 10:30 am

(Mar 30, 2012 07:59 AM)Han. Wrote: [\[CITE\]](#) I'm sorry if this sounds harsh but so many people come through this section asking people whether they think starting an official group is a good idea. Also, everyone who does says they have the funds and even if they do not one of them has actually gone through with it because they realised that \$2500 is an obscene amount of money to spend on a website.

As long as I can gather the initial one thousand dollars, the group is going to be launched.

Phayzon - March 30, 2012, 10:33 am

(Mar 30, 2012 08:35 AM)iPseudo Wrote: [\[CITE\]](#) This would be a group that I would be interested in joining. Hope there is no fees to join and if there is, make it after it has become worth joining.

Currently we have ideas for invite and application. The fee idea has been junked for now until we gather a lot of promising members.

We've thought that it'd be better rather than just experienced coders, but enthusiasts as well, people willing to learn greatly. You don't need to be fluent in coding to get in, just willing to learn and practice.

As for the invites and applications, invites can be given out by any member like the Illuminati and then everyone decides.

Applications well, threads will be there for everyone to apply.

Kom - March 30, 2012, 10:51 am

I wouldn't mind joining / helping out with it.

I'm not an amazing programmer but I know enough in VB, Java, C# some web development as well.

I quite like the animated userbar, but I believe it should have an image before the text. Possibly like the Root Image, or the one on the other userbar.

Phayzon - March 30, 2012, 11:05 am

(Mar 30, 2012 10:51 AM)Kom Wrote: [\[CITE\]](#) I wouldn't mind joining / helping out with it.

I was personally thinking combining the animation with my userbar. That way all the effects + the nice animation would be there.

I just have to find out how to make that exact effect.

(° ? °) - March 30, 2012, 11:28 am

I think this is a really great idea. To help pay the funds, you can also possible sell some software (crypters, rats, etc...)

Super Scumbag - March 30, 2012, 11:30 am

(Mar 30, 2012 11:28 AM)Subotai Wrote: [\[CITE\]](#) I think this is a really great idea. To help pay the funds, you can also possible sell some software (crypters, rats, etc...)

Considering that, but I can't publicly ask people to do that on the thread ^.^

Against the rules. I'm not against donations, but I won't be requesting them.

HaXoR0 - March 30, 2012, 11:46 am

Hmm, I'm really looking to join this group

I'm learning c# from about 3 years now and I can learn people a lot and can be very helpful

Super Scumbag - March 30, 2012, 11:47 am

Feel free to join our skype group for discussion, add me - anonsynn

Phayzon - March 30, 2012, 4:42 pm

Yeah we've gotten some more ideas together, we need input guys. :)

repun - March 30, 2012, 4:42 pm

I'm interested in this, I'll contact you soon.

DaL0rd - March 30, 2012, 4:44 pm

There are some great ideas being made for this group.

Suhinder - March 30, 2012, 4:44 pm

I could join. I know PHP / MySQL, CSS, HTML, and basic jQuery.

Guess Who Is Back - March 30, 2012, 4:44 pm

Don't start it. It will fail just like Reverence in the beginning, only a few people applied.

NieR - March 30, 2012, 4:45 pm

I like that you are organized with your idea's towards your group. Seems to be a rarity nowadays, if you are serious about buying the group then I wish you good luck with it.

Super Scumbag - March 30, 2012, 4:47 pm

(Mar 30, 2012 04:44 PM)Guess Who Is Back Wrote: [\[CITE\]](#) Don't start it. It will fail just like Reverence in the beginning, only a few people applied.

Lol, I'm not reverence, nor do I intend on being such.

Mr. Anderson - March 30, 2012, 4:48 pm

I can help pay for the group if you want, I'd like to be part of this.

Oh, and I hope we are not going to be doing tutorials like techsperts, those get boring fast. Instead, we could do programming competitions, or have a programming help-desk.

Phayzon - March 30, 2012, 4:50 pm

(Mar 30, 2012 04:48 PM)Mr. Anderson Wrote: [\[CITE\]](#) I can help pay for the group if you want, I'd like to be part of this.

Oh, and I hope we are not going to be doing tutorials like techsperts, those get boring fast. Instead, we could do programming competitions, or have a programming help-desk.

We're thinking of going all around. Tutorials, competitions, group releases, teachers, help desk, etc.

Super Scumbag - March 30, 2012, 4:54 pm

Yup, Mr. Anderson, I PM'd you about this.

The group will be all around.

Legacy. - March 30, 2012, 4:56 pm

I'd love to be a part of this group. I don't know how to code, but I'm more than willing to learn. I'm a wonderful learner. I've always really wanted to learn to code, so I'll definitely be dedicated.

Super Scumbag - March 30, 2012, 5:02 pm

(Mar 30, 2012 04:56 PM)Legacy. Wrote: [\[CITE\]](#) I'd love to be a part of this group. I don't know how to code, but I'm more than willing to learn. I'm a wonderful learner. I've always really wanted to learn to code, so I'll definitely be dedicated.

This is what we are looking for. People who are serious about coding, learning, ect., and not leeching.

FearMe? - March 30, 2012, 5:04 pm

I'd definitely join, I was learning C# but I got bored of it, I hope this group will help me pick it up again. :]

Super Scumbag - March 30, 2012, 5:05 pm

(Mar 30, 2012 05:04 PM)Barnabus Stinson Wrote: [\[CITE\]](#) I'd definitely join, I was learning C# but I got bored of it, I hope this group will help me pick it up again. :]

Sounds good :)

Feel free to add me to skype - anonsynn

I'll add you to the skype group we have rolling.

Phayzon - March 30, 2012, 7:21 pm

We've decided to open up pre-applications for now as we continue to develop, applications should be in this form:

Code [b]Name:[/b]

[b]Age:[/b]

[b]Languages you know:[/b]

[b]Why do you want to be a part of Coders:[/b]

[b]What is your experience in the field of coding/programming:[/b]

[b]If you do not have much experience, what is your willingness to learn/practice?[/b]

[b]Any past work/examples of your work?[/b]

[b]What can you contribute?[/b]

[b]Why do you deserve to be a part of Coders?

[b]Extra:[/b]

Super Scumbag - March 30, 2012, 9:07 pm

Thanks for the application layout, Phayzon.

We will be accepting preapplicants prior to purchase of the group.

If you would like to speak with the current supporters, partners, and managers of the future group, add me to skype - anonsynn

I will then add you to the group, and you can discuss what ever, as long as its not trolling.

Pentagon - March 30, 2012, 10:18 pm

Nice group, just talked with the OP on skype. He seems very determined and HQ.

-Pentagon

ChineseFountain - March 30, 2012, 11:07 pm

Name: Andrew Page / Bauer

Age: 15

Languages you know: I know the following languages well: HTML, CSS, JavaScript, PHP, Java, C++, C, vb.net, Perl, SQL. I know the following languages somewhat: C#, actionscript, asp, python.

Why do you want to be a part of Coders: I've been waiting for a coding group to come back forever! I was in the last coders group and it was the best!

What is your experience in the field of coding/programming: Been programming for over 7 years. Tried around with countless different languages. My favorites are C++ and Java.

If you do not have much experience, what is your willingness to learn/practice? I have a lot of past experience, but I have willingness to improve my skills.

Any past work/examples of your work? N/A

What can you contribute? I can contribute tutorials and I can help new programmers learn.

Why do you deserve to be a part of Coders? Because I can contribute in many ways.

Age: 16

Languages you know: PHP and a little C++

Why do you want to be a part of Coders: To learn more about my languages which I currently know and to obtain and learn new ones.

What is your experience in the field of coding/programming: Beginner/Good

If you do not have much experience, what is your willingness to learn/practice? Well I have some experience, but still I am willing to learn and practice more.

Any past work/examples of your work? Well know, I mostly do PHP so ..

What can you contribute?

Why do you deserve to be a part of Coders?

[b]Extra:

Disease - March 31, 2012, 6:41 am

I'm going to slightly deviate from the provided format to improve readability.

Name: Disease

Age: 23

Languages you know:I work primarily in: Ruby, Scala and PHP. I am proficient in a number of other languages such as C++, Perl and Bash. I'm also proficient in the web development family of languages (HTML, CSS, JavaScript).

Why do you want to be a part of Coders:I've been searching for a group to get into now that I am back to being here regularly (took an eight month hiatus while I traveled through South America and Southeast Asia). Unfortunately there aren't many, if any right now, groups on HF that appeal to me. I don't deal with the Marketplace; I'm not interested in joining a group solely to write tutorials when I can just as easily do so on my own prerogative; and I don't have the time these days to deal with a structured environment where I would have to commit to some sort of regular content. Basically- I'm looking for a group containing people with a common interest (programming in this case) where I can contribute, help and discuss matters when I have time and as I feel it's necessary. I already work a full-time job, I don't want that kind of commitment from HF.

What is your experience in the field of coding/programming:I started programming when I was thirteen; it was C at that point. I quickly moved to C++ when I learned about the object-orientated paradigm and wanted to try it out. I stuck with that for some time until I realized that if I wanted to get a job in the field around my hometown I was going to have to get into web development. We didn't (still don't to the best of my knowledge) have any software firms in the area. So I picked up HTML, CSS, JavaScript and PHP. I went to work part-time at a web development firm when I was sixteen. Working there pushed my skillset further; I met some of the best developers I know to this day at that company.

In late 2006/early 2007 one of the owners of that company sold his share and moved back home to California to join a startup that was less than a year old. A couple months before I graduated high school he contacted me urging me to apply. They were going through a growth spurt and hiring en masse. So I continued applying to colleges but also threw my resume out to that company and a number of others. Shortly after graduating I took a trip out to California to meet with a couple of companies. One of them being the company that my former boss was now working for in a

managerial position.

Long story short: I've been with that company now for going on five years.

If you do not have much experience, what is your willingness to learn/practice? I've taken very keenly to the advice given by the Pragmatic Programmer: learn a new language every year. Their philosophy is that by learning a new language, even if it turns out to be one you don't use on a regular basis, you open yourself up to new ways of thinking. That alone is an invaluable trait and can positively affect your ability to write any language. So my willingness to learn is very much on the willing side.

Any past work/examples of your work? As far as what I have contributed here on HF: [you can view my Pastebin to see some of that](#).

What can you contribute? I can contribute what I've been contributing for the past two years here on HF: a different outlook on programming. This isn't just a hobby for me; it's how I make a living. As such I tend to take a far different stance on things than most people here. Seeing something from a different angle is never a bad thing; even if you don't follow it or even agree with it.

Why do you deserve to be a part of Coders? I feel like this question is just the previous four questions combined into a single sentence. Either way, I deserve to be a part of Coders because I thoroughly enjoy helping those that deserve to be helped. It's my way of giving back to the community.

Extra: My mainstay has always been programming and it likely always will be. But I am thoroughly interested in database administration. Not just working with database solutions and writing SQL. But the actual theory that goes behind it. I enjoy learning about the relational model (the theory that makes the likes of MySQL and PostgreSQL possible), NoSQL alternatives (MongoDB for example), etc. I also have a fair amount of experience in systems administration.

FearMe? - March 31, 2012, 8:13 am

One thing you should definitely do is code programs with a small group and sell them.

Talking about crypters etc etc.

Combined knowledge will result in good programs and good safety, so no one will be able to crack shit.

Super Scumbag - March 31, 2012, 8:55 am

The idea I have floating around right now is a community crypter. The crypter itself will be free. Though not open source, as to reduce leeching of the groups work, but the stubs, would be.

It would allow for a new market on HF, and I think change the way crypters are thought about.

I think it would also be a good way to bring money to coders who have the skills.

Languages you know: Lua

b]Why do you want to be a part of Coders:[/b] Well, i want to show my coding skills and also get better at what i doing!

What is your experience in the field of coding/programming: Well, ive coded with a friend on there perp and im learning HTML coding right now!

If you do not have much experience, what is your willingness to learn/practice? Well i have some experience but i will put in all my effort to try and learn more so im better at it!

Any past work/examples of your work? Well, ive coded Darkrp server

What can you contribute? I can teach people how to code Lua and im also a good active member!

Why do you deserve to be a part of Coders? Because i really really want to show my skills and yet learn more about coding

[b]Extra: Hi my name is josh i hope i get accepted to coders so i can put my skills in action and also learn more about coding!

LUA is a not often learned language. I like that you know it.

Welcome to Coders.

Add me to skype - anonsynn and i will put you in our skype group.

CryptoCurrency - March 31, 2012, 11:56 am

Thank you! Im happy to be in it. And added you on skype

ra1d - March 31, 2012, 12:13 pm

Sounds like a cool group.

I just made a userbar.

You Are Free - March 31, 2012, 12:24 pm

Name: Caleb

Age: 16 in 7 days.

Languages you know:

I've programmed in C++, C, C#, VB.net, PHP, Java, and Lua. Oh, and of course HTML/CSS.

Why do you want to be a part of Coders:

Because it seems like a good idea. Sometimes I want to rave about something but I know nobody in the normal forum area would understand. And I want to be more active when it comes to programming related discussion on this forum.

What is your experience in the field of coding/programming:

About 4 years experience in the main languages. I'm not to sharp in C++/C/C# anymore because I haven't used it in a year and a half. But I would be able to pick up on it again. I've programmed recently in Java (for Android). I made an application that I made public on a different forum and people enjoyed it. But I've mainly been programming in PHP and some VB.net for a paid project of mine. I'm also going to be programming for Android with this project. Also, I'm putting Lua in there but I haven't used it in about 5 years, I used to play a game called "Roblox" and they allow using Lua as a scripting language. I did a lot of programming with it back in the day, before I learned any other language besides HTML(I used HTML alot when I was like, 9).

If you do not have much experience, what is your willingness to learn/practice?

I have enough experience but I'm a quick learner. Anything now for me would be more of just a

refresh of memory and the proper use of those languages, then whatever libraries I need to use I'd have to learn.

Any past work/examples of your work?

I was making a PHP system for a while (<http://gzoido.com/usr>). I haven't worked on it since I started my paid project. If you notice in my recent posts I've been posting on the Metro Booter page, I'm the developer for that and I've been working on converting Prodigy's source into something better. I've changed a lot of the source so far, added an API for interaction from a "client" application, and plan on making an Android application for booting eventually. I also have some other 'examples' of my work in my thread history, but I don't post much about my work here. But here's the Android project I worked on:

<http://www.minecraftforum.net/topic/719952-apkminecraft-pe-texture-packshalted/>

What can you contribute?

I can give insight and help people with problems. I may eventually post a tutorial or two but I'm horrible with the sort. xD

Why do you deserve to be a part of Coders?

I feel I certainly qualify to be a part of Coders, I want to be a part of it so I can be more active when it comes to programming on this forum.

Extra: Nope. Well, don't see my post and think "TL;DR!". xD

Fishy - March 31, 2012, 2:19 pm

Dude if this becomes official then i will join this group for sure :) I love coding!

You Are Free - March 31, 2012, 5:09 pm

(Mar 31, 2012 05:03 PM)Positive Wrote: ([CITE](#)) Hackforums has had a coding group before. It got removed a year or so ago.

We in Techsperts having a coding section.

Techsperts is donation only to get in, who wants to donate to get in a group? -_-

Super Scumbag - March 31, 2012, 5:51 pm

I don't really care if an other group exists with features like this one. I have a goal for the group, and I personally think that with my skill set, not only in coding, but in management and leadership, that I could bring something better to hackforums.

King of Hearts - March 31, 2012, 6:08 pm

Name: My name is Saad.

Age: I am 16 years old.

Languages you know: I know Java, some PHP, and am learning .NET.

Why do you want to be a part of Coders: I want to be part of the coders so that I can help other members who are new to members and learn from experienced programmers.

What is your experience in the field of coding/programming: I have some experience programming. I started in 8th grade making simple stuff with visual basic and then in my freshman year of high school I took AP Computer Science (College level course which teaches Java). I have been making

programs ever since.

If you do not have much experience, what is your willingness to learn/practice? I am really eager to learn more and help others as well.

Any past work/examples of your work? I haven't released/shown off anything here, however I did help others out as you can see in my posts.

What can you contribute? I can make some basic tutorials and help people with Java and .NET.

Why do you deserve to be a part of Coders? I think I should be part of this group because I like to help people and learn from others as well. This group is based on helping others and so it seems right for me.

Extra: I really look forward to being a part of this group.

Why do you deserve to be a part of Coders? I think i deserve to be part of this group as i have nice personality and very friendly :)

Extra: Hope i get accepted :) Thanks.

Try to rephrase your contribution reason. Makes it seem like you're out to steal source ^.^

We'll talk more at a later time after I speak with the group we have currently.

mashemaru - April 1, 2012, 2:53 am

Ooops i didn't mean to LOL :). i rephrase my application.

Braco22 - April 1, 2012, 4:55 am

Name: Traceur9

Age: 16

Languages you know: Visual Basic.NET, CSS, HTML, Pascal

Why do you want to be a part of Coders: Because I can help develop group projects, and make them reality. I'm fairly good with the above mentioned programming languages and can help aid any project to success. I'm also fairly good with graphics as well.

What is your experience in the field of coding/programming: I've programmed lots of malicious and white-hat applications. Mostly keyloggers, e-mail sending bots, offline phishers, and I've also programmed a few web-sites from scratch.

If you do not have much experience, what is your willingness to learn/practice? I always have room for learning and upgrading my knowledge.

Any past work/examples of your work? I'll release a new keylogger today/tomorrow and update this post.

What can you contribute? Source odes, group work, scripts and whatever is necessary to help the grou[.

Why do you deserve to be a part of Coders? I'm nothing beyond any other member here on HF. I think I deserve to be in the group because my dedication is on a top notch level, and can surely help the group in the long run.

[b]Extra: Nothing extra, just saying good luck to all participants.

Age: 18

Languages you know: Html / CSS

Javascript

C ; C++

Ruby

Sql Basic and Vast about DML

Php

Why do you want to be a part of Coders: First of all website Designing is my Forte and i want to get into it, Rather than hacking and all Stuffs. According to me Coders is the Only HF Group which concentrates on CODING and PROGRAMMING. I am Dedicated to Codes and Spend around maximum time on Coding itself.

What is your experience in the field of coding/programming: Well i am a Webside designer and Coding is my Life. I am almost all the time in Webmasters Department. I Have made my website ,just started into it <http://www.kunalshah.me>. I even sell website templates on Monstertemplate and Themeforest and now Joining Codecayon too. I am even offered to make the website of the YOUNGEST photographer in India. I am even opted to work as a Part time website Designer at DrishtiM which is a Private Media Company and Designs.

If you do not have much experience, what is your willingness to learn/practice? Well being website Designing my Forte' i would like to help people who are interested to learn Web Designing and i have started that. I would like to go for Java and VB. I am on the verge to start that Languages. I think Php is everything so i am even Learning Php in detail following with Python and Perl.

Any past work/examples of your work? Websites made by me
[Http://www.kunalshah.me](http://www.kunalshah.me)
[Http://www.spectrumoflight.me.cc](http://www.spectrumoflight.me.cc) and much more.

What can you contribute? I can Help the webmasters or who like to Start with Webdesigning and Php too. I Got Some So Called knowledge and i would like to share it. I would like to get on with the Basic knowledge on Hosting and Domains let me correct i mean Cheapest Hosting and Domain. If any Coder have doubts in anything Related to Coding i would help him/her without any harsh.

Why do you deserve to be a part of Coders? Well i got dedication towards what i do. I have dedication in coding and Programming. It's an internal feeling of coding, which no one gets easily. I would like to share and learn from SMART coders and Programmers. Fingers Crossed.

Extra: I Hope every coder who got dedication in coding should be selected. Thanks for reading

(Apr 1, 2012 09:37 AM)Traceur9 Wrote: [\[CITE\]](#) Thanks for accepting me, Honor Et Veritas. Just wondering, when is this group going to become official?
Within 3 weeks.

All I'm waiting on is a paycheck.

Mohatu - April 1, 2012, 11:04 am

Name:
Charlie (Scar_)

Age:
19, 20 in June.

Languages you know:
World Languages: Dutch, English, German
Programming languages: Java, C#, VB.NET, PHP5, Python

Why do you want to be a part of Coders:
Because I am a Software Engineer at college and my part time job is at an SSL security company. Much of my daily life revolves around programming, and this seems to be the best group to join.

What is your experience in the field of coding/programming:
Around 5 years. I started diving into coding my freshman year of high school, and haven't stopped since.

If you do not have much experience, what is your willingness to learn/practice?
N/A

Any past work/examples of your work?

[MCCombine](#)
[HMA Scraper](#)
[MCBans Checker](#)
[MCVerify](#)
[LodoCrack <- The big one](#)
[MC Premium Checker](#)
[Android Premium Checker](#)

I have also made a ton of other applications and PHP scripts, just haven't made a thread about them.

What can you contribute?

General programming knowledge, ranging from answering questions to taking part in a group programming project. I know how to use subversion and have my own lifetime server/subversion hosting, thanks to my college.

Why do you deserve to be a part of Coders?

I consider myself to be more knowledgeable than most other members of these forums. I have Skype with a good mic, and and more to than happy to help out wherever possible.

Extra:

When will this group be paid you think? \$2,500 is quite an amount.

ven0m - April 1, 2012, 11:10 am

Name:

Age: 19

Languages you know: learning Python at the moment

Why do you want to be a part of Coders: To learn coding

What is your experience in the field of coding/programming: none ?

If you do not have much experience, what is your willingness to learn/practice? I wanna become good with programs..I have always wanted to learn coding.I just started to learn Python as many people told me this is an excellent language to start with.

Any past work/examples of your work?N/A

What can you contribute? For now I can contribute by being active and learn from then knowledgeable members of the group.When I will have enough knowledge on the language I am currently learning I will teach the new comers and try out new language.

Why do you deserve to be a part of Coders?I have great thirst for knowledge.I am a fast learner.I never in all the rough spot.I am a very friendly guy too.

Name: Vizixify

Age: 16

Languages you know: I focus mostly on Java, so that's my primary language. I do know some C# as well as some HTML.

Why do you want to be a part of Coders: I love coding, it's fun. I've looked for a group like this for a while now. :)

What is your experience in the field of coding/programming: I make hacks for games such as Minecraft and Terraria (Java and C#).

If you do not have much experience, what is your willingness to learn/practice? I feel like my Java skills could be better. They're not perfect.

Any past work/examples of your work?

Spoiler ([Click to View](#))

I've got a Minecraft client that I'm selling. The thread is located [here](#). If you're lazy though, here's two pictures:

[img]http://screensnapr.com/e/ZEilP2.png[/img]

What can you contribute? I'm willing to hand out tutorials and help people with a low knowledge to programming.

Why do you deserve to be a part of Coders? I've been coding for a while now, and I think it's quite fun! :)

Extra: Hope I get accepted!

Obligated - April 1, 2012, 7:15 pm

Name:Jose

Age:17

Languages you know: Vb.net and C#

Why do you want to be a part of Coders: I would like to be apart of Coders so I may teach/learn from users and I believe I might be somewhat of a benefit ;)

What is your experience in the field of coding/programming: I am currently coding a botholder and attempting to also input a crypter in it ;)

If you do not have much experience, what is your willingness to learn/practice? I am willing to learn off of other people and I have no problem being in the other side aswell

Any past work/examples of your work? None yet

What can you contribute? I can dedicate myself to team projects and probably put in money for the group

Why do you deserve to be a part of Coders? I am just another coder attempting to become stronger suited in the languages that I already know and I also have no issue teaching others aswell

[b]Extra:

Tidas - April 1, 2012, 7:31 pm

I feel like there should be more to it but there's my go. I think the C_ really brings it out and should be included for every version.

EDIT: Round two.

Legacy. - April 1, 2012, 8:00 pm

Name: Lance

Age: 15

Languages you know: I'm learning C++ and C# currently.

Why do you want to be a part of Coders: I want to learn how to code.

What is your experience in the field of coding/programming: I took a Stanford class on C once, but I barely learned anything from that.

If you do not have much experience, what is your willingness to learn/practice? I have a great willingness to learn/practice. Coding is one thing that I really want to do.

Any past work/examples of your work? Here's something I made in C a really long time ago ([Click to View](#))

```
Code #include <stdio.h>
```

```
#include "strlib.h"
```

```
#include "genlib.h"
```

```
#include "simpio.h"
```

```
main()
```

```
{
```

```
    string choice;
```

```
    double num1, num2, quotient, sum, product, difference;
```

```
    printf ("SimpleCalc v1.1\n");
```

```
    printf ("Written by: Lance.\n\n\n");
```

```
    printf ("This program can calculate addition, subtraction, multiplication, and division.");
```

```
    printf ("\nWhich do you choose? ");
```

```
    choice = GetLine();
```

```
    if (StringEqual (choice , "addition"))
```

```
    {
```

```
        printf ("\n\nYou chose addition.\n\n\n");
```

```
        printf ("Enter your first number: ");
```

```

num1 = GetInteger();
printf ("Enter your second number: ");
num2 = GetInteger();
sum = num1 + num2;
printf ("\nThe sum of %g and %g is %g.", num1, num2, sum);
}
else if (StringEqual (choice , "subtraction"))
{
printf ("\n\nYou chose subtraction.\n\n");
printf ("Enter your first number: ");
num1 = GetInteger();
printf ("Enter your second number: ");
num2 = GetInteger();
difference = num1 - num2;
printf ("\nThe difference of %g and %g is %g.", num1, num2, difference);
}
else if (StringEqual (choice , "multiplication"))
{
printf ("\n\nYou chose multiplication.\n\n");
printf ("Enter your first number: ");
num1 = GetInteger();
printf ("Enter your second number: ");
num2 = GetInteger();
product = num1 * num2;
printf ("\nThe product of %g and %g is %g.", num1, num2, product);
}
else if (StringEqual (choice , "division"))
{
printf ("\n\nYou chose division.\n\n");
printf ("Enter your first number: ");
num1 = GetInteger();
printf ("Enter your second number: ");
num2 = GetInteger();
quotient = num1 / num2;
printf ("\nThe quotient of %g and %g is %g.", num1, num2, quotient);
}
else printf ("The input you entered, %d, is not in range.\n", choice);
printf ("\n\nPress enter to continue...\n");
getchar();
}

```

What can you contribute? I can contribute a good attitude and hopefully bring a good name to the group.

Why do you deserve to be a part of Coders? I'm a really easy person to get along with and I have a great passion to learn and help.

Extra: Thanks for your time.

Languages you know: I'm learning C++ and C# currently.

Why do you want to be a part of Coders: I want to learn how to code.

What is your experience in the field of coding/programming: I took a Stanford class on C once, but I barely learned anything from that.

If you do not have much experience, what is your willingness to learn/practice? I have a great willingness to learn/practice. Coding is one thing that I really want to do.

Any past work/examples of your work? Here's something I made in C a really long time ago ([Click to View](#))

```
Code #include <stdio.h>
#include "strlib.h"
#include "genlib.h"
#include "simpio.h"

main()
{
    string choice;
    double num1, num2, quotient, sum, product, difference;

    printf ("SimpleCalc v1.1\n");
    printf ("Written by: Lance.\n\n\n");
    printf ("This program can calculate addition, subtraction, multiplication, and division.");
    printf ("\nWhich do you choose? ");
    choice = GetLine();
    if (StringEqual (choice , "addition"))
    {
        printf ("\n\nYou chose addition.\n\n");
        printf ("Enter your first number: ");
        num1 = GetInteger();
        printf ("Enter your second number: ");
        num2 = GetInteger();
        sum = num1 + num2;
        printf ("\nThe sum of %g and %g is %g.", num1, num2, sum);
    }
    else if (StringEqual (choice , "subtraction"))
    {
        printf ("\n\nYou chose subtraction.\n\n");
        printf ("Enter your first number: ");
        num1 = GetInteger();
        printf ("Enter your second number: ");
        num2 = GetInteger();
        difference = num1 - num2;
        printf ("\nThe difference of %g and %g is %g.", num1, num2, difference);
    }
    else if (StringEqual (choice , "multiplication"))
    {
        printf ("\n\nYou chose multiplication.\n\n");
        printf ("Enter your first number: ");
        num1 = GetInteger();
        printf ("Enter your second number: ");
        num2 = GetInteger();
        product = num1 * num2;
        printf ("\nThe product of %g and %g is %g.", num1, num2, product);
    }
    else if (StringEqual (choice , "division"))
    {
        printf ("\n\nYou chose division.\n\n");
        printf ("Enter your first number: ");
        num1 = GetInteger();
```

```

printf ("Enter your second number: ");
num2 = GetInteger();
quotient = num1 / num2;
printf ("\nThe quotient of %g and %g is %g.", num1, num2, quotient);
}
else printf ("The input you entered, %d, is not in range.\n", choice);
printf ("\n\nPress enter to continue...\n");
getchar();
}

```

What can you contribute? I can contribute a good attitude and hopefully bring a good name to the group.

Why do you deserve to be a part of Coders? I'm a really easy person to get along with and I have a great passion to learn and help.

Extra: Thanks for your time.

Accepted. Join <http://HFCoders.us/> and create an application thread with your user name here to gain access to the forums. Also add me to skype - anonsynn and I will place you in the coders skype group.

mashemaru - April 2, 2012, 9:25 pm

@Honor Et Veritas

Hey dude did my application got accepted? :)

Little Hippo - April 2, 2012, 10:39 pm

Name: Lemon Water

Age: 16

Languages you know: PHP, HTML, JS, C++, VB, CSS

Why do you want to be a part of Coders: Because I want to teach others and at the same time learn a lot as well.

What is your experience in the field of coding/programming: I've created a lot of websites for personal uses as well as programs.

If you do not have much experience, what is your willingness to learn/practice? Definitely

Any past work/examples of your work?: All my hosting services are shit so all the websites I own are down. I have an offline version though on my computer.

What can you contribute? Knowledge about coding and helping others out as well.

Why do you deserve to be a part of Coders? Because I want to learn a lot and contribute my knowledge as well.

[b]Extra: What else do you want to know about me?

King of Hearts - April 3, 2012, 3:25 pm

Good luck to everyone who joins and hopefully we'll get official soon.

HaXoR0 - April 4, 2012, 1:38 am

Group will be official more few days

Good luck to every1 ,Do your applications before time run out

Kiyongo - April 4, 2012, 4:21 am

It looks like a cool group so I made one userbar for it. Hope you like it :)

I talked to Honor last night and this is what I came up with.

[img]http://s15.postimage.org/gghgp3s3r/woooowwzders.gif[/img]

salmoneus - April 4, 2012, 5:09 pm

Name: Jack

Age: 15

Languages you know: Vb.net, Delphi, ASM

Why do you want to be a part of Coders: I have always wanted to part of a group focused on professional and mature coding, but there have never been any.

What is your experience in the field of coding/programming: My first language was Delphi, and then I started VB.Net around a year ago, and have recently started ASM.

If you do not have much experience, what is your willingness to learn/practice? I feel very confident in my VB.Net and Delphi.

Any past work/examples of your work? Yes, but I keep much of my work private. If you would like some of my previous works feel free to PM me.

What can you contribute? When I release my projects publicly, I usually do it opensource. I also like to teach people 1 on 1, and see them grow. Kind of like a mentor of sorts. I also would be down with writing tutorials if necessary.

Why do you deserve to be a part of Coders? While there are many programmers with more experience than me, I feel that I have a real passion for programming, and am willing and able to teach people about the world of coding.

Phayzon - April 6, 2012, 9:10 am

We'll be getting official very soon, apply soon!

kakotrixis - April 6, 2012, 12:04 pm

Name: Marios

Age: 17

Languages you know: Delphi Pascal, Visual Basic

Why do you want to be a part of Coders: Well programming is the thing that interests me most. I will be even studying it at a later stage of my life.

What is your experience in the field of coding/programming:As stated above i started out with Pascal (Delphi) which got my interest and later expanded to visual basic. Im in the process of learning C++

If you do not have much experience, what is your willingness to learn/practice?

As i said above i have some knowledge about programming languages i would gladly like to learn more and teach what i know.

Any past work/examples of your work?

Well i made basics things of each language i know. Nothing that advanced yet, but if you still like to know pm me.

What can you contribute?

Everything i will release will be open source. I would also teach anything i know to anyone who

needs it.(That includes tutorial etc)

Why do you deserve to be a part of Coders?

Because i have a passion for programming and is the thing that interests me most. That is what will lead me to teaching and learning.

[b]Extra: I have excellent general knowledge about computers and many other topics.

humangraffiti - April 6, 2012, 6:01 pm

Name:Humangraffiti

Age: 16

Languages you know: none yet

Why do you want to be a part of Coders: Because i really really want to learn how to program its just too hard for me to learn it bymyself its no fun.. so i want to join because its better to have a group to ask questions and do projects with

What is your experience in the field of coding/programming: none

If you do not have much experience, what is your willingness to learn/practice? I am willing to read and learn everyday after school, i will do what ever it is to actually learn something

Any past work/examples of your work? none

What can you contribute? i can be very active and i will help support and advertise the group

Why do you deserve to be a part of Coders? because im a very positive guy and i love learning, ive been wanting to be a programmer i just didnt have enough courage to do it before but i think with the help of this group i will be somewhat a programmer ;D

[b]Extra:

Monetizing - April 6, 2012, 9:36 pm

Name: Siddharth

Age: 13 (I'm pretty mature so no hate please.)

Languages you know: Currently only HTML & Visual Basic; I want to join so I can learn more.

Why do you want to be a part of Coders: Again, I want to learn a lot about coding/programming.

What is your experience in the field of coding/programming: To be honest, not much at all besides Visual Basic/HTML.

If you do not have much experience, what is your willingness to learn/practice? I can be extremely determined when I put my mind to it. I'd be willing to learn for hours everyday.

Any past work/examples of your work? Nope.

What can you contribute? I can contribute what I currently know + more if/when I learn more.

Why do you deserve to be a part of Coders? Just seems like a cool group, plus I want to learn more about coding/programming.

Extra: Nothing to put here that I can think of.

Incorporate - April 6, 2012, 10:54 pm

Name: Incorporate

Age: ...13

Languages you know: C#, VB.NET, PHP (Still learning all of these but I would say I'm doing the best in C#)

Why do you want to be a part of Coders: It seems like a very fun/good way to learn different languages (I plan on trying to learn C++, or Java), and overall seems fun because well coding is what I like to do.

What is your experience in the field of coding/programming: Decent, the latest thing I made was a program in C#, it's an IRC bot that will send out a command to a VPS that has Linux installed.

If you do not have much experience, what is your willingness to learn/practice? I would love to learn C++/Java since they are both cross-platform languages and they seem like something fun to know.

Any past work/examples of your work?<https://hackforums.net/showthread.php?tid=2070545>

<https://hackforums.net/showthread.php?tid=2249888>

Definitely not everything but it's something on the forums..

What can you contribute? I can help people in C#, or any .NET language really since it's the same. Even though I'm definitely not the best I would say I'm about average.

Why do you deserve to be a part of Coders? I will definitely active since I do cruise around the Coding section of the forums everyday and try to post something relevant to the thread.

Extra: I hope I get in ?

.au3 - April 6, 2012, 11:05 pm

Name: Doodie

Age: 13

Languages you know: Autoit, HTML, CSS, PHP, Mysql, Lua, Little bit of Visual basics.

Why do you want to be a part of Coders: I feel that I am fit for this group and I am really looking forwarding to posting tutorials in the sub forum when official.

What is your experience in the field of coding/programming: <http://doodie.info> <http://scammerlist.net>
< Both coded 100% by me with Admin panels.

If you do not have much experience, what is your willingness to learn/practice? I am always willing to learn more languages and master my skills.

Any past work/examples of your work? <http://flipthis.info/> <http://scammerlist.net/> And a advanced chat spammer: <https://hackforums.net/showthread.php?tid=2299677> And a DoS tool: <https://hackforums.net/showthread.php?tid=1430992>

What can you contribute? I can do many tutorials and I am dedicated and reliable I can do almost everything. if I get some cash I can donate too.

Why do you deserve to be a part of Coders? I am not some script kiddie like most others.. I code everything myself and ive been programming for about over a year now and I love it.

Extra: Looking forward to becoming a member if I get accepted! Good luck to everyone else. Any more questions? PM me please.

Spirit8624 - April 7, 2012, 1:14 am

Use the first userbar for old times sake :)

Cloud9™ - April 7, 2012, 1:45 am

Name: jhfire

Age: 18+

Languages you know: PHP, CSS, HTML, MySQL, Vb.net, C#, Java, Python, Batch, and AHK.

Why do you want to be a part of Coders: Well look at my profile, I've been here for more than 3 years. I kinda wanna be apart of a group that looks like it will kick ass and actually has a purpose here on Hack Forums. Plus, being apart of the first group that is actually focused on just programming would be big in my eyes.

What is your experience in the field of coding/programming: Ever since the beginning of my early childhood I was actually into programming. I started off small with a little HTML and began to teach myself CSS. Within a few months I was on my way to learning PHP as well as MySQL. Time moved on and I wanted to actually get involved in something else, rather than just working on websites.

In due time I began looking elsewhere and discovered a website where botting was a huge thing. That is when I actually really got involved in VB.Net and other languages a like. I would pretty much

exploit a website and make a program continually do that same task over and over.

I grew very bored of that and was actually looking into something else. That is when I discovered Hack Forums and learned so much more when I joined. That is when I really started accelerating in all different kinds of languages.

Now I own and maintain a very popular product.

If you do not have much experience, what is your willingness to learn/practice? Programming has actually always been the motivation for me. It is challenging, fun, and I have no problem learning something new.

Any past work/examples of your work?

<https://hackforums.net/showthread.php?tid=2284542>

<https://hackforums.net/showthread.php?tid=1508516>

<https://hackforums.net/showthread.php?tid=1324053>

<https://hackforums.net/showthread.php?tid=548703>

<https://hackforums.net/showthread.php?tid=1106422>

<https://hackforums.net/showthread.php?tid=911252>

<https://hackforums.net/showthread.php?tid=1381493>

<https://hackforums.net/showthread.php?tid=1332802>

<https://hackforums.net/showthread.php?tid=1316339>

<https://hackforums.net/showthread.php?tid=598758>

<https://hackforums.net/showthread.php?tid=500282>

What can you contribute?

Honestly, just ask me to do something or write something and I'll do it. Unfortunately I don't really have time to actually mentor someone or sit over teamviewer and help them, since I do have things going on in life as well as for my product. All together, I'm willing to contribute if asked to do so.

Why do you deserve to be a part of Coders? I can see that this group will actually become a very well known group if it does become established and as explained up there I'd like to be able to be apart of something for once. I feel that I also have a passion for programming and would be will to share with others or help out with things that would need to be done.

Extra: You forgot the "[/b]" at the end of the question "Why do you deserve to be a part of Coders?". I'm guessing that was done on purpose?

Languages you know:

Python, C++

Why do you want to be a part of Coders:

I feel that I would both be able to help and learn from this group. I think that this group would help a lot of beginners in the field of programming and also the more experienced of the coders would be able to share their vast knowledge with both the other members of the group in the forum etcetera and also the other members of Hackforums.

What is your experience in the field of coding/programming:

I have a little experience in the field of programming. I feel that I am just about qualified to teach others about the very basics of the language. I am not over selling myself however. I would not like the expectations to be too high. I have been coding for a few months at a fairly consistent pace. The way I've been doing it may be bizarre to some however. I make project idea's for myself then follow them through rather than learning at a break neck pace. These projects may entail something that I have been learning recently and this allows me to practice said subject.

If you do not have much experience, what is your willingness to learn/practice?

As said above in a different way, my willingness to learn is endless. I am literally thirsty for knowledge about C++ and programming practices and theories in general such as polymorphism and other concepts like that.

Any past work/examples of your work?

Here are a few of the programs that I have made in the past, please bear in mind that I have learnt a lot since I created these but these programs were valuable in my learning of a lot of things:[Simple](#)

[String Manipulation](#)

[Bank Project](#)

[Text Based RPG Adventure \(Never Completed\)](#)

Here are some of the threads that I have contributed to the forum: [C E-Book Compilation](#)

[C++ Tutorial: Using Break To Exit A Loop](#)

[C++ Tutorial: Do-While Loop](#)

[C++ Tutorial: Using 'Continue' To Force An Early Iteration](#)

What can you contribute?

Mostly what I can contribute I have mentioned above but again, I feel I could give advice of the very basics to the beginners of the language and I feel I could offer a willing attitude to learn and you would be getting a HQ and caring member if accepted.

Why do you deserve to be a part of Coders?

I think I deserve to be a part of the HF Coders because I feel I would be an asset to the group in that I could bring a HQ and willing attitude to the group. I am willing to help with anything I can and also am very willing to learn and do not mind being told what to do from my superiors. I do not have a problem with taking orders from people and feel that I am developing each and every day in the thing that I am starting to make more a part of me.

Extra:

I hope you enjoyed my application and hope you consider me to be a valid candidate for your group. It looks very promising and I feel that I would be able to have a give/take relationship that would benefit the group and also benefit my learning of different aspects of the language and programming concepts and theories in general. Also, one of your headers is missing the closing [/b] BBcode. Thanks! EDIT: Just got a neutral rep from someone I don't know. Reported for rep abuse. He seems to be doing it to a lot of members. Just didn't want it to put you off, that's all. Thanks again!

The userbar that I prefer the most would have to be:

Userbar Number 1

Voted for it in OP. Good job!

SI?th - April 7, 2012, 9:38 am

Name: Ryan or RJ1298

Age: I am only fifteen, but I believe I act more mature than my age.

Languages you know: HTML, CSS, PHP, C, Java

Why do you want to be a part of Coders: I am new to coding but I think I have a fair amount of experience in C, HTML, CSS, and PHP that I could bring some ideas and help to the 'table'.

What is your experience in the field of coding/programming: I have coded multiple websites and forums in HTML | CSS | PHP, and I have made many C programs in my Computer Science class at school.

If you do not have much experience, what is your willingness to learn/practice? I practice at least once a day and always am looking online for resources and to learn different functions in the language.

Any past work/examples of your work? I will post later, the programs are on my laptop that I use in Computer Science.

What can you contribute? My knowledge of C, HTML, CSS, and PHP. Though it may be limited I think I could assist people.

Why do you deserve to be a part of Coders? I think I have a fairly broad knowledge of Computers and coding for that matter, I feel I can learn a lot from this group and maybe people could learn from me.

Extra: I am currently taking a Computer Science course at school, I am in Grade 10 but I am taking a Grade 11 Computer course as I was learning nothing in the Grade 10 class.

SIM-1157967 - April 7, 2012, 10:50 am

(Apr 7, 2012 09:38 AM)rj1298 Wrote: [\[CITE\]](#) Languages you know: English and a bit of French. (French class was mandatory at school until ninth grade.) Sorry about the quote but I couldn't hold it. TROLOLOLOLOL :DDD English and French ??? Are you kidding :DD

My application

Name: Tsvetan Dimitrov

Age: 15 only (soon to be 16 chill out :DD)

Languages you know: The basics of C, HTML (long ago, I hardly remember some things) and VB.NET but learning hard C for now.

Why do you want to be a part of Coders: I am new to programming and I thought it would be great if I have experienced guys by my side helping me. I can help too :)

What is your experience in the field of coding/programming: Not a total newbie - I know enough to listen people talking about programming and understand them. I coded some really simple stuff in C and VB.NET .

If you do not have much experience, what is your willingness to learn/practice? : That's why I am here :) My willingness' level is 10/10

Any past work/examples of your work?: No, my simple programs don't deserve showing :D . I made a password generator in C and some simple stuff in VB.NET

What can you contribute? : Well not much but I can help all newbies who want to learn the basics of C and VB.NET

Why do you deserve to be a part of Coders? : Well I am really hard working and I have the will to learn things fast. I won't be such hard to teach. Also I am helpful and I can help out other newbies.

[b]Extra: I hope my application is worthy to be accepted and I wish you success with the group even if you do not accept me. :)

SFN - April 7, 2012, 5:32 pm

Name: SFN

Age: 16

Languages you know: C & Vb

Why do you want to be a part of Coders: As a coder myself, there is nothing better than a community of people who are willing to learn, work, and achieve a common goal together.

What is your experience in the field of coding/programming: I've freelanced for a few small companies as well as made a few programs for websites like TheBotNet and CheatingNetwork, both of which I am no longer a part of since I've found HackForums.

If you do not have much experience, what is your willingness to learn/practice? Even while having experience I am always willing to learn, it's the biggest part of being a coder in my opinion.

Any past work/examples of your work? I prefer to keep my work disclosed. However, I've made between 15 to 30 publicized programs in my lifetime in which I'll be willing to show if contacted privately.

What can you contribute? Knowledge, expecting the same of course.

Why do you deserve to be a part of Coders? Well I wouldn't say I "deserve to be" per se, rather I believe it's a good idea I'd enjoy being a part of.

Extra: If you have the money, which I believe you do, why not hire a graphics artist to do the user bar for you. I prefer, , out of the few choices but none of them, I feel, really represents what you would like your group to be, Prestigious.

Lord Bendtner - April 7, 2012, 5:42 pm

Name: Stefan

Age: 15

Languages you know: HTML, CSS, In the process of learning java, Quite a bit of javascript, small amount of VB.net

Why do you want to be a part of Coders: Because i think this is amazing. I would really love to be apart of a community where i am not frowned upon for wanting to learn. I will try my best to help others and learn as much as possible, as i am very interested in coding (particularly java).

What is your experience in the field of coding/programming: I am not too experienced, and i only fully know HTML/XHTML and CSS. I am currently learning Java and i think i have come a long way :).

If you do not have much experience, what is your willingness to learn/practice? I am hoping to making programming my career and that is why i am starting to learn the various languages and concepts right now. I am determined to become a respected and valued coder.

Any past work/examples of your work? Not as of yet, but i have made two private minecraft clients.

What can you contribute? Hard Work. I am incredibly active and i will attempt to help anyone whenever i think i may be able to. I am a HQ person and i constantly try to make myself recognized and loved throughout the forums.

Why do you deserve to be a part of Coders? Because i am really wanting help to learn java and potentially C# in an environment where i may not be laughed at or frowned upon by selfish and professional programmers.

Extra: Please accept me into this group, i am serious about coding as a career path.

DrRaiku - April 7, 2012, 7:52 pm

I added you on skype. Please accept so I can talk with you about the group.

Name: DrRaiku

Age: 16 (turning 17 in june)

Languages you know: PHP, Python, C++ and C#

Why do you want to be a part of Coders: I would love to join a group of prestigious coders whom i can have intelligent conversations with. There is nothing I would like more.

What is your experience in the field of coding/programming: I have been teaching the users of hack forums ever since i joined (2 months ago) and I would love to become recognized for it.

Any past work/examples of your work? I prefer to keep my work to myself.

I have coded several minecraft clients and a couple programs. If that is worth anything.

What can you contribute? Knowledge, advice, teachings. I am extremely patient and willing to help others.

Why do you deserve to be a part of Coders? I want to help others and have a cool tag to go with it. I think this group could become well known and I would like to become an active member in it.

Extra: You forgot the [/b] at the end of "why do you deserve to be a part of Coders"

I would like to have <https://i.imgur.com/1HeAN.png> this tag as my member tag :)

please consider me <3

I do believe you're the first to notice it :)
I noticed but didn't think anyone would care.

Captnroram - April 8, 2012, 9:16 am

Name:

Simon.

Age:

17

Languages you know:

Javascript, HTML, C++, PHP and Processing.

Why do you want to be a part of Coders:

Because I'm eager to learn more in depth about coding aswell as I want to contribute to new people in their journey through the lands of programming.

What is your experience in the field of coding/programming:

Not as much as I would like. A few basic games like Hangman and a game where you can shoot enemies as you move throughout the map and collect boxes. I have also programmed website about a game me and a friend are develeoping.

If you do not have much experience, what is your willingness to learn/practice?

Since I've already learned C++, HTML and Javascript at home, proves that I'm willing to spend several hours on my own to get the knowledge i desire. PHP and Processing I learned in school, but only on a basic level which I then developed to achieve a higher one.

Any past work/examples of your work?

I don't have any of the games left, but this is the website: www.blackslasha.com

What can you contribute?

I can contribute to those who haven't come as far as me in the languages I learned. I'll also contribute with a good mood ;).

Why do you deserve to be a part of Coders?

Because I am eager to learn, and when my skills grow, I'll be able to help others. I'll also be able to help the ones with not as much knowledge on their path to greatness.

How do we know if we are being accepted? Will you post in this thread or PM us? Thanks. Been looking to share some knowledge ?

Can't wait ?

Lonely - April 8, 2012, 2:34 pm

I would love to get into a group like this! I am proficient in Python and Intermediate in VB. I could use some help learning C tho :P Btw, I think Userbar #2 is pretty cool and simplistic :)

Super Scumbag - April 8, 2012, 5:47 pm

For applications to be accepted, or even considered, please include examples for previous work.

Han. - April 8, 2012, 5:48 pm

Updating my post now with a program that I did a while ago. It doesn't include anything too complicated as I did it a few months ago when my knowledge was more limited.

EDIT: I've updated my post with a couple of programs that I had left from when I was a newbie. One was a pastie as I never made a thread for it here on Hackforums. Also, I added my C ebook compilation which I made under a different username to the list of contributions programming wise towards the forum. Hope you liked my app!

emprjoe - April 8, 2012, 5:55 pm

Salmonesus, Incorporate, SynHax™, Han., Doodie

All of you are accepted. I will be PMing you with a skype link soon.

Demethos - April 8, 2012, 6:05 pm

Name: Dave

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 17 years of age.

Languages you know: English, and Arabic.

Languages you are fluent in:(coding, not spoken) Java, C++, HTML, VB

Why do you want to be a part of Coders: I've been looking forward for a group that consists of coding, I've been coding since the age of 11, I was interested In how people created pages, websites, games, and special templates, and I decided I wanted to be just like those people, so ever since I've been studying and learning languages from my uncle which is a soft-ware designer, and a database administrator, I've been coding for 6 years and believe that I should be apart of Coders because I have a unique knowledge of coding, decent experience, and I probably code more than anyone on hackforums, I practice 4 hours a day, and code for money, and the main reason why I should be apart of coders is because I can share my knowledge, what I have learned, advice, tips, and many tutorials which would help many other coders such as myself.

What is your experience in the field of coding/programming:I've been coding for 6 years, starting at the age of 11, and I believe I have very unique skills regarding coding.

If you do not have much experience, what is your willingness to learn/practice?: I believe I have a decent amount of experience, and willing to help those who do not have much experience.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Please private message me If you would like to see some of my work, If

I do post them here, there is a high chance others will steal my work.

What can you contribute to coders? I pretty much explained so on the "Why do you want to join coders" question,

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve to be apart of coders because I have always wanted to be In a group where I can communicate, and interact with people that specialize in my main skill which is coding, I also have the knowledge to mentor new-comers and have the loyalty to always dedicate my best tutorials which I garuntee will advance just a slight part of - your - coding.

Extra:

@**Rakeya** - April 8, 2012, 7:12 pm

Name: Peyton

Age: 14

Languages you know:Java, C#, Visual Basic, php, html

Languages you are fluent in: php, i am not fluent in programming languages, but I am very eager to learn and I try to develop the knowledge of programming as fast as I can

Why do you want to be a part of Coders: I want to learn and I feel being in a group would help me accomplish tasks much quicker

What is your experience in the field of coding/programming: I never coded a full project, but helped many people before. I learning in programming, and I want as much practice as possible

If you do not have much experience, what is your willingness to learn/practice? I am learning to code a RPG based game in java right now, I would like to learn all aspects of java though

Any past work/examples of your work? None of which are public

What can you contribute to coders? Yes, I can contribute activity and a positive attitude and a vast database of resources.

Why do you deserve to be a part of Coders?I feel I should be accepted into this prestigious group, not because of my current knowledge, but my willingness to learn. I want to learn to become a great coder, and I feel I am a better fit from anyone else to learning, no matter what the experience in the field of coding is.

Extra: I am really eager to join and learn, I am very mature and I try to read about programming languages as much as I can

What if we dont have any?? You yourself said that this group will be for learners too in the first post of the thread.

Super Scumbag - April 9, 2012, 2:05 am

(Apr 9, 2012 01:57 AM)Zziko0 Wrote: [\[CITE\]](#) What if we dont have any?? You yourself said that this group will be for learners too in the first post of the thread.

For preapplications, you must have experience.

There's no point in learners joining if thats all we have in the group.

SIM-1157967 - April 9, 2012, 2:31 am

Well you should have mentioned that in the first post.And delete that "learners" if you haven't already.Thank you.

Super Scumbag - April 9, 2012, 2:33 am

(Apr 9, 2012 02:31 AM)Zziko0 Wrote: [\[CITE\]](#) Well you should have mentioned that in the first post.And delete that "learners" if you haven't already.Thank you.

Get off my thread until you can read it, instead of picking out the little parts that you like, or are trying to use an argument against me.

Thanks.

Tau - April 9, 2012, 2:39 am

Name:William

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old)17, 18 soon.

Languages you know:Processing, and a little here and there.

Languages you are fluent in:(coding, not spoken) Processing, Basic HTML and CSS. (I don't exactly believe that HTML is considered a programming language though.)

Why do you want to be a part of Coders: I want to learn. I have taken a programming course at my school and we are only fixated on learning Processing. I would like to widen my range as I would like to be a programmer in my near future as that is what I am going to university for.

What is your experience in the field of coding/programming:

If you do not have much experience, what is your willingness to learn/practice? I don't have much experience, my willingness to learn is significant. I am on all day on the computer with lots of free time.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)Sorry, no.

What can you contribute to coders?As I learn I can help the others out with their problems. Even if I am not fluent in many languages I am sure there are many learning the same languages as me and I am willing to help them to the best of my capacity.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I believe I deserve to be in the group because not only am I mature and HQ on the forums, I am easy to get along with and really don't fight with anyone over the internet. I am also dedicated to learning and helping out others if need be. I would like to be a programmer later in life (going to university next year.) And I look forward to my programming classes as I look forward to my programming class at my high school. I am dedicated to learning many languages, and hope to eventually be a help to the group as well.

Extra: I am also an avid gamer if anyone else would like to play with me ;3

SIM-1157967 - April 9, 2012, 2:59 am

Thanks.

I read your thread and I saw that you said that you are accepting newbies too. Another 80% of your thread repliers saw what I saw because most of them are newbies like me. I am getting off the thread of course as you requested. I don't want to be part of something that is not for me, still. Good luck with the group, I hope you manage to shape the group as you desire.

Disease - April 9, 2012, 3:49 am

I tossed my vote in for the user bar (#1). It was a choice between #1 and #2 for me. But in the end I don't feel us using #2 would be appropriate. I was in the old HF Coders group before it was killed off. And not to be superstitious but I'd rather see this group have a clean start without the old userbar and group name ("Coders" instead of "HF Coders").

It's looking like it will be a toss up between #1 and #2. The problem I have with #2 though is it's entirely way too cliché for my tastes. The binary, dark color scheme and matrix-feel to it is all overplayed.

bobjon - April 9, 2012, 5:23 am

Name:

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old)I'm 15 years old, and yes I'm mature enough to take part in this group and interact with older coders.

Languages you know:English, A bit of french and Hungarian. If you meant coding; Java, VB.net, and a bit of C++.

Languages you are fluent in:(coding, not spoken)Java and VB.net

Why do you want to be a part of Coders:I feel this group could be very successful and it could boost my knowledge of programming, while I could help others learn as well.

What is your experience in the field of coding/programming:I've worked with a team from javaforums to design a game that we eventually put up for free download, but then was taken down for copyright infringement of graphics from another game.

If you do not have much experience, what is your willingness to learn/practice?I wouldn't say I'm too experienced, but I'm extremely willing to learn, especially with other people.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)No sorry, I just finished learning java and I never did anything with VB.net except design a simple keylogger that I later deleted.

What can you contribute to coders?I can contribute a good atmosphere, a willing to learn, and nice java tutorials/mentoring to more beginner users.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)I think I deserve to take part in this group, because coding is a big part of my life, and so is HF, so why wouldn't I want to apply. I was always interested in coding, and I would LOVE to be in part of a small community that codes with each other. I have very high hopes for this group, and would love to help it out and learn with it, especially in the early years. I also deserve to be a part of this group, because I don't just apply for any group. This is the first official group I've applied for, because it's content actually interests me, and of what I've seen the owner is a nice guy (emonetize.org). I sincerely hope I get accepted, and can show this group my potential, I'm also planning to start a tutorial series in java, so maybe I could release it early to this group, and tutor members individually.

Extra:There is always more to say, but I think I've bored you enough. I hope I get accepted into the only group I've ever applied to, also I vote for userbar number four.

Thanks for your consideration,

Bobjon.

SomeWhiteGuy - April 9, 2012, 5:42 am

Name: Matt

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 16

Languages you know: VB.NET, C#, HTML and PHP

Languages you are fluent in:(coding, not spoken) All of the above. (HTML is not excellent.)

Why do you want to be a part of Coders: Coding is the only reason I'm on this forum and is my only interest.

What is your experience in the field of coding/programming: I don't really understand the question but I've been programming overall for about 2 - 3 years.

If you do not have much experience, what is your willingness to learn/practice? Of course there are some things that I do not know how to do and I would be willing to learn them.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

I have 3 websites up:

<http://www.ps3-forums.net>

<http://www.xbl-forums.com> (new, made it yesterday.)

<http://www.coding-forums.com> (new, made it yesterday.)

Threads:

[\[Snippet\] Form\(s\) Inside a Form](#)

[\[Snippet\] Disable Close \[X\] Button](#)

[\[Release\] Source to My Packet Sniffer](#)

[\[Release\]\[v1.2b\] Snort - Packet Sniffer/Network Monitor](#)

What can you contribute to coders? I have a vast range of knowledge in forums, PHP, and VB.NET and would be glad to teach anyone about them.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I'm good at coding and I enjoy it. I love it, tbh.

Extra: N/A

Sexygoco - April 9, 2012, 8:32 am

Hey, I had a go at the userbar thing,

Name: Garrett / Sexygoco

Age: 16, Nearly 17.

Languages you know: Java, soon to be C++.

Languages you are fluent in: Almost Java.

Why do you want to be a part of Coders: Because I have been studying Java for a year now and would love to be part of a community that share the same interest.

What is your experience in the field of coding/programming: I have coded a public hacked client in minecraft and many private ones.

If you do not have much experience, what is your willingness to learn/practice? I am always wanting to learn about all computer programming languages and more about the one I am studying.

Any past work/examples of your work?Horde client:

<https://hackforums.net/showthread.php?tid=2283214>

What can you contribute to coders? I will try make a lot of tutorials and share my knowledge of languages I know to the rest of the community.

Why do you deserve to be a part of Coders? I think I deserve to be a part of this group to share the knowledge of computer languages to the rest of the community and learn from others that will benefit everyone, I am also a pretty HQ member.

Extra: I hope I will have the opportunity to join this group and be in the same environment as people that share the same passion and interest and cannot wait to see what other HQ members I can learn from and teach them a thing or two. :)

Basics. - April 9, 2012, 8:32 am

Name: Josh

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 19

Languages you know: A bit of Python, Visual Basic, I want to start with a C language (Maybe C# or C++)

Languages you are fluent in:(coding, not spoken) Visual Basic

Why do you want to be a part of Coders: I want to learn and expand my knowledge more so I don't have to look up for tutorials everytime I want to make something. I want to know how to code in something where I don't have the need to ask.

What is your experience in the field of coding/programming: I've created a few small programs, nothing special though. I'm currently working on a program for my college.

If you do not have much experience, what is your willingness to learn/practice?I don't really understand this question, but I will be more than willing to learn/practice with my fellow coders.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Too embarassed to even show you guys.

What can you contribute to coders? Well I guess I could contribute the little knowledge I know. Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)

Extra:

Wigan - April 9, 2012, 8:40 am

Genetic. - April 9, 2012, 11:16 am

Name: Sam

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 15

Languages you know: Java, C++, Python

Languages you are fluent in:(coding, not spoken) Java

Why do you want to be a part of Coders: I first joined this website to enhance my coding experience. I wanted to be fluent in at least 3 languages, and I'm still working on it. :D I've come a long way on this site, and I think it would be awesome to become a part of a group dedicated to what I came here for.

What is your experience in the field of coding/programming: I've coded a lot of Minecraft, and I've actually programmed a few iPhone and Android applications.

If you do not have much experience, what is your willingness to learn/practice? I'm willing to learn many, many more languages.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<http://www.youtube.com/user/GeNeTiCModz>. I have almost 1.7k subscribers and I have almost 60 videos teaching my subscribers different coding methods.

<https://hackforums.net/showthread.php?tid=2265204> - Video on reading obfuscated code.

<https://hackforums.net/showthread.php?tid=2247142> - Bukkit plugin I coded.

What can you contribute to coders? I can contribute a pretty big fanbase for the group by making a Youtube video about it. I can also help people with coding.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Ever since I was a little kid, I've tried everything. I tried everything from baseball, to drums, to karate. It's not that I was bad at the sports and occupations, it's just that I didn't enjoy them. When I was about 12 years old, I started to learn basic coding. Everything has just gone up since then. I love doing it. It's so fun, and I have so many experiences. I actually enjoy coding, unlike most other things.

Name: Jonte/1337B345T3R

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) I am 15 years old and quite mature for my age!

Languages you know: VB.NET

VB6

PHP

C#

C++

HTML

Languages you are fluent in:(coding, not spoken)VB.NET

VB6

HTML

Why do you want to be a part of Coders: I want to join the Coders mainly to teach other people how to code as I already have a lot of people messaging me on HF asking if I can help them out on a problem or specific area of learning. I want to spread my knowledge around the forums by releasing tutorial threads, source codes and coding services.

What is your experience in the field of coding/programming: I have quite an advanced knowledge of Visual Basic .NET and VB6. I have many programs that I have coded over the years using those two languages primarily. I also do know a bit of PHP as my second language, although I do want to

extend my knowledge with PHP as I will expand more on in the next paragraph. I have been coding for around three years now and I have no will to stop anytime soon! Coding is my passion as I am sure it is yours too. Coding just gives me a massive sense of achievement when I figure out a solution to my own problem, or finish a massive project that I have been working non-stop on like my life depended in it!

If you do not have much experience, what is your willingness to learn/practice? I wish to learn more PHP as it is a language that seems so enticing as you can do so much if you know the language! I have seen some pretty neat things coded with PHP. I am already very advanced in VB.NET as you will see below from my current projects and products.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

[Elite Stresser](#)

[Elite Auth](#)

Projects I am currently working on: YouTube bot

R.A.T

DDoSSer

Chat System

Booter Source

ETC..

What can you contribute to coders? I can teach people a vast amount of skills involving all different types of coding languages, namely VB.NET as I am quite fluent with the language, and find that I enjoy teaching other people code very much! I quite often find that I learn a lot myself from teaching people and that is why I enjoy it so much. I will also make some coding tutorial threads for beginners, intermediates and of course people that are already advanced with the language and that want to take it to the next level!

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I definitely feel I deserve to be a part of Coders because of my vast coding knowledge. I have the ability to always lend a helping hand to all my fellow HF buddies! I have done a lot of coding work for people over the years, mostly work for the kind people of Hack Forums. I have coded many projects in my main language, Visual Basic .NET, many finished like Elite Stresser also many unfinished projects that I am working on now, most of which are listed in the above! The Coders looks like a great up and coming group and I would quite honestly be proud to be a part of such a fine looking group. I believe that the coding section of Hack Forums would really appreciate my commitment to the hobby I love so dearly, I will make sure to submit my best work in all that I do, may that be whilst writing up tutorials, doing some coding work for someone or just messing around with my codes.

Extra:

I started coding a few years ago when I started taking interest in programs and wondering how they

worked. It was when I saw Cybergate R.A.T that I just thought to myself "Hey, I really want to make something like that!" from that point onward, I decided to teach myself through video and of course text tutorials all over the internet and eventually I gathered up a vast knowledge of the Visual Basic .NET coding language that I had learned to love oh-so much! Thank you so much for reading through my application for the HF coders, I do hope that I get considered for this group, it looks very promising and enticing! Good luck to all the other applicants as well, you have my best well wishes!

Yup. Feel free to reapply, but if its a shit application again, You're barred from entrance.

Demethos - April 10, 2012, 7:17 am

Will this group have an help desk section for people who are willing to learn how to code?

Mr. Anderson - April 10, 2012, 7:26 am

Remember I can still help out with paying off the group!

Super Scumbag - April 10, 2012, 7:26 am

(Apr 10, 2012 07:17 AM)Demethos Wrote: [\[CITE\]](#) Will this group have an help desk section for people who are willing to learn how to code?

Yes.

Although the first batch of people in the group will be coders who are able to teach.

I don't want the group to be a skid fest, and anyone posting LQ will get booted.

(How do I do this?! threads with no effort on behalf of the post of such, will result in a boot from the

group, for example.)

(Apr 10, 2012 07:26 AM)Mr. Anderson Wrote: [\[CITE\]](#) Remember I can still help out with paying off the group!
:) I know.

I'm going to be paying the initial 1k on the monday next week.

What can you contribute to coders? Tutorials, Code Examples, and very active.

Why do you deserve to be a part of Coders? (This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve to be a part of the coders because coding is pretty much all I do.

Extra: I can help with donations, if you need.

I also do all of my own Graphic Design, But sadly I was denied into Graphic Masters D:

I built my own gaming desktop, fun but I don't really enjoy messing with hardware than I enjoy messing with software.

I understand I haven't made such an impact on the coding community of HF (mostly because I do that on Minecraft Forums, StackOverflow or PHPFreaks) but I feel that getting introduced to many people who are into coding + design as much as myself on HF would greatly increase my activity.

I was a very active member of the minecrafters but I was removed when the group got suspended.

King of Hearts - April 10, 2012, 2:16 pm

Hey,
Userbar #8 is the best in my opinion.

Tarn - April 10, 2012, 2:20 pm

My application was ignored but the one below was denied, do I assume mine was also denied?

DiViiNe - April 10, 2012, 2:27 pm

Honor I sent you a pm, asking about stuff, and I still havent gotten a reply. Would you like me to resubmit my application on the forum? (I submitted it with my questions)

Thanks

Super Scumbag - April 10, 2012, 2:27 pm

(Apr 10, 2012 02:20 PM)Ra:nbow Dash Wrote: [\[CITE\]](#) My application was ignored but the one below was denied, do I assume mine was also denied?

You're not denied unless I say you're denied.

Change - April 10, 2012, 2:44 pm

Can I get in free if I make an userbar?

Creator™ - April 10, 2012, 2:55 pm

Name: Brian

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 23

Languages you know: English.

Languages you are fluent in:(coding, not spoken) HTML, PHP, CSS, Javascript, Java, Beginner C#, Beginner C++.

Why do you want to be a part of Coders: Well, because I think I have a very vast knowledge of coding and what it's about. Although I am still learning, I still know a lot that I can teach to other members and either write tutorials on it, or help them with general questions they might have. I am also a very respective person, who can showoff the group for the best, and build it up for the better.

What is your experience in the field of coding/programming: I have been practicing for a few years, and I do know a lot, but then again, there's some things I don't know.

If you do not have much experience, what is your willingness to learn/practice? I am fully devoted each day to learning more things, and I have a wide variety of things that I am interested in. So yes, I still do have a lot I want to learn and practice.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I do have past work I have done, but I currently do not have hold of them.

What can you contribute to coders? I can contribute everyday by posting tutorials, helping others with questions or anything that they may need. I can also stay active in the sub forum and help out other members of the group with what they need help with.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Well, because as I said before, I have a vast knowledge of Coding. There are some things I know, and some things I still want to learn. What I want to do in Coders is help out with things. Those things may consist of writing tutorials, helping others, staying active in the sub forum, staying active on the forums with coding, and just simply being mature. There are a lot of things I know that I can write a tutorial or such on, but I don't want to just teach in Coding, I want to learn. I have a very open mind and I am open to a lot of things, which is why I think coders is the best group, for me, so far.

Extra: Thanks for taking the time to read my application.

1337B345T3R - April 10, 2012, 3:02 pm

Thank you very much for accepting me into the coders! Also I think you should go with user bar number eightas it looks the most appealing!

AcidSuit - April 10, 2012, 7:52 pm

Name: Theegle

Age:(If you're below 16, you will be expected to act in a manner thats up to par with at least a 16 year old) I'm 14 but I am very mature for my age and I am very serious.

Languages you know: I know c++, php, html and a little sql

Languages you are fluent in:(coding, not spoken) Php and Html

Why do you want to be a part of Coders: Because I am a very hardworking person who loves to code, I would love to be able to work with other coders to further expand my knowledge and to work with some people on projects and such.

What is your experience in the field of coding/programming: I have coded a website which sadly went down. I am thinking of starting a website coding business. If you do not have much experience, what is your willingness to learn/practice? Even though I know alot there is always room for improvement so I would put in %100 to learn more.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Sorry I can make A site from scratch if you want?

What can you contribute to coders?

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Because I can contribute alot to this group whilst helping others.

Extra: Not being cocky but you made a couple spelling mistakes. (I may have aswell)

Denied.

As far as coding goes, you have made no contributions to the coding community here on HF.

(Apr 10, 2012 09:04 AM)Rainbow Dash Wrote: [\[CITE\]](#) Name: Rainbow Dash

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 16

Languages you know: Java

Languages you are fluent in:(coding, not spoken) Java but I would really like to learn more

Why do you want to be a part of Coders:I desperatly want to learn more about coding, I work hard to learn but I believe a group like this would provide me the opportunity to greater my knowledge.

What is your experience in the field of coding/programming: I took a Java class at school.

If you do not have much experience, what is your willingness to learn/practice? I have a HUGE willingness to learn and that I pretty much the main reason I am applying although I will be sure to contribute to the group too!

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Unfortunately I got a new computer recently so I am unable to produce any.

What can you contribute to coders? Java :)

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I believe I should be accepted to coders for my willingness to dedicate time and energy to learning and helping out newer coders. I will be sure to help as much as possible and will always be active.

Extra: I never used my knowledge of Java towards Minecraft, I do not know if that means anything to you...

Approved. A damn good coder vouched for you, make sure you live up to it.

Big Baller Shot Caller - April 10, 2012, 8:22 pm

Userbar #2 is pretty unique out of all.

Name: Pistachio

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 16 1/2

Languages you know: Basically all web related languages. (HTML, CSS, PHP, JS) A bit of C++ aswell.

Languages you are fluent in:(coding, not spoken) HTML, CSS, PHP,

Why do you want to be a part of Coders: Well I am going to be a web developer one day. I try to do everything I can to expand.

What is your experience in the field of coding/programming: Coding for about a year, so not too much but I get the basic understandings.

If you do not have much experience, what is your willingness to learn/practice? Heck, I am pretty sure I can learn a thing or to from the people in this group. (I have a special PHP project I am working on).

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

A program I made in Visual Basic:

Spoiler ([Click to View](#))

A website template I made and almost done coding:

What can you contribute to coders? My knowledge of course, time, give me tasks and I will do them. I help out in the coding section in HF too, pretty long ago though I just came back from a vacation and my memory is pretty fuzzy.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Well I believe everyone with a learning chance should be able to be accepted. I really have nothing else to say. I was part of the TechSperts but then they kicked most of the members, and just for extra space which kinda made me mad since I was a dedicated member, even made two high quality tutorials. ? Hope you enjoy my work, I lost a few Minecraft website templates I created but what you see up

there is probably what I have left of my work(s). Thanks.

Super Scumbag - April 10, 2012, 8:27 pm

Accepted.

Add me to skype, anonsynn and I will add you to the skype group.

DiViiNe - April 10, 2012, 8:49 pm

I already sent you a PM about this, but I figured I would post it here too. I'm really shooting to get into the "learners" part of the group, as you might be able to tell from my application.

Name: Brent

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) I'm 16

Languages you know: I'm starting to learn C#, and Java, if you are talking about Languages like English, I know English and a bit of French

Languages you are fluent in:(coding, not spoken) As stated before, I'm just starting to learn programming.

Why do you want to be a part of Coders: I want to be part of Coders because I want to be able to write my own programs, and I want to be able to learn a variety of languages to further open my career paths.

What is your experience in the field of coding/programming: I have very little coding experience, I have only touched on learning C# and Java.

If you do not have much experience, what is your willingness to learn/practice? I have a lot of willingness to learn and practice, I want to be able to learn a variety of languages. Once I have a decent knowledge of how a language works I'll try writing programs with my gathered knowledge.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) The only thing I have done is part of a calculator, however, only addition works, and what I currently have is very basic.

What can you contribute to coders? I can contribute help to the members whenever my knowledge allows me to, I can help test programs for any flaws, I will bring a positive attitude and help encourage other members to finish/improve projects by giving them suggestions.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) The reason why I deserve to be a part of Coders is because I bring a friendly, helpful attitude to my work. I'm not the most advance at the moment when it comes to coding, but when I learn, I will be able to become a contributing member and will be able to help my fellow coders.

Extra: I know since having little experience isn't really a good way to get into this group, I'm just hoping to be accepted so I can learn coding, and be able to reach the status of "experienced coder" so that I can contribute as much as I can to the community.

Thanks again for the opportunity.

Zoidberg - April 10, 2012, 8:52 pm

could you review my application please?

I'm really eager to get into this group.

<https://hackforums.net/showthread.php?tid=2351144&pid=21589140#pid21589140>

Edit: 400th post

Lol, yea, I basically only post in the VB.NET section.

Mutes - April 11, 2012, 6:07 am

Name:Mutes (Jordan)

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old)21

Languages you know:HTML, JavaScript. Currently doing Java.

Languages you are fluent in:(coding, not spoken)HTML, Javascript.

Why do you want to be a part of Coders:I've wanted to learn more about programming, but show what knowledge I do have, so this seems like it would be the perfect group.

What is your experience in the field of coding/programming:Taken three college courses. One in JavaScript, one in HTML, and Java is in progress.

If you do not have much experience, what is your willingness to learn/practice?I'd really be willing to learn. Programming/coding is one of the areas I'd want to get into, so my willingness to learn more would be high.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)None. I haven't really felt the need to contribute, but being accepted would give me the motivation to do so!

What can you contribute to coders?I can provide Hackforums users with help in whatever programming/coding areas they need help with that is equal to my abilities. I'm not going to lie and say I can help with every area as I don't have that knowledge yet. But as I learn more, I can provide

more.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)I don't deserve it. It's more of a why should I be part of the group. Anyways, I should be in the group because I have a strong willingness to learn. I'll also do my best to provide whatever knowledge I have, and keep the group's HQ and prestigious reputation.

Extra:Seems like a great overall group, one that I'd love to be part of. As I said, I don't really know everything about coding, but my willingness to learn more would be shown.

Demethos - April 11, 2012, 7:23 am

If you're going to input new userbars, how will people vote for that userbar when It is not on the poll?

If he hasn't replied to you, the group didn't yet decide on you being accepted or not. I'm in the same position as you. ?

Raspberry Pi - April 11, 2012, 10:25 am

Name: Devon

Age: 16(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old)

Languages you know: English and some Spanish

Languages you are fluent in: Batch and decent HTML5

Why do you want to be a part of Coders: I wish to expand my knowledge of html and the other web-languages.

What is your experience in the field of coding/programming: I learned Batch for malicious purposes, but It's quite fun using it to make simple tasks easier as well. HTML, just the obvious web-design.

If you do not have much experience, what is your willingness to learn/practice?: I am not COMPLETELY FLUENT in html yet. I would love to learn the whole god-damn language. In and out.

Any past work/examples of your work?: I currently have nothing other than some malicious batch worms, that kind of thing. My HTML projects haven't turned out very kickass yet and I feel I will be criticized upon posting them.

What can you contribute to coders?: Any help within my abilities really...making some batch worms and such. When I become more fluent in HTML I would like to help others learn the language too. I have multiple books on it.

Why do you deserve to be a part of Coders?: I feel I deserve to join Coders because I have a vast intrigue with programming/coding. It has always been a wonder to me how exactly these languages do what they do. Also, I would love to have the opportunity to share what I know and learn with my fellow group members. I believe I will be a fine asset, both because my ability to learn; and my ability to teach others in the process.

Jaxon - April 12, 2012, 7:31 am

Decided to make another one. Here she is. I can always change the animation.

Group will be official monday.

?us?ness - April 12, 2012, 1:05 pm

glad to see a group that will be about serious programmers

Kenny252 - April 12, 2012, 7:07 pm

Name:

Kenny252 (Matt)

Age:

13 (Very mature and intelligent for my age)

Languages you know:

VB (VBA, 6 and .NET), HTML, Some Delphi and a little C++

Languages you are fluent in:(coding, not spoken)

VB(VBA, 6 and .NET) and HTML

Why do you want to be a part of Coders:

I want to be in a community with people who like to code. Somewhere where I could talk about ways to do certain things and collaborate idea's with as well as teach and help others.

What is your experience in the field of coding/programming:

A bit of a general question so I'll give it my best shot. I have been coding since I was 11 years old. I looked up what is a good starting coding language and found a lot of the result's to be Visual Basic. I decided I'll try it and have been a fan of it since. When I was about 12 and a half I decided that I should move on to another coding language and found that Delphi had a similar syntax and started some projects in that. At about the same time I wanted to learn some C++ so I picked it up and later decided to wait until I was in a good position with my other languages. Most of my experience pertains to desktop development however I have done some HTML and PHP.

If you do not have much experience, what is your willingness to learn/practice?:

I'm always willing to learn more and become better at everything I do.

Any past work/examples of your work?

I did have quite a bit of applications coded and such but most of it was on my old computer. They were things such as a self contained vOS (Virtual operating system) that ran inside of windows. I have some things on the forum such as a few project's etc... Currently I'm working on a portable VB IDE and a new version of my vOS.

What can you contribute?:

My time, knowledge and helpfulness. I am always willing to help other people.

Why do you deserve to be a part of Coders?

I deserve to be part of Coders because of my current knowledge of coding as well as the distance I am willing to go to better my self and others in coding. I also will be very active in this group and want to make it better for everyone.

Extra:

Not much else to add I suppose, other than that this seems like a really nice group to be in.

Jumla - April 12, 2012, 8:20 pm

Name: Jumla

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 14, but I'm pretty mature.

Languages you know: PHP, Javascript, JQuery, CSS, HTML (if you consider the last 3 languages), Java (learning), .net

Languages you are fluent in:(coding, not spoken) Those listed above except Java.

Why do you want to be a part of Coders:

I would love to become part of this group due to the HQ expectations the owners have, and the idea of the group itself sounds suburb. I'm honestly surprised it doesn't yet exist. I've never been part of a unofficial group, and, while it may not be for long, I'm quite curious how they work. I would love to share my work with other users, as well as meet other coders to work with, or just chat.

What is your experience in the field of coding/programming: Well, I coded (skidded) my first program at the age of.. 9. It was a shitty little Basic4GL (A very old game programming language, that mixed Basic and OpenGL). I made a little quiz game. Back then, I was pretty into gaming, so I continued on the game development route, and learned flash and actionscript (at around 10-11). I'm awful at drawing, so, my games pretty much sucked. I forgot these skills around a month after I stopped doing game design, but, I still have some of the games.

My web design work began through minecraft. I was in Belize, and my server needed a new whitelist system, so, I bought a one dollar ebook on my kindle, and read a book on PHP. I then wrote my very first website, on a 200 dollar netbook with no internet access. Honestly, this was a very good intro for programming for me. It allowed me to problem solve, and not just google code snips. I also coded all of this in notepad, so I had no IDE to help me out. (This is all at about age 12, btw)

My serious web development started when I met CraftedMovie. (<http://youtube.com/craftedmovie>) I offered them a free server and management, they accepted. The leader and I became good friends, and we started work on the server. It was okay, but, the whitelist system was VERY buggy, since it was my first program. (I have since redone this entire system, which I will post some screencaps of below) That system would glitch like crazy, and do shit like accept the wrong people, and not properly interact with the server.

We relized this would not work, and we needed a change, fast. I whipped up a mybb forum, which, quite honestly sucked. We deal with around 150 applications a day (or more), so, using a forum is

just stupid. We ended up with 12,000 unread applications, and no hope to even dent the amount of work that needed to be done. Therefore, I created, Whitelist V.2

This was a really good system, that is still in use today. Here are some screenshots:

<https://i.imgur.com/cibeR.png>, <https://i.imgur.com/dXBip.png>

The forum still sucked, even after the new whitelist system. We raked up the \$150 for xenforo, and bought a copy. This is one of my favorite pieces of work. I created a custom theme, and integrated very many custom features. I can honestly say, it's one of the best forums I've ever used (modesty)

We now have over 20,000 weekly visitors.

If you do not have much experience, what is your willingness to learn/practice? N/A

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<http://craftedmovie.com>

JumSpam - <https://i.imgur.com/ETdyB.png>, <https://i.imgur.com/1VCtC.png>,
<https://i.imgur.com/7QVOh.png>

(JumSpam was really a complex HWID test for me. Had almost nothing to do with the actual purpose of the application. When you first launch, it'll ask for a ID, which is given to you upon purpose (if I sold it), it will then associate your ID with your HWID in the web server. An ID can only be associated to one HWID, I had a pretty skilled friend try and crack it, and he gave up)

What can you contribute to coders?

Oh man, I'm tired of typing. I can contribute tutorials, some project ideas, and my experience with web design. I love to help people (I'm sure everyone said that), and this seems like a great opportunity to help HQ users.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Well, my vast experience with dealing with communities, and my (usually) friendly personality should be able to contribute greatly. I'm active, have some great ideas, and, am always willing to help.

(I can donate if it's as HQ as I expect)

BaussHacker - April 13, 2012, 6:10 am

Name:

Jacob

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old)

19

Languages you know:

C#, ASP.NET, VB.NET and a bit C/C++

Languages you are fluent in:(coding, not spoken)

C#, ASP.NET, VB.NET

Why do you want to be a part of Coders:

Because my main purpose of being on HF is programming. I'm always active in the programming section and I have always been from the first day I joined :).

What is your experience in the field of coding/programming:

I have been programming C# for about 3 years. It all started with me playing a game called Conquer Online and then I wanted to get into Private Servers seeing as most Private Servers in Conquer Online is coded in C# (And still is) then that's how I got into it. I then started to teach myself C# and it took longer than if I used an e-book rather than MSDN, but that's how I did it. I have never really got taught any VB.NET, but I know the library of .NET pretty well and I know the Syntax of VB.NET, so I can code VB.NET as good as I code C#. I have only been programming C++ for some months, so I won't really call myself a proper programmer in that field, but I do know some.

If you do not have much experience, what is your willingness to learn/practice?

You can always learn and there is always new things to practice. You can never know everything and there is not only one way to design your code, which is the beauty of programming. You can always expand and the languages are expanding as well.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

(Also currently working on an e-book for C#, which will be free and only available here at HF!)

<https://hackforums.net/showthread.php?tid=1645095>

<https://hackforums.net/showthread.php?tid=1268612>

What can you contribute to coders?

I can contribute a lot of tutorials, source-codes and I will always be helping those who need my help. I will also be willing to answer any question other members may have and do my best to answer or help them in the best way I can.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)

Because I am always active and what I use most of my time on Hack Forums is helping other people with coding or contributing pieces of codes, tutorials and or other things related to coding. I'm trying my best to be helpful against other members, even if we aren't swinging so good, then I'm still willing to help them and/or answer their question with a proper answer, seeing as you can always work things out.

Extra:

I've been waiting for such group for a very long time and seeing as it's coming, then that's great. I

really want to join, because I'd like to contribute things in the name of the group and all its members and I will have a lot of good content to share within the members of the forum, which can be useful for a lot o people.

At last, thank you.

Sysmatic - April 13, 2012, 6:11 am

Name: CyberRevolution

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old)18

Languages you know: English, Danish, Dutch(a bit) Czech

Languages you are fluent in:(coding, not spoken) HTML, CSS and PhP(PHP only the normal website stuff)

Why do you want to be a part of Coders: Because I wish to learn more about scripting/coding, and I think this team is the place where you have a chance to learn, currently my focus have been on websites, but the past few weeks I have been starting to go deeper into learning how to make a program, and therefor I think it's a good idea to learn a group about coding, that maybe could support me in becoming better.

What is your experience in the field of coding/programming: Well mostly websites, I have made few small scripts in Java, as a part of my school education, but I have not fully decided what language I am going to choose yet.

If you do not have much experience, what is your willingness to learn/practice? Yes thats one of my main reasons for joining this group, ofc If someone need help in something I know, I would love to help him/her aswell.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) No not currently, since most of my websites aren't online anymore, but you can wait a week or something then my new website, to my VPN will come, aswell as my VPN, where you can see some of my work. I don't really have any stuff otherwise, yes few small java scripts if you wish to see.

What can you contribute to coders? Well I can help people who learning coding websites and learn people the stuff I learn from other people in "coders" aswell as I am ready to learn all I can as fast as I can, to help other members of the HF, specially the "coders" members.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) Well I can't really say why I you should accept me, but more what I would do if I get accepted. I would first introduce myself, to all the members, after that I would start learning a language fully, mostlikely c++ or Java. While I am learning I am ready to help any members to become better in HTML, CSS or PHP, and of course if someone needs help in the language i decide to learn, that I already know, I would attempt to help him/her.

Extra: I hope I can become a member of this group since I think I need help to become a better scripter/coder.

Accepted. You will receive a PM once the group becomes live.

Name:

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 20

Languages you know: Some Spanish/German

Languages you are fluent in:(coding, not spoken) Nothing

Why do you want to be a part of Coders: I want to be a part of coders because I want to make free boosting bots that could help out the forum with Youtube, Twitter or Facebook

What is your experience in the field of coding/programming: Nothing whatsoever

If you do not have much experience, what is your willingness to learn/practice? I am more than willing to learn and practice because I'm very determined to achieve something with coding

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I don't have any past examples, but I helped my buddy who made the bot YRAC (Youtube Random Account Creator) distribute his bot that everyone loved

What can you contribute to coders? I can contribute these things: Knowledge

Respect

Dedication

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve to be in Coders because I am very determined and a hardworking person that doesn't stop until the job is done. I love helping people out in this forum for free, but I need to expand my knowledge to do so

Extra: Insert next coin to continue

.Cartman - April 13, 2012, 7:20 am

Name: Max Whitton

Age: I am 19 years old.

Languages you know: HTML, PHP and VB.NET

Languages you are fluent in: HTML, PHP and VB.NET

Why do you want to be a part of Coders: Well this is the first Official Coding Group and I think I'm a good coder and I would like to be a part of it :D.

What is your experience in the field of coding/programming: I started learning coding when I was 16 in high school. Then I learned HTML and learned PHP and VB.NET by myself. I would say I'm very experienced.

If you do not have much experience, what is your willingness to learn/practice?: If I was experienced (which I am), I would take the chance to learn coding. I like all the codes and seeing what I made at the end.

Any past work/examples of your work?: I will not post mine. Check my site, host-able.com check my booter thread I made that application in VB.NET. I coded my autobuy IPN in PHP. Those are my examples.

What can you contribute to coders?: I can contribute helpfulness, I can also contribute money to the group and moderation.

Why do you deserve to be a part of Coders? I feel I should be a part of the coders since I am a highly intelligent HTML, PHP and VB.NET coder. I enjoy coding and I think it would be even better coding in a group of people. I could work on projects or just help people with their projects. I could code booters and sites for the members of the group also.

Extra: nothing more. PM me if I am in :D

Prominent - April 13, 2012, 7:35 am

Name: Moe / Prominent

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 17

Languages you know: (I'm more of a web developer) HTML, XML, HTML 5, CSS 3, CSS 5, XPATH, XSLT, Javascript, PHP and SQL(Learning almost done) and Python

Languages you are fluent in:(coding, not spoken) Python, PHP (I'm fine till now but I need to learn more), and all the other web development languages I know. They are listed above.

Why do you want to be a part of Coders:I want to join the coders because I am passionate about programming, I love the fact that its a group dedicated to programming. I would like to increase my knowledge in some areas of programming.

What is your experience in the field of coding/programming:Well I have been a web developer for about a year and a half, I have a job that pays me well, my job is penetration testing and designing a website. As for Python, I have been using it for about a year(with the time it took to learn), I just love it and wish to be a freelancer soon.

If you do not have much experience, what is your willingness to learn/practice? Even with my current experience I still want to practice and learn more.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Usually most of my work is private but I help out in the Web construction section a lot.

What can you contribute to coders? I can contribute some lessons as I used to be the right hand man of the Eminence and I used to be a teacher too. I taught others web development. I can giveaway some references, lessons, source codes and open a help desk.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)

I deserve to be a part of the coders because I am passionate about programming and I love it. I am a quality member, I ensure the success of others, I am not the solo person, I like to work in a group. I would love to share my knowledge and learn from others. I never harmed or harassed any other member, I treat everyone with respect.

Extra: I am a penetration tester too and familiar with both windows and linux.

redpois0n - April 13, 2012, 8:16 am

You should fix that poll with userbars.

_SLQ - April 13, 2012, 8:22 am

Name: Ion Mircea / Night Fox

Age: 19

Languages you know: C++, C#, VB.Net

Languages you are fluent in: VB.net/C#

Why do you want to be a part of Coders: I have never been part of a group before so this will be my first one. I'm more of a coder than a hacker and prefer to write high quality programs, regardless of difficulty. That doesn't mean that I'm limited to only blackhat or whitehat programming/activities. I'll deal with everything to do with programming.

What is your experience in the field of coding/programming: I've been coding since late 2010, aiming to become more and more advanced. I self taught myself most of the knowledge I know. Currently my strongest points in programming are GDI+, Networking and game designing/modelling. As of now I'm studying cryptography. I mainly coded rats, keyloggers, irc bots and various themes. I'm aiming to make a crypter now. I can also set up websites [php and html] and edit them, but my knowledge of those languages isn't that great. Java is a language I wanted to learn for gaming but being just in classes/objects and heavy on resources put me off.

If you do not have much experience, what is your willingness to learn/practice? I believe I have quite a lot of experience when it comes to programming. Of course, I'm not the best and I won't brag about my knowledge, but I can't consider myself being a beginner nor an expert. Intermediate I'd say.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

VB.NET Remote File Manager - <https://hackforums.net/showthread.php?tid=2215167>

C++ Winsock Tutorial - <https://hackforums.net/showthread.php?tid=2189373>

What can you contribute to coders? I would share everything I know with my fellow members. I can provide personal help, examples, snippets and source codes for programs as well as advice for people's projects. All I ask in return is a thank you for my efforts, nothing more.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) First of all I'm a nice and helpful person with a great personality. I do not look down upon users with less knowledge than me, on the contrary, I aim to bring them up to my level. I take my skills and work/projects very seriously.

Second, I can't consider myself an expert in coding and I'm looking forward to be taught by others with more experience than me. So I'm always open to new ideas and suggestion/help.

Lastly because I feel myself worthy to belong in this group.

Extra: I got nothing else to say, thanks.

Silicon - April 13, 2012, 8:22 am

Name: AntiHelix

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 14

Languages you know: C#, Java, VB.Net, VB6, Pascal, basic PHP, ASP.NET with C# and VB.NET

Languages you are fluent in:(coding, not spoken) English (jokes). C#, Java (to a lesser extent), VB.NET

Why do you want to be a part of Coders: First reason, I like to be around like-minded individuals who can code and know what they're doing. The C# and VB.NET sections are pretty clogged up with LQ crap and it'd be good to actually see people and talk to people who have a better level of knowledge than the average.

What is your experience in the field of coding/programming: I've been coding in C# since I was 10 or something when a friend bought me this book: [Beginning Visual C# 2005](#) (the person who bought it me is one of the authors) and I've been bashing it ever since. I've gotten all of the subsequent revisions of the books and the Professional ones too, and I can do everything software-related in those books pretty much. The ASP.NET and web services aspect I've not dabbled in much, but the code I'm fine with. I can do stuff like networking, games (with XNA, see the top link below), file manipulation, and syntactic things like closures, lambda-expressions, interfaces, delegates, etcetera. With Java I've wrote a few things and games, all simply personal projects. I've made my own client for minecraft which didn't have any lines copied and pasted at all, which I am proud of (not updated it from Beta 1.8.1 yet though, not had the time). In Pascal I used to write bots for RuneScape in SCAR (and later Simba) but I've mostly gone off that now as it's a stale scene.

If you do not have much experience, what is your willingness to learn/practice? n/a

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<https://hackforums.net/showthread.php?tid=2381800>

<https://hackforums.net/showthread.php?tid=1986825>

<https://hackforums.net/showthread.php?tid=1654672>

<https://hackforums.net/showthread.php?tid=1820885>

<https://hackforums.net/showthread.php?tid=1521598>

2 slightly much older ones, images broke and probably DL links too...

<https://hackforums.net/showthread.php?tid=116158>

<https://hackforums.net/showthread.php?tid=124582>

And some others which I didn't post the DL link to, if you need any examples done for you PM me and I'll see what I can cook up.

What can you contribute to coders? Tools, source code, snippets, help (if you need an example of people I've helped, PM me). I can post constructive replies to people's questions. I can also do graphics for people's games, or threads, or whatever people ask of me (within reason). Basically if you can do it in Photoshop or C# I can probably help with it.

Why do you deserve to be a part of Coders? (This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I'm not a leecher, I give stuff I make out for free and I'm dedicated to helping people. If I see someone make a mistake I correct them, I'm a bit avid when it comes to grammar and spelling and I code for the fun of it rather than getting dosh. I'm willing to learn new things (eg. DCPU-16, if you keep up-to-date with Notch's twitter or 0x10c.com you'll know what I mean) and I love having a challenge in front of me.

Extra: If you yourself need any graphics or coding help done, shoot me a PM and I'll reply when I see it.

Captnroram - April 13, 2012, 10:07 am

I never got a reply to my application, so if you could please review it again.

<https://hackforums.net/showthread.php?tid=2351144&pid=21514577#pid21514577>

Thanks in advance.

We've already chosen a userbar. It's the one in the OP.

I just can't take down the poll. lol

+Bourbon - April 14, 2012, 4:21 am

Is it possible to see a member list? I hope this group is successful, I actually had intentions to make my own but lack the funds for an official group. I think you should introduce a ranks system based on points. For example, to achieve access to group let's say 3, you need 3000 coding points. Coding points are granted by releasing tutorials and such in the name of the group. This could be moderated by yourself and other high rank members.

BaussHacker - April 14, 2012, 4:30 am

(Apr 14, 2012 04:21 AM)ByteBlast Wrote: [\[CITE\]](#) I think you should introduce a ranks system based on points. For example, to achieve access to group let's say 3, you need 3000 coding points. This is a great suggestion! I'd like to see this. ? Should be like a list in OP with the members, tutorials and their points and then you post links to the tutorials in the thread or something.

daniboy14 - April 14, 2012, 8:04 am

Code:

Name:daniboy14

Age:14(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old)

Languages you know:HTML/CSS soon PHP/MYSQL/AS3

Languages you are fluent in:HTML/CSS(coding, not spoken)

Why do you want to be a part of Coders:Beacouse its than like a small community , and if their are much coders, all can learn from each other, as example, i need help at sth in HTML/CSS , their is another person who can this language , i can ask him , or opposite

What is your experience in the field of coding/programming:I only have experience in design coding

If you do not have much experience, what is your willingness to learn/practice?AS3/PHP / MYSQL, to write my own scripts/games

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)<http://imageshack.us/photo/my-images/859/fertig.png/>

<http://imageshack.us/photo/my-images/521/fertig2q.png/> it was a job i coded this in 1hour ,

<http://img854.imageshack.us/img854/8331/unbenannddt.png> ,

<http://imageshack.us/photo/my-images/191/unbenann2t.png/>

<http://imageshack.us/photo/my-images/638/backgroundwww.png/> and other if u want to see them just pm me:)

What can you contribute to coders?Hosting, and a site ,which i can code

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)As i said before, i would like it to code in a group , beacouse all can learn from each other:).

Extra:

TheClueCreator - April 14, 2012, 9:08 am

Name: TheClueCreator

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 29

Languages you know: Norwegian and English

Languages you are fluent in:(coding, not spoken) in the learning progress at java, starting to crack on multi dimensional arrays next week.

Why do you want to be a part of Coders: a place to learn and something more fun to code than exercises from my books.

What is your experience in the field of coding/programming: Not mutch as stated before. Used to disassembely in the late 90's and a very little asm. (MASM)

If you do not have much experience, what is your willingness to learn/practice? willingness is trough the roof

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Got nothing to brag about.

What can you contribute to coders? Always online and a geek.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) That is for the recruiters to decide.

Extra: It's a fine day today ?

Han. - April 14, 2012, 1:07 pm

So is the Cod3rs becoming official today?

Big Baller Shot Caller - April 14, 2012, 1:12 pm

(Apr 14, 2012 01:07 PM)Han. Wrote: [\[CITE\]](#) So is the Cod3rs becoming official today?
Well he bought the group yesterday, it should be official today..

Lonely - April 14, 2012, 1:13 pm

I have an idea for the group. When it becomes official, we should set up a contest. The contest would be where the best tutorial in each coding section will get recruited into Coders. That way the group gets known and alot of knowledge and good TuTs get spread ;) I have more that I will talk about in the Coders Lounge :)

Mr. Anderson - April 14, 2012, 1:14 pm

Ah man, the other userbars looked better than this. What happened to them?

Haha I just wanted to type that when I saw the 2 guys waiting for their bars :DD

Han. - April 14, 2012, 2:17 pm

I'm going to stop chatting in this thread. We're probably clogging it up and I don't want to start any arguments or flame wars. xD

OneHundredPercent - April 14, 2012, 6:00 pm

kickass group!!! ill be looking to get into this soon

antigrav - April 14, 2012, 7:37 pm

Name: Arnav

Age: 13. I can act up to par with a 16 year old.

Languages you know: Learning Java right now, but I can't really say I "know" it.

Languages you are fluent in: None so far.

Why do you want to be a part of Coders: I want to be part of a community that will help me further my knowledge in coding. Hopefully, eventually I will be at a level of skill where I can help others with programming.

What is your experience in the field of coding/programming: Just practicing Java a lot. I've never made an actual project or anything, but I do college programming assignments using Google to learn new things about Java. e.g I was doing an assignment that needed `Integer.parseInt(string name here)`. I would not know how to use `Integer.parseInt()` without using Google and the assignment.

If you do not have much experience, what is your willingness to learn/practice? Well, I've been trying to learn Java for awhile now. I don't have a teacher, I'm self-teaching myself (Google and MIT's OpenCourseWare are my two biggest resources).

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) No, sorry.

What can you contribute to coders? I'm willing to join and learn from the prestigious coders and hopefully one day achieve the level of programming where I can teach someone about something.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I think I deserve to be a part of Coders because I've been trying to learn Java for awhile now and I'm definitely dedicated. I don't lack determination, I just lack a good teacher. The best way to learn something is to have a human teach it, in my opinion. You can't ask a book or an e-book or a video a question. I might teach myself bad coding habits if I don't have someone to point them out. It's like when people type "their" instead of "they're". A standard word processor won't catch the mistake; it's something that must be learned the right way so it can be avoided later. I look up to people who can program, and I hope one day I can be someone who can program. I want to be able to have an idea and instead of just waiting for a company to make it, I want to be the person who makes it.

Extra: Thank you for even considering my application. :)

peekemans - April 15, 2012, 4:13 pm

Name: : Ruben

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) : 17

Languages you know: English, Dutch, French, German

Languages you are fluent in:(coding, not spoken) : C# and a bit of java and c++

Why do you want to be a part of Coders: Because this group seems to have so much potential, and I saw a lot of HQ coders already accepted.

Also, even more important, Next year in college I will study applied informatics (I don't know the exact English term). In short, it's 3 years (bachelor) and I will learn the Art of Programming, protection against cybercrime and software development.

What is your experience in the field of coding/programming: I learned the basics of C# and made a few easy and basic programs.

If you do not have much experience, what is your willingness to learn/practice? To be a step ahead next year, and because I just love coding!

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I made a simple tool for converting a text into leetspeak. I can send the link later if you want, since I'm typing this on my mobile phone.

What can you contribute to coders? I'm afraid my coding experience does not reach as far as the

average coder in this group. But in the process of learning I'm sure I have a lot to offer!

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) My grammar is above the average HF user, and the will to learn is strong in this one ;) Also, my sense of humour is quite developed.

Extra: I play the piano, for 9 years now. I'm really becoming better and better the last months :D My heart would be filled with joy if I'm accepted in this group.

I can't wait for an answer.

~Kind regards~

ruben

.au3 - April 15, 2012, 7:02 pm

Apply now guys! This is going to be a great HQ group!

Stifler™ - April 15, 2012, 7:34 pm

Looks like a very promising and high quality group. Good luck with this guys!

_SLQ - April 16, 2012, 10:02 am

Hey, just wanted to know... It's been a couple of days after I made my app and didn't get a response, does that mean I've been rejected or not reviewed/pending?

Cheers.

Han. - April 16, 2012, 10:32 am

Night Fox he will tell you if you've been accepted or denied. He knows people are waiting for applications.

The group becomes official today so he'll be very busy. Plus I think he had to travel either today or yesterday.

Can't wait for the sub-forum banter. So glad I got accepted ?

.au3 - April 16, 2012, 11:58 am

Going to be official soon guys! This is going to be awesome!

bobjon - April 16, 2012, 1:10 pm

Yup! Still waiting for my app to be accepted or denied :). Best of luck to everyone that applies and may this be a successful group!

Redeemz - April 16, 2012, 1:10 pm

Name: : Patrick

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) : 18

Languages you know: English, Spanish

Languages you are fluent in:(coding, not spoken) : I major in VB/ VB script and I have experience in c#/Delphi

Why do you want to be a part of Coders: I just want to further help the community, if people see I'm a "Coder" they can pm me and ask for help.

What is your experience in the field of coding/programming: I major in computer science as a

freshman in collage. I have learned VB/C# with books and online resources. I also have hours logged in php/html/sql.

If you do not have much experience, what is your willingness to learn/practice? I do have knowledge i just hope to spread it.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I have a coded a few blackhat things such as QWERTY Logger (<https://hackforums.net/showthread.php?tid=2326045&highlight=QWERTY>) I aslo have a lot of tutorial ect. I've posted in the .net sections.

What can you contribute to coders? I have the skills, knowledge,and the will to help others learn. I believe in open source, which will help many people as i release more private advanced things to the section.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) My grammar is above the average HF user, I feel that if I'm accepted, i could really help everybody out.

Extra: One thing that I've learned from coding is that everything is trial and error (or rather Debugging) I have, and always will be the one to sit there and figure out a problem or a workaround until it is solved. Having said this, i hope my drive and determination will land me a spot in the coders group.

May the Code be with you,
Pat

King of Hearts - April 16, 2012, 2:00 pm

Everyone should apply to this group. It's going to be amazing.

.au3 - April 16, 2012, 2:01 pm

(Apr 16, 2012 02:00 PM)saadmboy Wrote: [\[CITE\]](#) Everyone should apply to this group. It's going to be amazing.

Yessir. It is going to be Official very soon now!

bottomy - April 16, 2012, 2:11 pm

Name: bottomy

Age: 20

Languages you know: asm, C, Obj-C, Javascript, UnityScript, JSCocoa, Ruby, MacRuby, GLSL, OpenCL-C, Core Image Kernel Language.

Languages you are fluent in: Same as above.

Why do you want to be a part of Coders: I've been wanting to get involved (whether that be through discussions, or contributing code, etc.) in some interesting group projects for quite some time, so hopefully Coders will be the place for that :).

What is your experience in the field of coding/programming: I've been programming for a little over 2 years now and since then I've delved into many areas. The areas I'm most experienced in are graphics programming, games development, optimization, reverse engineering, audio programming, creating my own languages or own implementations (building compilers, interpreters, assemblers,

disassemblers), tool development, and then just a wide range of miscellaneous programs. The focus of most of my development is Mac OS X and iOS, so I have considerable experience with those platforms.

If you do not have much experience, what is your willingness to learn/practice? Very willing, as I am always learning as there are very few things where you can "have enough" experience. As many areas are always expanding/growing.

Any past work/examples of your work? I haven't made any "releases" as such here, so I don't have any worth while/programs I spent some time on, public. But one of my current projects I'm likely to release, it's a command line injector tool for OS X, and a GUI memory scanner/editor and injector tool (though need to finish the injection side first). I've completed the more basic injections, and am working on bundle injection and I just need to work on turning my remote mach thread into a pthread, after that I'll probably release it. Another thing I may release is a little command for gdb I've written to aid in reversing, it displays the Obj-C message for the current objc_msgSend call.

e.g. (pmsg is my command)

```
Spoiler (Click to View)Code 0x00007fff97970f40 in -[NSCGSContext(NSQuartzCoreAdditions)

What can you contribute to coders? I can contribute in many ways. From contributing to any group development projects that may be of interest to me, to just being apart of the group's discussions. Though my free time is mostly taken up working on my own projects, so if this group has any crazily time consuming rules/expectations such as expecting members to create an application every 2 weeks (or something similar), then just deny this application.

Why do you deserve to be a part of Coders? I have experience in a number of areas, many of which aren't as common here. I feel that because of these lesser common areas (with regards to commonality on HF) that I have a unique perspective or am in an unique position in respect to contributions I can make.

Han. - April 16, 2012, 2:12 pm

I realised why it seemed late to me. It's 10PM here and it's monday night so I was surprised when it wasn't official but then I realised that it's because Omni and Honor Et Veritas are GMT-8 which means it's only like 2PM there.

.au3 - April 16, 2012, 2:36 pm

(Apr 16, 2012 02:12 PM)Han. Wrote: [\[CITE\]](#) I realised why it seemed late to me. It's 10PM here and it's monday night so I was surprised when it wasn't official but then I realised that it's because Omni and Honor Et Veritas are GMT-8 which means it's only like 2PM there.

I thought it was suppose to be official at 2pm?

Han. - April 16, 2012, 2:42 pm

I wouldn't be surprised if it's a little late.

From what I can see, Honor Et Veritas is busy today with travelling. He said he was on a 4000+ mile flight. Maybe he's busy the next few days.

King of Hearts - April 16, 2012, 2:43 pm

(Apr 16, 2012 02:36 PM).au3 Wrote: [\[CITE\]](#) I thought it was suppose to be official at 2pm?

Yah same. Also when it does get official, if we were accepted do we just join via the usercp?

Buffer_Overflow - April 16, 2012, 2:43 pm

Name: Buffer_Overflow

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old): 24

Languages you know: Python, C++, and Matlab

Languages you are fluent in:(coding, not spoken) Python and Matlab

Why do you want to be a part of Coders: This is the only group that offers any incentive for me to join: by that I mean that other HF groups cater to different user groups. I feel a group that is centered around a smaller grouping of subjects would be more appealing to me than a group which caters to many niche groups.

What is your experience in the field of coding/programming:

I originally started at age fifteen with Perl; I mainly used Perl to automate simple tasks, but never took to the language well. I eventually switched into C after around a year of fooling around in Perl. The main problem with this switch was that I never needed to code in C, so I mainly stuck with Perl.

In my undergraduate years I studied Computer Science where I was exposed to C again and Java. I mainly used these languages for the tasks set. However, I eventually switched from a combination

of Perl and C into C++ and Python, but I had a similar problem from this switch, too. I eventually decided to stick with Python because it made both life and programming easier. Now I am a graduate student pursuing a Mathematics degree, and I mostly work with Matlab. Although, I have often used Python in both daily life and studies, and as a result, I feel that I am more competent in Python than in any other language.

If you do not have much experience, what is your willingness to learn/practice? I am more than willing to learn and practice, and I currently am working on bettering myself in functional programming by means of the Haskell language. I feel that learning Haskell and functional programming paradigms will be a great step in the right direction for my programming career, and as a result, I am taking Haskell and functional programming very seriously.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Most of my coding contributions have been outside Hackforums, but for the ones that I have submitted to Hackforums, most have been through helping rather than releasing. By this I mean that I mainly contribute to the HF coding community through the Python section in forms of rewriting or offering advice. However, I have released one small program that might showcase some ability: <https://hackforums.net/showthread.php?tid=2403629>

What can you contribute to coders? I would mainly contribute to coders by aiding fellow Pythonistas. However, that is not to say that I won't be able to help those who focus on other languages--I have experience with many languages, and have been exposed to many different problems and solutions.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve to be a part of Coders because I have been programming for years, I have used programming for success throughout academia, and I plan to use my nine years of experience throughout the rest of my life.

Extra: Although one actual release may not seem impressive, most of my programming contributions to HackForums have (as earlier stated) been through aiding others. I feel that I shouldn't be looked over because I have not many actual releases; I have plenty of merit in helping others, and that's probably the only reason that I visit this forum--this sounds rude, but it's not an insult toward HackForums.

Stellow - April 16, 2012, 2:45 pm

Name: Stello/Jeremy.

Age: 18.

Languages you know:

Spanish, English

Languages you are fluent in:

Html, Css, Php, VB.net (Still studying C++.)

Why do you want to be a part of Coders:

This is just the group I have been looking for, I just recently got back into programming since the summer is coming up. So therefore I will have a lot of time to study and Progress more. So first off I feel that joining this group can help me expand my knowledge on Coding, I feel that we can all come together and share things we know which can help everyone improve. that's why I wanna be a part of this group also Think if I'm accepted we should make a few things for the community of Hf like a Public Crypter I know it wont last long but it would be ok for awhile.

What is your experience in the field of coding/programming:

Well I started studying Html, Php and VB.net around 2010-2011 I believe Yourself being a coder and all you should know its hard to learn multiple Languages at once so that's why still to this day. I still seem to get a little confuse but nothing major as I feel that joining this group can help clear my head up a little bit.

If you do not have much experience, what is your willingness to learn/practice?

I would say I have a decent amount of experience but I can and I'm willing to learn more
Thought I should add this In Web-designing is my main Focused with that being said I'm still willing to Learn new things

Any past work/examples of your work?

I have a few programs which I have created and also still have a couple of websites they are private I can Pm you if needed

Things I created thought I should list them

1. Crypters.
2. HostBooters.
3. Sms Bomber.
4. A few little games, nothing major.

What can you contribute to coders?

I'm very educated In web designing. (Going to School for it now) also have unlimited offshore hosting I can provide to the members for their projects and also I'm willing to provide tutorials and my field of Knowledge Monthly, and If a member has a problem I will try my best to help him/her solve it.

Why do you deserve to be a part of Coders?

Because I'm a very educated person, I don't have a problem with helping people I love to make tutorials have not made many but I'm willing to start

Extra:

I know I have not contributed much to the coding side of Hf But starting now I will try my best to do a lot more on that side of the forum

(The only group I have applied for on a serious not because it feels like the only group I can excelled In also Please excuse my Grammar and English mistakes as its not my 1st language)

.au3 - April 16, 2012, 2:45 pm

(Apr 16, 2012 02:43 PM)saadmboy Wrote: [CITE](#) Yah same. Also when it does get official, if we were accepted do we just join via the usercp?

Yeah, if you were accepted you must apply via UserCP.

Han. - April 16, 2012, 2:49 pm

Oh, thanks for that .au3 xD

I would have been sitting here like D: It's almost 11PM here. I will stay up until this happens! ?

Venusaur - April 16, 2012, 3:19 pm

You are not allowed to ask for donations before the group is official.

Super Scumbag - April 16, 2012, 3:21 pm

(Apr 16, 2012 03:19 PM)Dashy Wrote: [\[CITE\]](#) You are not allowed to ask for donations before the group is official.

The group IS official.

Thanks for enforcing though. But read the thread next time. I've already posted a few time about that.

.au3 - April 16, 2012, 3:23 pm

(Apr 16, 2012 03:21 PM)Honor Et Veritas Wrote: [\[CITE\]](#) The group IS official.

Thanks for enforcing though. But read the thread next time. I've already posted a few time about that.

Hey bro I want to talk to you on Skype xD

You should probably close apps now though.

Venusaur - April 16, 2012, 3:30 pm

(Apr 16, 2012 03:21 PM)Honor Et Veritas Wrote: [\[CITE\]](#) The group IS official.

Han. - April 17, 2012, 9:35 am

He's not online. He probably has like 500 PMs to answer :P

.au3 - April 17, 2012, 9:39 am

(Apr 17, 2012 09:35 AM)Han. Wrote: [CITE](#) He's not online. He probably has like 500 PMs to answer :P

Would you happen to have Steam..? If you do message me.

Han. - April 17, 2012, 12:32 pm

Done. This is pretty dissappointing, hope the group activity picks up once we become official :/

pr0t0typ3 - April 17, 2012, 1:09 pm

Name: pr0t0typ3 aka Julian

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 17

Languages you know: German/English/Latin :D

Languages you are fluent in:(coding, not spoken) C#/VB.Net/C/C++/Delphi

Why do you want to be a part of Coders:Well as I consider myself a well known and talented coder I see the coders usergroup as a great opportunity to share my knowledge help others and discuss with other good coders.

What is your experience in the field of coding/programming: Network related programming (web-grabbers/bots), Security Related programming (encryptions, login systems, protection methods), Malware related programming (RATs, Bots, Crypters, Binders, Rootkits, Downloaders, etc.), Tool related programming (Utilities to make all kinds tasks easier)

If you do not have much experience, what is your willingness to learn/practice?I'm pretty sure that I can still learn a lot of things, but I've also a big knowledge I can share.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<https://hackforums.net/showthread.php?tid=602063>

<https://hackforums.net/showthread.php?tid=1048241>

<https://hackforums.net/showthread.php?tid=664139>

<https://hackforums.net/showthread.php?tid=784428>

<https://hackforums.net/showthread.php?tid=837605>

Additional Note: I was the first person on this forum to create and sell a working RunPE for .net which worked on x64 systems, although the thread is junked now (it was in early 2010).

What can you contribute to coders? My knowledge, small tools I code for myself, discounts on my commercial products

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)As mentioned before, I see myself as a part of the "coder elite" on this forum and think I can contribute a lot to this group and teach a lot of people. I've helped many people in the past and create many projects (free as well as commercial) and never had a single person unsatisfied with what I made for him. I hope I can become a part of this great group and share my knowledge with other talented people as well as beginners.

Extra:I don't really have to say anymore and look forward to hear from you soon :D

Daywalker_99 - April 17, 2012, 3:09 pm

Name: Robin "Daywalker"

Age:18

Languages you know:German, English

Languages you are fluent in:(coding) Java, PHP (some basic knowledge in C++, Javascript and AVR Assembler)

Why do you want to be a part of Coders: I want to get off my little games and tools, i made for me alone, and become a part of something bigger, also i'm tired of making low quality projects with my classmates.

I'm seeking to make projects with programmers on the same or even higher level.

What is your experience in the field of coding/programming:

I've been programming since 2 years now and i'm way beyond beginners level. In addition im working as mini-jobber for an IT Company among School.

Any past work/examples of your work? Many little projects but nothing really worth mentioning. Some little games, a server for a browsergame, a GWT webapplication, a little crawler, a basic encryption program and last but not least an mp3 sorter. I poked my nose in much areas but i didn't get deeper into something, yet.

What can you contribute to coders? I'm very dedicated plus i put much effort and time in my coding. If i meet problems, i'll work persistently and patiently on them. In additon i'm a very helpful person who will always explain things to others.

Why do you deserve to be a part of Coders? Unfortunately i have no work which shows that i'm high quality but i hope to get the chance to prove.

ChineseFountain - April 17, 2012, 10:14 pm

How do I join the Skype group? I've been accepted and I have you added on Skype as well.

Meal - April 17, 2012, 10:18 pm

Name: Sajad [Saj - awd]

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 19

Languages you know: English, Arabic, 3rd Year French

Languages you are fluent in:(coding, not spoken) HTML5, CSS3, PHP, C# [iOS Development Mainly, iPhone etc Apps, Cydia Tweaks market] and C++ currently learning more of it.

Why do you want to be a part of Coders: ... Isn't the title basically obvious?!

What is your experience in the field of coding/programming: 8/10 In most, 10/10 in iPhones and iOS apps and development.

If you do not have much experience, what is your willingness to learn/practice? I know alot.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I can skype you them or PM you them, just ask me.

What can you contribute to coders? Will probably donate here and then.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I might be alot of help, especially having the title, it could prove that I know more of programming and people will make more deals and trust with me, and if I do make money it will go to donate for coders.

Extra: Ily man, I will start floating if I get in.

Disease - April 17, 2012, 11:10 pm

When will I get accepted or denied? :3

Super Scumbag - April 18, 2012, 6:57 am

(Apr 18, 2012 06:52 AM)bobjon Wrote: [\[CITE\]](#) When will I get accepted or denied? :3Read the thread. I've already answered that question. On this page I do believe in fact.

DaFreak - April 18, 2012, 8:35 am

tbh I do not like the userbar, the text looks very messy.
But maybe my thinking is different?

Good group hope you get some good members.

Good group hope you get some good members.
If you can get one that's lower than 6kb and looks good, then by all means, feel free to post it here.

.au3 - April 18, 2012, 11:05 am

Well, I made this one hope you like it :)

Han. - April 18, 2012, 11:53 am

Doodie that looks great actually. Do you think without the animation it would go under 6kb?

I'm sure Honor would take it into consideration if you asked him ?

.au3 - April 18, 2012, 11:57 am

(Apr 18, 2012 11:53 AM)Han. Wrote: [\[CITE\]](#) Doodie that looks great actually. Do you think without the animation it would go under 6kb?

I like it, I sent omni a PM requesting it to be made as the new userbar.

.au3 - April 18, 2012, 11:59 am

(Apr 18, 2012 11:58 AM)Honor Et Veritas Wrote: [\[CITE\]](#) I like it, I sent omni a PM requesting it to be made as the new userbar.
Thanks man. It is 6.5k remember maybe he could make an exception or I could take half the frames out haha.

salmoneus - April 18, 2012, 12:00 pm

I don't like the bomb in it, could it be replaced with like an object more related to coding?

Super Scumbag - April 18, 2012, 12:59 pm

For a bit of group history, Lacrosse is the first, last, and only HF member to recieve a personal invite to Coders. Like.. in person. lol.

cadanc3 - April 18, 2012, 1:19 pm

Cod3rs has just been formed. Honor/Phayzon aren't online at the moment so I'd give it a while before we start getting accepted.

Han. - April 18, 2012, 1:20 pm

Kyle is online on Skype. He's probably got about 700 messages. ?

+Awesome - April 18, 2012, 1:22 pm

Name: +Awesome

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 18

Languages you know: HTML, DHTML, CSS, Javascript, jQuery, PHP, MySQL, C++. Currently learning VB.NET, ASP.NET, C#.

Languages you are fluent in:(coding, not spoken) HTML, DHTML, CSS, Javascript, C++.

Why do you want to be a part of Coders: Because I am willing to share my knowledge and programs with other members of this high quality group.

What is your experience in the field of coding/programming: C++ doing since 2 years. Web: 5 months.

If you do not have much experience, what is your willingness to learn/practice? Willing to learn as well as share.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) <http://awesomemgfx.net> | <http://leetstreet.me> | I shall update this with more of my coding work. I made Blackjack game, train reservation system programs for my school projects. I wouldn't like to post the code here. I shall PM you with the executables if you agree.

What can you contribute to coders? My snippets, my programs, my Graphics, my knowledge, and active participation.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve because I have been coding for a long time as a student now, and willing to be active in the sub-forum, creating a Skype group chat (if not exists) for all the active and participating users making this group #1 on HackForums. I will be happy to present you my certifications, after a month or 2, after I receive them. :)

Extra: I am an GFX artist, and a hacker as well. Though I do not code Malwares or any Blackhat programs at all.

Thank you.

Chunked - April 18, 2012, 1:24 pm

Looks like it became official few minutes ago. I wish you best of luck with your group. :)

AA:PG - April 18, 2012, 1:25 pm

So if we got accepted do we have to apply via UserCp or wait to receive an official PM ?

SkinTee - April 18, 2012, 1:32 pm

Name: Tim

Age: 15

Languages you know: I know the basics of HTML, CSS, and Javascript. I have much higher knowledge in Java and C++.

Languages you are fluent in: Java

Why do you want to be a part of Coders: I have a passion for learning about coding. I hope to help other members, discuss topics, and work on projects with others. I hope gain experience working with other coders.

What is your experience in the field of coding/programming: I am mostly self taught, but I have taken a high-school course on Java and received 5/5 on the AP test.

If you do not have much experience, what is your willingness to learn/practice? I am determined to become an experienced coder as I wish to have a career in software development.

Any past work/examples of your work? I have created a few Java games, but I have my full name and other information in the credits and I wish to keep that private. I can PM you a link if you are trusted.

What can you contribute to coders? I can contribute to Coders by helping other members. Also, any projects that I make in the future will be released publicly, unless other coders wish to keep it private.

Why do you deserve to be a part of Coders? I deserve to be part of Coders because I am dedicated to programming.

D?certo - April 18, 2012, 1:40 pm

Name: Ellis

Age: 18

Languages you know: HTML

Languages you are fluent in:(coding, not spoken) HTML

Why do you want to be a part of Coders: I am really looking to learn more languages, and more towards the route of programming.

What is your experience in the field of coding/programming: I have done a lot of web development work, as well as a college course which was web dev based

If you do not have much experience, what is your willingness to learn/practice? I have always had a lot of interest in coding. I have always wanted to learn but have never found myself the time to do so. Now I have the time and the motivation to learn as much as possible in the area. I love learning new things and applying those skills in life, and I can see this as being the start of a long time in coding.

What can you contribute to coders? I am a dedicated person who love to learn new things, I can also help people with any queries that I am able to help with. I have always took a great interest in coding and feel that this is the time to learn.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I am a verydedicated person like I said before, when I start something I won't stop until I have finished to the highest possible standard. I love to learn new thing and am very motivated to do so. I think that this is a good time for me to learn something new, something that I have always wanted to be more knowledgable in, Coding. I feel the Coders is the group that can help me achieve my goals and hopefully be able to one day, teach others the skills I learn in the group.

Extra: Thanks for the opportunity.

+Awesome - April 18, 2012, 1:40 pm

Sorry for this very late entry:

DrRaiku - April 18, 2012, 1:58 pm

YAY We are official <3 woot :3. I hope this is the fucking best XD

Raspberry Pi - April 18, 2012, 2:00 pm

Grats to this group. I bid you all good luck and have fun! Cook up some cool shit for HF :P.

Chappie - April 18, 2012, 2:10 pm

Name: Joe

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) I am 18 years old.

Languages you know: C#, some Java and C++.. And of course VB

Languages you are fluent in:(coding, not spoken) C#

Why do you want to be a part of Coders: It is nice to see a group dedicated to coding, so I would enjoy to be able to participate in that. Not too sure on how well the group is going to do, since it just started. But I would love to contribute to help give it a good reputation as well as increase its quality.

What is your experience in the field of coding/programming: I very much enjoy the C# language, but it is easy for me to pick up using any language slightly similar to its syntax like Java and C/C++. I have created a few games using XNA as well as create my own applications and release them. I started learning programming as a hobby and just out of self interest. I have not attended school for it, if that is what you are asking. However, I very much have the interest and dedication like a true programmer and I hope to help others advance too.

If you do not have much experience, what is your willingness to learn/practice? I have a fair amount of experience, at least for only coding for about a year, which is very little time to call yourself "experienced". In fact, there are very few people on this site that are actually "Experienced". However, I am a quick learner and am willing to learn what ever is thrown at me.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<https://hackforums.net/showthread.php?tid=2174362>

<https://hackforums.net/showthread.php?tid=2216118>

<https://hackforums.net/showthread.php?tid=2397026>

(Here is a game I am currently coding, as well as coded a map creator)

Spoiler ([Click to View](#))

[Video: <http://www.youtube.com/watch?v=Gm1uQNQLXjo>]

What can you contribute to coders? Of course I can, otherwise I would not be applying :) I think I can contribute to the group as well as learn a great deal in it. I will do what ever I can to help others in the group learn, as well as do what ever I can to improve my self in the group. I am great working with others, and would very much enjoy being in an environment with people of the same interests and goals.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I think I deserve to be in coders because I can actually contribute to the group and the members within it. I am very dedicated and interested when it comes to programming and I am always ready and willing to both learn from others as well as show others what I have learned. I am not going to lie to you

and pretend I am some "1337 COD3R" like most kids will on their applications. I have a lot to learn and that is just me being honest. However, unlike the others I am very willing to learn and do what ever I can to help out the group and what ever causes it pursues. I have the dedication as well as the time and interest to become a very great asset to the group. I also want to add in that I like seeing a coder group finally appear on HF, and regardless if I get in or not I would like to see this group thrive.

Thank you for reading my application.

What can you contribute to coders? I'd like to share what I know with the members of coders, and hopefully we can make a great collaboration.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I feel like I

can put a lot into the group, and help everyone in it. I am almost always coding, whether it's on my computer or in my head, so I think I will make a great addition to your group.

Extras: Thanks for taking the time to read my application.

Han. - April 18, 2012, 2:31 pm

Vouch for
Libertarian

Very good member and very good C# programmer.

Sports. - April 18, 2012, 2:32 pm

I just hit you with a text, made a couple of my friends laugh

TheVortex - April 18, 2012, 2:33 pm

definitely a cool group to be in it will be nice to see all the members.

SoulZeh - April 18, 2012, 2:35 pm

Name: Kevin

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 17

Languages you know: Visual Basics, Little HTML & PHP

Languages you are fluent in:(coding, not spoken) Visual Basics .NET I know my way around that quite well.

Why do you want to be a part of Coders: I want to be apart of the "Coders" because I feel like this will give me a opportunity from other programmers in the group to share things with me and I can also share my experience in programming with them to get a lot better at it.

What is your experience in the field of coding/programming: About 6 months to 1 year

If you do not have much experience, what is your willingness to learn/practice? Well this is a good question, There is something nobody knows about Visual Basic's We always learn something new every day in a programming language, no one will ever master a programming language and I am willing to learn loads to help others and also help myself

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) Spoiler ([Click to View](#))
[img]http://i459.photobucket.com/albums/qq312/ERROR666/Untitled-24.gif[/img] Sorry I don't have much to post all the images for my themes was broken, but mainly I was working around GDI

What can you contribute to coders? I can contribute my skills in programming language with others in the group, I also love working as a team in groups so it helps them and also me, because if I don't know something and they do I can ask what it means and so on

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I think I deserve a change in "Coders" because I am willing to spend a lot more time again in programming, I did love programming about 2months ago then I was working on something and couldn't figure it out then gave up, So maybe if I got this chance in this group I could maybe gain the part of the program I got stuck on. I personally think I am a active and High Quality member to HackForums, I don't mind

helping others out either.

Extra: Just want to say thanks for reading my application.

My up and coming rat: <http://cache.gyazo.com/8d9587c18f40dee9719d0776cc24e43e.png>

What can you contribute to coders? I can write very interesting/informative tutorials, release programs, help anybody out with questions relating the programming languages I know, release unique sources etc.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I believe that I'am a great programmer that has been at it since the age of 10, and I could highly contribute to the group with my knowledge of webrequests/sockets and much much more, I'am a happy and friendly guy and does not get bothered if someone asks for help to do in with programming I will gladly assist them as best as I can.

Extra: Thank you for reading my application, and good luck to everyone else :)

Elegant - April 18, 2012, 3:06 pm

Name: Nelson

Age: 16

Languages you know: None

Languages you are fluent in: None

Why do you want to be a part of Coders: I would like to learn how to use these languages for future references. Knowing how to code will help me learn more and give out useful information to others that do not know. It will kind of be like a school thing, higher people will teach the lower people, and as they grow, they soon will be teaching the lower people. I will be fully dedicated to

learning/teaching later on. I am very active on the forum, go on everyday for several hours. Soon I will be making very good programs and such to the other members of the group, and some less programs to the people not in the group. I later on will also be glad to making basic tutorials for some users.

What is your experience in the field of coding/programming: No experience, but want to learn.

If you do not have much experience, what is your willingness to learn/practice? I am 100% dedicated to learning/practice, I would like to help other people later on.

Any past work/examples of your work? No work.

What can you contribute to coders? I could post basic tutorials on how to code stuff, and such.

Why do you deserve to be a part of Coders? I deserve to be part of the Coders so I could take and give out information (in a good way). I want to learn as much as I can and help out the other people that are confused and such in the field of coding. I am very High Quality and always on the computer, I am glad to help out members for hours a day willingly.

Extra: I want to learn how to code :)

Hydr0x - April 18, 2012, 3:28 pm

Name: Nathan/BIG

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) I am currently 14 years of age.

Languages you know: I know a bit of PHP and HTML.

Languages you are fluent in:(coding, not spoken) HTML

Why do you want to be a part of Coders: I want to be apart of the Coders to teach others and to learn more about coding/languages.

What is your experience in the field of coding/programming: I like to code websites and many different other things.

If you do not have much experience, what is your willingness to learn/practice? To be a dedicated listener and to spend time to watch/view many tutorials.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I don't have any, but I've coded many things that aren't alive..

What can you contribute to coders? I can contribute many tutorials and I can bring a good attitude towards the group.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I deserve to be apart of the Coders because I believe being in the Coders will help me learn many different things. Whether it's new coding languages or something to do with non-coding. I also feel like I deserve to be apart of the coders because I want to learn and I am a good learner..

Extra: That's all.

Visual Basic .NET

C++

PHP (Scripting, but who cares?)

Python

Lua (Again, scripting, but who cares?)

Javascript (Scripting, again)

HTML (Yes, it counts as a language)

Languages you are fluent in: I am currently most fluent in PHP and Python.

Why do you want to be a part of Coders: I want to be a part of the Coders group in order to expand upon, or even learn new, programming languages, as well as meeting new people on the HF community that can benefit me as well as benefit from me.

What is your experience in the field of coding/programming: I've taught myself all languages that I know, and have been a freelance programmer for many private companies. I also program tools for myself for personal use to make anything easier to use.

If you do not have much experience, what is your willingness to learn/practice? Even if I do have experience, I'm always willing to learn and practice new things to further expand my programming skills and knowledge.

Any past work/examples of your work?[Orange Box Bopper \(Commercial Product\)](#)

[BlackBox \(Game Exploit\)](#)

[Custom Disconnect Message \(Game Exploit\)](#)

[OSLua \(Game Extention\)](#)

[Online Text Bomber \(Second one on HF\) \(Discontinued\)](#)

There's more, but the search limits to 5 pages, so I'm forced to stop with that

What can you contribute to coders? I'm not completely sure what I could do to contribute besides post more informative tutorials, which I'm not great at writing anyways. So, I suppose the most I could do would help other members learn the basics of whatever language I know most about.

Why do you deserve to be a part of Coders? I wouldn't say I deserve to be a part of the Coders group, but I can easily say that I want to be a part of it. This is because when the original coders group was here, I was a member of the group and met a lot of new people and learned new things. I want to be part of this group, hoping that I can learn something and help contribute to the success of it.

Extra: I'm willing to donate \$10, but I will do it only after I am accepted/denied. I do not want my donation to be a part of my approval. And the edit was to fix a few minor spelling errors I made.

Hydr0x - April 18, 2012, 3:38 pm

I have made a few userbars that I can change around if you want..

Here's an animated one:

[\[IMG\]http://i.minus.com/jb17IRaLuQIJUP.gif\[/IMG\]](http://i.minus.com/jb17IRaLuQIJUP.gif)

Non-animated:

I help where I can

Knowledge

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)I think I deserve a place in coders because I have a big part of my posts made in the VB.NET section! I think im a member High Quality Member. My english is not the best but I try as much as possible to write english. I'm writing this because I was already rejected by two groups because my english is not the best. I've been waiting long to a group like this is .. I do not have the money to create a group (3k?) When i get accepted i try my best to help out other members in the group.

Extra:

Thanks for reading my Application and I hope I will not be refused because of my english :P

Regards

I vouch for this guy, cool person and knows his stuff.

SoulZeh - April 18, 2012, 3:46 pm

Not sure if you are allowed people to vouch for you on a recruitment thread tbh.

Dube - April 18, 2012, 3:59 pm

I got into the group. I am very happy to be in it.

Prince of Persia - April 18, 2012, 4:00 pm

Name: Matin Nahvi

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 15

Languages you know: I'm used to the visual basic syntax and I know a little bit of visual basic. I know hardly any PHP/HTML. I haven't looked at any other languages much.

Languages you are fluent in:(coding, not spoken) I am not fluent in any language I do not copy/paste either. I always go around msdn figuring out how to do what I want.

Why do you want to be a part of Coders:

What is your experience in the field of coding/programming: I coded couple of things before. I helped with the development of my bitcoiner miner that I have made and also couple of other products.

If you do not have much experience, what is your willingness to learn/practice? I am very willing to practice, I want to major in computer science when I go to college.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

PHP

JS (Partially)

HTML

Languages you are fluent in: C/C++

C#

Java

PHP

HTML

Why do you want to be a part of Coders: Because I am really advanced at coding and it's like my hobby. I just love coding with all my free time. I myself spend most of my time just trying to code something new just because I'm into coding a lot.

What is your experience in the field of coding/programming: 4 Years - Advanced

If you do not have much experience, what is your willingness to learn/practice?: I will learn just about anything I don't know

Any past work/examples of your work?: (If you have them, post them, as this will greatly increase your chance of acceptance) <https://hackforums.net/showthread.php?tid=2413790>
<https://hackforums.net/showthread.php?tid=2372171>

What can you contribute to coders?: Good Support, Donations If Needed Later, Coding Classes / Tuts. I will also do free releases of source codes to let other people see the work / coding.

Why do you deserve to be a part of Coders?: Well, I love to code and with all my free time I literally just sit around coding and scripting. I am into coding just for itself not because I'm bored, I just love coding.

Extra: Im on about 10 - 16 hrs a day and i am also very friendly. if you need help or if any group members need help i am willing to help them with what they are trying to do. Coding is like my life. Im also very active on hackforums :D If there is a coding challenge i will accept is just for the fun of it.

Shibe - April 18, 2012, 4:15 pm

Name: Gerardo

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 13

Languages you know: HTML 1-5, CSS, And Spanish :)

Languages you are fluent in:(coding, not spoken) HTML 1-5, And CSS 1&2. Learning CSS3 Currently.

Why do you want to be a part of Coders: I'd like to help others out in this community with my knowledge and spread it around to others who are wanting to learn. Hopefully I can teach others and help others.

What is your experience in the field of coding/programming:I've had my time with HTML and CSS. I've been using them for about 1 year already.

If you do not have much experience, what is your willingness to learn/practice? I'm trying to learn PHP, Javascript, And CSS3 right now. I am a fast learner and will mostly learn by the end of this year.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I have a site, which is not finished, but here you go if you want to see some of my works. [My Site](#). Here are some other works.

<https://hackforums.net/showthread.php?tid=2282585> - XSS on Youtube \$500 Reward

<https://hackforums.net/showthread.php?tid=2141104> - XSS on accounts.youtube.com \$1000

Reward

Edit: Just got accepted into honoerable mentions for Google HOF again :)

What can you contribute to coders? I can help with website security, CSS, And HTML. I'll do my best to help others and post tutorials here and there.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I feel like I need to help others, because having knowledge to keep to oneself isn't cool, and I also feel that

Extra: I'm very good at web security. I've been on the Google Hall Of Fame twice, also waiting for them to approve my newest find. Look for SquirmyBeast and Gerardo.

Kyle FYI™ - April 18, 2012, 4:15 pm

Name: Kyle.

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 15, i'm mature most of the time but when i'm with my mates I mite let my hair down so to speak and have a little fun.

Languages you know:C#

vb.net

PHP

HTML

CSS

Languages you are fluent in:(coding, not spoken)PHP

HTML

VB.net

Why do you want to be a part of Coders:

Because I want to learn more about coding and I want to expand on what I already know and what better way then a group full of coders?

What is your experience in the field of coding/programming:

I have done a lot of work on hf and off hf, I have helped people out with php and other stuff like that. If you do not have much experience, what is your willingness to learn/practice? I try and code a full working project per week, just to stay on top of things.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

Umm not really on hf, my worm but I am in the middle of coding a scanning site. No where near done but i'll show you a screen shot. I don't want to post it publicly so pm me.

What can you contribute to coders? I will help people with what I know and just hope people will help me too.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)

Because I love coding, I have been interested in it for a long time. At start I copyed and pasted like a bitch, didn't know shit then I started learning when I got kicked out of school. Because I had a lot of spare time on my hands I learnt a lot.

Thelcyene - April 18, 2012, 4:28 pm

(Apr 18, 2012 04:40 PM)Phayzon Wrote: [\[CITE\]](#) Yeah guys, make sure you put a lot of content in to your applications. We also don't just look at your apps, we look at your background too.

This is also my 1000th post! :)Offtopic: congratulations! You must've been here a while.

Mr. Anderson - April 18, 2012, 5:02 pm

Finally this awesome group is official!

Incorporate - April 18, 2012, 5:06 pm

When do I get my group join?

Hydra - April 18, 2012, 5:08 pm

Name: Hydra

Age?If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 16 and Mature

Languages you know: HTML, CSS, PHP, Java

Languages you are fluent in:(coding, not spoken) HTML maybe, but that's all.

Why do you want to be a part of Coders: I want to learn how to code, I'm currently taking AP Computer Science which is a coding class in my school. I want to become more experienced in Java and get better.

What is your experience in the field of coding/programming: Beginner

If you do not have much experience, what is your willingness to learn/practice? Full Potential, I will put my time into learning how to code and practicing. I want to improve my skills and learn more. I have books on Java, C++, SQL, Python and want to learn and master these.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I used to have some very basic and small C++ Math Programs. And a basic VB.Net input output key program. Don't have these anymore, but I do have a few Java programs, but not compiled.

What can you contribute to coders? I can try my best to help with people who need ideas, coding help (if I can), or Graphics. I'm a GFX Designer and if needed I can help. Basically, I'll try my best to help with whatever I am capable of doing.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I have been in many groups, for example eminence and reverence. I didn't fit in the group because there was no place for me to truly learn and help out. I was the GFX Leader, and I did Graphics for the group but other than that nothing. I have been hearing lots of positive stuff about Coders and especially that they teach/help you learn. I've been told by a few members to apply, and when I looked over the application, I saw that Coders doesn't just code, but they also help out each other and teach. I am a active member for the most part, unless something comes up. I love to help and am interested in being in Coders. I deserve to be in Coders for the learning part but I do understand that there are other members who deserve to be in this group more than me.

Extra: Thank you for taking the time to read my application, have a nice day.

Chief - April 18, 2012, 5:54 pm

Name: James

Age?If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 15

Languages you know: HTML, CSS, PHP, VB.NET, little Java

Languages you are fluent in:(coding, not spoken) HTML Mostly

Why do you want to be a part of Coders: I want to further my coding experience level. Right now i'm pretty decent but i want to expand my knowledge in the subject.

What is your experience in the field of coding/programming: Decent/Intermediate

If you do not have much experience, what is your willingness to learn/practice? Tons. I want to grow in this subject as the possibilities are endless. You can make so much stuff with coding and i'm just touching the surface. I want to learn more in the subject of VB and PHP. hey both look like fun languages.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<https://hackforums.net/showthread.php?tid=2279121>

<https://hackforums.net/showthread.php?tid=2203667>

I used to code a while back.

What can you contribute to coders? I can help people with their problems on coding. i enjoy helping people set up their sites and stuff like this. I can offer GFX, Coding Help, and suggestions. I can post some tutorials I have made also.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I once ran an unofficial Coders group here on HF with some friends. I've always enjoyed coding and messing around with it. I enjoy coding programs as you can make almost anything and to see the outcome is amazing. I want to join to learn more about this. I want to help share my knowledge with the group and have them share theirs. I want to try and go further in coding and maybe have a job with it one day. I want to make a program tons of people will use and like it. I hope to learn the most I can while in the group and share it with others.

Extra: Thanks for reading.

Flamingo - April 18, 2012, 6:00 pm

I assume applications are open based on the thread unlocking, if not, by all means, shoot me a PM.

Name: Jordan (Or Flamingo, if you like animals)

Age: 19

Languages you know: (coding, not spoken)

PHP

HTML/HTML5

Ajax (currently reading a book)

C#/C++ (I'm working with IT and CS developers at ASU)

Languages you are fluent in:

PHP

HTML

C#

Why do you want to be a part of Coders:

I'm currently group-less, and the only group that seems fitting would be Coders, considering my long-lived interest. When you're as big of a fanatic as I, you really can't turn this opportunity down.

What is your experience in the field of coding/programming:

I've worked as a freelance developer and help manage an assortment of commercial networks on the side, as I am a student.

Any past work/examples of your work?:

h1de.net - killerping.com - zecure.org - whitehat.su (soon)

What can you contribute to coders?:

I can assist and lead development projects, contribute to already-existing scripture, and become a big part in community activity. The real question is what can't I contribute.

Why do you deserve to be a part of Coders?:

Considering my existing knowledge and interest in the field of computer science and IT, this is the group for me. Everything to say has pretty much been said above.

Extra:

I'm very active, friendly, and willing to help out others without looking for anything in return. If accepted, I will represent the group with a great deal of articulation and know-how.

Alside - April 18, 2012, 7:21 pm

Name:Alside

Age:15

Languages you know:Learning python and basic HTML

Why do you want to be a part of Coders:Because for year's I have been wanting to learn how to code and a few days ago I finally started then this group came and it seems perfect I can learn from members and hopefully oneday help members.

What is your experience in the field of coding/programming: None as I just started but really I am eager to learn and get experience.

If you do not have much experience, what is your willingness to learn/practice? Alot this is something I have been wanting to do for years so I will put 110% into it.

Any past work/examples of your work? Not really I made a code for fun that never ends I wanted I can post that?

What can you contribute? Coding wise not very much as I am new to it myself.

Why do you deserve to be a part of Coders?I think I Deserve to be part of coders because I am really into learning the art of coding and am willing to give my all to do so.

Extra: Thanks for reading my application.

.au3 - April 18, 2012, 8:39 pm

Yay! Just got back and seen the group is now official! Great group guys and thanks for choosing my userbar xD

G?dly - April 18, 2012, 8:59 pm

Name: Nolan

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 15, very mature.

Languages you know:

C++(Fluent)

C(Basic)

HTML(Basic)

Languages you are fluent in:(coding, not spoken) C++

Why do you want to be a part of Coders: Coding is a way to get yourself known in my opinion, although some coders that make world famous hits are hidden, some are superstars, that really inspires me. I want to one day be known on HF for being a great coder.

What is your experience in the field of coding/programming: 1 Year.

If you do not have much experience, what is your willingness to learn/practice? I am very willing, I

cannot wait.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

<https://hackforums.net/showthread.php?tid=1715326> (Basic Fake Virus)

<https://hackforums.net/showthread.php?tid=1711680> (HQ YT Bot)

What can you contribute to coders?

Tutorials/C++ Programming making help

Help with all the knowledge I know about coding

Learning and getting other coders names out there

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered)I think I deserve a place in coders because I have a big inspiration in coding, although I may not be the best I am willing to learn and possibly be the best one day! I plan to make myself and the Coders a truly respected group. I think I am a member extremely High Quality Member. I am also extremely active and will treat each and every member on HF with tons of respect, I post many times daily and just honestly think I will be a great addition to the group.

Extra:

Thank you VERY much for reading this application, have an 6R347 day! <3

Gook - April 18, 2012, 9:02 pm

Vouch for Godly! Very High Quality, he deserve it! :)

Regards

Haah - April 18, 2012, 9:41 pm

Damn, I wish I was in this group.

Hopefully I can apply soon.

.au3 - April 18, 2012, 9:45 pm

(Apr 18, 2012 09:41 PM).c. Wrote: [\[CITE\]](#) Damn, I wish I was in this group.

Hopefully I can apply soon.

Maybe if you are very HQ and are a great coder and can prove it you'll get invited.

Crypto. - April 18, 2012, 9:51 pm

Another pay-to-get-in group?

I hate seeing these groups for one reason, people donate (rich-ones usually) and get in then they don't know anything, think they're special and all that other crap. I would prefer a group which is really hard to get in to then a group which you have to pay for. I know you're probably doing this as you spent a lot of money on the group, and please don't take this in an offence, I just hate to see another group being that requires to pay.

LOL, people make groups paid because it costs \$3500 to make one. Honestly I don't see why someone wouldn't make it pay to enter, at least till they made a bit of their money back.

The paying to get in is only until we have enough gathered to pay off the rest of the group.

As soon as we do the only way to get in will be invite.

As with all members of Coders, no matter how you get in, you have to remain HQ. LQ posting in the subforums, and LQ posting on Hf in general will get you kicked from my group.

BaussHacker - April 18, 2012, 10:29 pm

This userbar is far better than the other you had before ^^.

Not sure if I was denied again or what, since I've received no PM? :d

It's not the point, if you're aiming to have a high quality group you're willing to pay everything yourself & have it all ready, not pay the \$1000 and ask for donations to get in. If you do that it's possible that you'll not reach the amount of how much the group costs and just cause confusion as happened to one of the groups before.

Foyet - April 19, 2012, 7:11 am

Name: Michael

Age:(If you're below 16, you will be expected to act in a manner that's up to par with at least a 16 year old) 16

Languages you know: Visual Basic .NET, C# (not much), PHP, HTML/CSS & Pascal.

Languages you are fluent in:(coding, not spoken) All of the above except C#.

Why do you want to be a part of Coders: Because I want to release all of my project as part of the crew and make them open-source. I'll release my personal snippets to help the members inside the group, and present a lot of different projects that the group as a whole can work on them.

What is your experience in the field of coding/programming: I'd say from 0 to 10, I'm above 7.

If you do not have much experience, what is your willingness to learn/practice? I'm always open to learn and practice, that's what makes a human being intelligent.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance) I don't have anything released as I think it would be abused, but I can show you my newest keylogger that I'm going to use it to make a tutorial for the group via PMs.

What can you contribute to coders? Snippets, sources and knowledge as the most.

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I'm not one of those people that think they know it all. I'm here to learn, practice, contribute and share my previous work. I'm not on top all other programmers, and I do not even think that I'm not close to being an Average coder, unlike the others that think they are pretty professional with copying sources and other stuff to their program and releasing it. I believe with a little work, everything can be completed, teamwork is a must though.

Extra: Nothing, just good luck to every coder that applies. P34C3.

Jamster480IsGay - April 19, 2012, 7:31 am

Bro let me in this group or I'll scalp you.

+ I don't understand why literally every group is becoming invite only. Come on, stop following others and be original ?

Because we have over 100 members.

We don't just invite friends, ect.

I watch the coding sections for skilled coders.

.au3 - April 20, 2012, 12:24 am

If you guys have any questions regarding the Coders or the Official Website please contact me. Honor has been pretty busy lately haha ;)

~HF~ - April 20, 2012, 2:19 am

yeh i wish someone would invite me i really want to learn about coding and VB like everything about coding :) im just hoping someone would invite me to the group i mean i would put a lot of effort in any spare time i have i would practise what i need to ect.. :D just hope someone invites me in cause i really want to learn about coding :D thanks

~HF~ - April 20, 2012, 5:13 am

No I know I was just saying this group would be the best place to learn coding and that if some day someone invites me to learn coding I would be more than happy to put in a lot of effort to learn :)

Infinit? - April 20, 2012, 6:05 am

Just donated some money to get into the group earlier.

Even though I might get kicked out some time, at least I know that I've helped pay the massive costs of the group.

Anyway I truly do hope the group lives up to its "HQ" expectations. I would really love to see the group do well, and want to learn as much as I can.

Super Scumbag - April 20, 2012, 6:07 am

As long as you remain HQ, you're free to remain in the group.

▣ **Nick™** ▣ - April 20, 2012, 6:09 am

I wish you good luck with the group. Nice to see a group about Coding finally.

Eeluminati - April 20, 2012, 6:24 am

You need to begin putting that effort and dedication in now, not after receiving an invite. You won't receive an invite with that kind of attitude. The Coders group is only interested in the dedicated developers of HF. Experienced or inexperienced, it doesn't matter. What does matter is your own initiative to better yourself.

That initiative needs to be shown to receive an invite.

Eeluminati - April 20, 2012, 8:45 am

Nichole - April 20, 2012, 12:52 pm

Hello, A am Duck Dodgers.

My age is 21.

A friend who's all ready in the group notified me and I figured I should apply. I think this would be a great opportunity to share and learn. I've been on hack forums for a decent amount of time, and I hang around in the C/C++ section. I have a well amount of C/C++ knowledge. I've learned a lot from the people there, as well as give back what I learned.

My previous works, I have probably hundreds of projects laying around. I don't do tutorial posts, because I don't feel that I would be fit for it. All though I have posted snippets of my projects from time to time explaining them. I have made C/C++ releases on here, as well as put them up on my channel on Youtube.

That is all for now.

Super Scumbag - April 20, 2012, 1:49 pm

I think you were invited.

Apply via UCP.

(NOTE!! if anyone else applies via UCP without my permission, im just going to say no, and you will have no chance of getting into Coders... ever)

Threadlocks - April 20, 2012, 2:51 pm

I sent you a message I'm interested in learning coding.

Eruditus - April 20, 2012, 2:54 pm

The group is outstanding. I'm glad to be a part of it, and I know from what I've already witnessed that it will help my progress while learning and motivate me more.

Washi - April 21, 2012, 2:19 am

Name: TheUnknownProgrammer

Age: 14

Languages you know: C#.NET, VB.NET, Native C/C++ a bit, Assembly a bit, HTML, CSS, JavaScript, VBScript, Batch, PHP a bit.

Why do you want to be a part of Coders: I was searching for a coders group for a long time but couldn't find a good and active one.

What is your experience in the field of coding/programming: I've coded for about 2-3 years and can create big projects. I'm working on a new .net obfuscator and AsmResolver, you can see it in my signature or you can click [here](#).

If you do not have much experience, what is your willingness to learn/practice? I always want to try and learn new things.

Any past work/examples of your work? I've made my own decompiler called [DotNet Resolver](#). It can read the MSIL of a .net application and convert it back to vb, c# and mc++. The program is also able to edit the application with MSIL but also with one of the highlevel applications.

I also have created my own native disassembler in C# without any external libraries etc. It's called AsmResolver. Check the development thread [here](#).

Also I've created the [Ascii Art Generator](#). It's an image to text converter that converts an image to a string of unicode characters.

[Window Control Panel](#) is also a little program i made. It can edit window properties.

What can you contribute? I can create applications and also teach people how to code in several languages. It doesn't matter if they are beginner or more experienced. I've taught some people how

to create a simple .net obfuscator and several other applications.

Why do you deserve to be a part of Coders? I'm pretty good at coding and I want to share with coders my applications and knowledge.

Extra: I hope i get accepted :D

MistaCode - April 21, 2012, 4:56 am

well i could be1 if you would accept me... i code (VB.NET, VB6, C++, PHP, HTML & C#) i don't post much PHP or other languages but VB.NET i do :)

Name: GetTheCode

Age: 16

Languages you know: PHP, HTML, Visualbasic, C++, Java little, C# & F#

Why do you want to be a part of Coders: because i earn to be on of them being a coder :)

What is your experience in the field of coding/programming: Visualbasic & C#

If you do not have much experience, what is your willingness to learn/practice? well you decide do i need to learn more or no?

Any past work/examples of your work? well haven't posted all here but some of my works are in HF

What can you contribute? Support, Tutorials & Help

Why do you deserve to be a part of Coders? Well i always wanted to be on a HF Coder group & i code actually much!

Extra: nothing more :)

I'm Retarded - April 21, 2012, 5:54 am

Name: Jay Collin

Age: 17

Languages you know: C#, VB.net, PHP, CSS, Lua and CSS

Why do you want to be a part of Coders: I want to be apart of the Coders because I am really running out of things to with my coding skills and I think that joining this community would make it more exciting I am not the best coder but I know my shit and is willing to learn more if I am required to.

What is your experience in the field of coding/programming: I have been coding for 3 years first started with VB.net and liked the idea of it then moved onto harder stuff such as PHP, Lua ect... I have been coding in VB.net for 3 years, 1 and a half with php, 2 years of lua and 1 year of css.

If you do not have much experience, what is your willingness to learn/practice?

Any past work/examples of your work? Yes I have many things made on my desktop I also released my binder on hackforums and have various over things on other forums.

What can you contribute?I could contribute tutorials, support and I reckon I could do alot more free services and give aways for normal members and upgraded.

Why do you deserve to be a part of Coders? I deserve to be a part of the coders as I have alot of experience with languages I could dedicate my free time on making programs, web pages ect... I don't want my 3 years of experience going to waste.

Extra: Not much really hope I get accepted and I love the userbar ;D

Phayzon - April 21, 2012, 8:52 am

Guys stop posting applications, applications are closed.

King_Cooper - April 21, 2012, 12:10 pm

Donated to buy membership, please pm me.

Lantec - April 21, 2012, 1:17 pm

I'm not a programmer but I'm willing to learn, would be interesting to see the tutorials your group can

offer.

▣ Nick™ ▣ - April 21, 2012, 3:13 pm

I find it funny that most of the people trying to get into this group are only going for the userbar. The people saying "I'm willing to learn blah blah blah", I can see almost half of them aren't really, and just have been posting in the Lounge instead of asking where to start and stuff. Just joining the group for the userbar and taking 10 seconds to look at HTML is not "willing to learn". Sorry I just had to get my 2 cents out there cause I find it sad really.

Super Scumbag - April 21, 2012, 3:42 pm

If you posted an application on this thread after we closed the applications, you have been denied, and barred from the group.

Eeluminati - April 21, 2012, 4:33 pm

(Apr 21, 2012 03:42 PM)Honor Et Veritas Wrote: [\[CITE\]](#) If you posted an application on this thread after we closed the applications, you have been denied, and barred from the group.

Well close the thread then man.... Just re-open once you are taking applications again.

Super Scumbag - April 21, 2012, 4:34 pm

(Apr 21, 2012 04:33 PM)Nifty Wrote: [\[CITE\]](#) Well close the thread then man.... Just re-open once you are taking applications again.

Can't. Not ub3r, so I can't re-open threads.

It's fine though, if you can't put in the effort to read the thread, then you don't need in. I've got that applications are closed in the OP.

Quad - April 21, 2012, 4:36 pm

I currently only code for the web, using HTML, CSS, Javascript (and jQuery) and PHP.

I know the basics of Visual Basic, but I don't really like it that much...

I want to become a more serious programmer and learn C++ (I've heard that's good).

Name: William (Quad)

Age: 15. (16 in August)

Languages you know: HTML, CSS, Javascript (and jQuery), PHP and some VB

Why do you want to be a part of Coders: To let people know that I'm a coder. I also like to help people, I would gladly help anyone who came to me and asked for help. Of course I'll also be looking for help from people in the group.

What is your experience in the field of coding/programming: I've made a lot of webpages. For example <http://browserbattle.net>, which I sold to Omni ? I've gotten better since I made that site.

If you do not have much experience, what is your willingness to learn/practice? 10/10. I always want to learn stuff asap if I'm interested in it.

Any past work/examples of your work? <http://browserbattle.net>

<https://hackforums.net/showthread.php?tid=2423716> <http://tf2lotto.net> <http://tf2itemvalues.com>

What can you contribute? Help people out by answering questions. Make tutorials.

Why do you deserve to be a part of Coders? Because I'm a coder that never gives up. I always help and I'm always nice to everyone.

▣ Nick™ ▣ - April 21, 2012, 4:37 pm

People seem to not read the OP and still post applications. ^

Quad - April 21, 2012, 4:43 pm

(Apr 21, 2012 04:37 PM)▣ Nick™ ▣ Wrote: [\[CITE\]](#) People seem to not read the OP and still post applications. ^

Woops sorry, didn't read the last two lines... It's 1:42AM here, I'm tired :P
Anyhow that sucks :(I wanna get in this group so badly :/

Eeluminati - April 21, 2012, 4:45 pm

(Apr 21, 2012 04:37 PM)▯ Nick™ ▯ Wrote: [\[CITE\]](#) People seem to not read the OP and still post applications. ^
Exactly, just close the thread.. So simple.

.au3 - April 21, 2012, 4:50 pm

Just take the "Applications" out of the title.

xxlittlebox™ - April 21, 2012, 5:48 pm

Well, all around I know mostly Java. Im currently on a mac, so I can't code languages such as .net. I have however been looking into languages such as PHP, Javascript, and CSS. I would like to join this user group because I can related the members. I currently do not have any major projects in the works. But for a bit of history towards my Java knowledge, I learned Java as a freshman in High school during a basic programming class. This class included 3 languages: Java, C++, and PHP. I choose Java because I could use that for android development. Im am extremely interested in this user group, I would love to join.

Subscription - April 21, 2012, 7:19 pm

Gotta say, im in coders and there is great community. Im glad that im part of us.

.au3 - April 21, 2012, 7:45 pm

This group is definitely worth \$25...

xor - April 22, 2012, 1:24 pm

i am interested joining the group.. :-) can someone explain me how this works, i am new at groups stuff

bobjon - April 22, 2012, 1:27 pm

(Apr 22, 2012 01:24 PM)'Conqueror~ Wrote: [\[CITE\]](#) i am interested joining the group.. :-) can someone explain me how this works, i am new at groups stuff

The applications are closed for now, but you can get in by donating I believe. ?

8bits - April 22, 2012, 11:27 pm

Would of loved been in this group, oh well.

I hope this time, the "coders" group won't be a bunch of noobs (who don't really know how to program that well) like it was last time.

I wish you luck guys.

Rhynorater. - April 23, 2012, 12:52 pm

I would really like to be in this group. I mastered Python and have a great reputation in that section and I am now learning C++.

-Rhynorater.

Callum. - April 23, 2012, 2:53 pm

Hmmm id really love to join this group.

Help people out with what ive learnt on minecraft coding :)

Super Scumbag - April 23, 2012, 4:28 pm

(Apr 23, 2012 04:27 PM)Hacker16 Wrote: [\[CITE\]](#) Name: Tad

Age: (If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) 17 (will be 18 thi year.)

Languages you know: (coding, not spoken)

C/C++ (Alittle bit)

C#/vb.net (Alittle bit)

PHP

HTML

Languages you are fluent in:

PHP

HTML

Why do you want to be a part of Coders: Because i really like coding and its like my hobby. I love coding with all my freetime. I myself spend most of my time just trying to code something new just because im into coding alot. I want to get most experience.

What is your experience in the field of coding/programming: 3 Years

If you do not have much experience, what is your willingness to learn/practice?: I will learn just about anything i dont know, and help more people learn also.

Any past work/examples of your work?: (If you have them, post them, as this will greatly increase your chance of acceptance) I have no released anything yet. im coding now to release some productson HF.

What can you contribute to coders?: Good Support, Donations If Needed Later, Coding Classes / Tuts. I will also do free releases of source codes to let other people see the work / coding.

Why do you deserve to be a part of Coders?: Well, i really love to code and with all me free time i just sit around coding. I am into coding and learning new things.

Extra: Im on about 10 - 16 hrs a day and i am also very friendly. if you need help or if any group members need help i am willing to help them with what they are trying to do. Im also very active on hackforums. i want to learn more, and to take codeing challenges.

Denied.

Applications are closed.

You are now barred from entrance.

Percocet - April 23, 2012, 5:50 pm

I can't wait for applications to open back up. I think I might have a shot at this. Anyways, until applications open back up, good luck to you guys with the group.

?us?ness - April 24, 2012, 12:38 am

Groups like these are soooo stupid "Hey pay to get into a group about coding when you prob dont know wtf dim or system.out.print means..."

IceFighter - April 24, 2012, 3:14 am

Didn' know applications were closed.

8bits - April 24, 2012, 6:05 am

(Apr 24, 2012 12:38 AM)System.out.println Wrote: [\[CITE\]](#) Groups like these are soooo stupid "Hey pay to get into a group about coding when you prob dont know wtf dim or system.out.print means..." Yeah, most likely. If I was or "legit" coder wants to run a real coder group, they would yes make an application - but in that application there needs to prove that they are a real "coder". A portfolio, or a Github would be perfect. After that I'd send them a message of a puzzle or some sort that asks them to do something in the favorable language. Like the famous fizzbuzz.

+Awesome - April 24, 2012, 6:09 am

Look who got thee 500th post in this awesome thread. Buy in now guys. ?

bobjon - April 24, 2012, 6:47 am

Not only have you failed to read the original post in this thread but you also have clearly not bothered reading the many other recent posts regarding the closing of applications. This alone will get you barred from the group, but by looking at your proclaimed skill set, I dont think you will get in from that either. None of your 300+ posts have been made in any of the programming sections, let alone in the few sections that you apparently have knowledge in; namely the PHP, JavaScript and Website Construction sections.

(Apr 25, 2012 10:49 PM)xhorntail Wrote: [\[CITE\]](#) We aren't interested in giveaways in the name of the group. We are interested in people who are dedicated to coding, not only teaching, or writing applications, but also learning. We aren't interested in people joining for the userbar, we want high quality people in our group.

You are hardly in a position to state that when you yourself have not made any effort to even make a single post in any of the programming sections; but rather you prefer to post in the lounge and free giveaways sections.

Miami - April 26, 2012, 9:50 am

i updated my thread btw i dont really post in the web design section here beacse Web Design is my Actual job and i kinda Separate Job from hacking

8bits - April 26, 2012, 9:53 am

If you guys are invite only. I would love one.

I can only base my opinions on him by his Hack Forums profile because I do not know, nor speak to him via IM/PM. I'm not judging his knowledge based on his join date, but rather by his post activity and quality of posts; which by the looks of it he would rather post in sections such as the lounge and free giveaways rather than sharing his knowledge in the coding sections.

I would never judge someone on their coding / hacking ability by the post activity. You can be smart and just join this forum. Even though I have over 200 posts in the Coding section and can code, you still shouldn't base it over post count in a particular section.

You're correct to a certain extent; however if I am to make an opinion about someone, then I have to base it on something. And post activity seems the most reliable factor because it shows where said person spends their time on the forum and where they help most. Though it's probably not the most helpful variable given xhorntails post count; I still have every right to question his capabilities that others have proclaimed regarding his knowledge/abilities, if I still have yet to see any proof of this.

On another note; people who have repped him have not exactly left helpful comments regarding his abilities, hence why I used post activity instead.

ANDREW - April 26, 2012, 4:23 pm

Im trying to learn alot more also maybe it could help me alot more.

Bassline - April 26, 2012, 6:45 pm

I would like to apply because i Am both professional at HTML And php. although i dont code much these days i feel that i would fall into this category pretty easily I do have old work where ive coded my own stuff, but it was on another computer.

thanks.

i'd like to join the coders group.

i'm pretty well known in the php forum.

here's an example of my work

www.pictureunrelated.com/collabowriter

look at post activity on my profile, and then look at all the php posts lol.

Josh - April 30, 2012, 10:22 am

I would love to join the group but i am new to coding. I am in my second semester in college going. This is my first semester with my major being Computer Science and im loving it. My knowledge is very limited but my mind is unlimited. I am willing to learn ANYTHING that can be taught to me and i put 100% effort into my work. I am very compassionate about computers and would love to make a living working on computers one day. I doubt this will get me in, but if it does i promise i will use every resource i can to obtain information and help expand others knowledge in the Computing field.

Thanks,

Josh

Richard. - April 30, 2012, 5:01 pm

I agree, and some people were setting a bad name for the group. I don't think it was necessary to kick everyone though.

Reptar ? - May 2, 2012, 2:16 pm

I Really want to join as a Learner because I want to be able to Code my own things and Make programs to help people coding also opens meany paths I Could start with coding basic things then get more and more advance as I go My one friend coded a Skype spam tool that sends 1000+ messages every 30 seconds he coded it all by himself and I would love to be able to do something like that one day and joining coders would create more chances for that to be possible I will dedicate as much time as I can everyday to learn how to code and if I do make it in I will teach others what I know and do giveaways of things that I code later in time .

Thanks for Reading

Yours Truly,

Try

Sorry if I Made grammar or spelling mistakes

EKNOZ - May 2, 2012, 7:12 pm

Well i was very HQ and did a free giveaway, but the thing is bro they felt as if there were LQ posters and they wanted to clean because of LQ posters and people that joined just for the userbar. I Re-Applied and im waiting, just give them some time, its well worth the wait trust me :D .

I rally Hope i Get Back In But For All Users Be Chill :D

- EKNOZ

Bassline - May 4, 2012, 12:18 am

I was kicked out recently can i come back in??? i was active.

d4rkj4y - May 4, 2012, 2:46 am

I would love to join coders if you gave me the opportunity.

- I am highly active in the C++ section.
- I have been learning C++/C for over a year.
- I will be attending the International Olympiad in Informatics (IOI) this year and next year, representing New Zealand which will be held in Sirmione, Italy, and Brisbane Australia respectively.
- My programming books (physical books, as a token that I am actually serious about learning...) Spoiler ([Click to View](#))
- Programming Windows®, Fifth Edition (Microsoft Programming Series)
Charles Petzold
- Programming Applications for Microsoft Windows (Microsoft Programming Series)
Jeffrey Richter
- The C++ Programming Language: Special Edition
Bjarne Stroustrup.

I attend regular competitions, this weekend for example will be competing in teams and solving algorithms for 5 hours.

I find programming extremely entertaining and it helps me with other subjects in school such as calculus, english (suprisingly), algebra, and of course computer science.

My main goal is to become fluent with C++/C, learn Assembly, get better/more efficient at solving algorithms in C++, and learn the Win32 API thoroughly.

Thanks for reading :)

St?rm - May 4, 2012, 6:13 am

Why I want into Coders:

I want into coders because I really to love coding things and want programing to be my second job when I'm older and I would like to help other people learn how to start programing and if I get accepted into your group I will be active as much as I can.

Languages I know or am trying to learn about* Vb.net Java
C#

I cant post any of my work cause I lost most of it ? , sorry.

Hamware - May 4, 2012, 6:43 am

Lol, I think I posted my application on the wrong thread here It Is:

I think I deserve to be In the group, As I've recently got Into coding. I'm currently learning C# & C++ people say that's the languages I should start off.

What I basically want to do, Is expand my knowledge In this so I can be a better coder, Also I hope to improve my skills. I'm not going to chatter about

how I'm amazingly good, Cause I'm not I'm just a beginner trying to learn.

Thanks for reading,

?

bobjon - May 4, 2012, 6:56 am

Vouch for EKNOZ, he was a HQ member when he was in the group. ?

Isolate - May 4, 2012, 8:08 am

About me: I would hope I am a pretty laid back guy. I tend to not get involved in other peoples matters unless I am involved in it. I am a stern believer in respect and I feel that if I give respect then I will be returned and equal amount of respect. I find that I differentiate myself from others because I act extraordinarily similar to how I do in real life. I will always treat others how I would like to be treated which is a trait I wish many others (especially on the internet) would follow.

Reason why I want to join: I would be great a student. I'm decent with HTML, and am familiar with CSS. I'm currently learning VB.net. I would love to join because I enjoy being in a community where we have something common, and learn from others to later teach that information to my students.

Why I deserve to join: I might not be the most experienced person to be recruited, but I am someone that will be loyal and wear the Coders userbar with pride. I'm a nice and HQ forum member, and would love to learn and share in this group. All in all, I think I deserve to be put in this group.

Looobe - May 4, 2012, 8:29 am

Name: Jake

Age: 17

Languages you know: HTML, CSS, Javascript, Ruby

Why do you want to be a part of Coders: I want to be a apart of a group that is full of people with similar interests to myself, this will be a huge spark in inspiration and progress my knowledge further, I've been developing websites and web applications for nearly two years and I'm learning new things in my work every day.

What is your experience in the field of coding/programming: I've had two years in coding experience working with developing websites and web applications, I pride myself in my work and believe myself to be a very accomplished website designer/developer.

If you do not have much experience, what is your willingness to learn/practice? As I've already stated, my willingness to learn and gain knowledge is forever growing, I love to read and soak up everything, you can never know too much and knowledge is power, the more I know, the better and more advanced my websites and web applications become.

Any past work/examples of your work?

<http://jakeneil.com/>

<http://pure-madness.co.uk/>

<http://antegaming.com/tomo>

<http://banditnetwork.net/>

<http://ms.banditnetwork.net/>

What can you contribute? I can contribute my knowledge of HTML, CSS, Javascript and Ruby, I can help new less able members to the group who are willing to learn, I can contribute my time and dedication towards the group.

Why do you deserve to be a part of Coders? I deserve to be apart of the coders because I think the dedication, time and effort I've put into learning what I know reserves me a spot for such a direct group at what I revolve my life around, everything I do has some type of tie to coding.

Extra: I've nothing really extra to say, I just hope you find my knowledge and skills so far up to standard to be accepted.

Edgar Allan Slow - May 4, 2012, 9:28 am

I would really appreciate joining this group because about a year and a half ago I started trying to learn coding. This urge to learn coding started when I first saw [PURP](#)'s Youtube bot. Even though I now know that the bot that he made that got me into coding was really simple, I still find coding to be pretty amazing. (It was his first youtube bot, I believe it was gray goose booster?)

Anyways, after I wanted to learn coding, I started spending some time on my own learning how to code with tutorials in the visual basics .net section. I started coding little projects for myself such as a facebook account creator (60% done, I got bored and got rid of it), a twitter account creator (100% done, gave up when no one wanted it), and a youtube account creator (70% done, never learned how to bypass the SMS verification.) After I was done with those bigger projects compared to what I started with, I gave up on coding for a few months still wanting to learn more.

After that break I started to learn some simple java using eclipse, then I went into coding some simple minecraft mods. These mods were just some simple blocks, biomes, and making mob x spawn when mob y dies, etc. I'm not making any big projects for a minecraft mod, just simple stuff. This is going to be what I'm doing until I take a coding class at highschool next year.

So that's about everything, I've learned simple parts of coding and I've done some projects, and I'm going to be learning a lot more in a high school class.

Ron. - May 9, 2012, 1:12 pm

Well, Im Glad theres no set template for this, it allows more flexibility in my application, I want to start off with an introduction, My Name is unusual, I am 15 years old and a sophomore in high school, Im a chill guy, and I dont tend to start shit with others, as im hoping everyone here wouldn't. I enjoy coding in html and vb.net, yet I know some of other languages. (Some PHP and im learning

c#).

I want to join Coders because I LOVE learning new things, and I also like sharing what I know. It would be awesome to know I had supporters who could help me when I needed it as well. Im a Dedicated Member, and im Available most of the time.

Im Probably Not the Best Coder Out there, but Im a fast learner, and have a bit of time on my hands when Im not at school, time that I could be using to provide support. I tend to post a wide variety of tutorials, hopefully some I can share with just this Group :), Ill Provide a list below.

<https://hackforums.net/showthread.php?tid=2375218>

<http://www.vsprogramming.com/applications/zinc-advanced-keylogger-2/>

<http://www.vsprogramming.com/applications/ip-stealer/>

What can you contribute? I can share source codes, exclusive products and make tutorials.

Why do you deserve to be a part of Coders? I'm just trying to help the community.

Extra: Have a nice day !

Novalty - May 9, 2012, 5:48 pm

Hey,

I'm Tom. I am 18 years old and currently study a computing degree at university.

In the past I have dabbled with C++, Java, VB6, and Python, but what I really took a liking to is PHP, HTML, CSS, and jQuery. I have also been studying VB.NET at university for the past year. I am hugely interested in web development and have been for a couple of years.

As you can tell from my rep I enjoy helping others out where I can, and I do this mostly by providing PHP support, but my knowledge does go past just that.

I am very interested in further developing my skills in web development and programming, but also in general logic and problem solving. I am always looking for a new and interesting project to take on and I think this kind of group could really help me with that.

You can check out <http://inspired-dev.co.uk> for a fairly simple website I made a while back, but for more up to date and higher quality stuff then please let me know.

I do not wish to share links to more work publicly as most are hosted on my personal computer, and I'm sure you can understand if I am cautious of handing that information out publicly here.

Thanks for reading and I hope that you feel I am eligible for a place in this group.

Novalty.

vive facile - May 10, 2012, 7:23 am

Application

About me: My name is Matt (if you couldn't figure) and I'm 23 from New York. Computers have always been a hobby of mine since my Mom brought home our first computer running Windows Me. After breaking a couple of computers I finally started learning how to fix them. After my interest was ignited, I took my high schools only computer science class that didn't involve html, or learning how to use Word and PowerPoint, and learned some Visual Basic. Before the semester was over I had ordered C Primer Plus by Stephen Prata, and that is where I say it all began. After high school I went on to the local community college studying computer science and computer programming in C++. Unfortunately, family issues forced us to move, and getting back into school has been a big issue since. But alas, I have never stopped learning, and I always try to teach.

Knowledge Base:
Netwide Assembler

C/C++

Java

Linux

Windows

I'm familiar with many other languages like perl, python and html

Currently Working on:
AS400

Report Program Generator language

Learning more C++

A full learning center for beginner programmers (this is to profit off of, to help go back to school)

What I have to offer: I have a good amount of time racked up learning C and C++, and I'm familiar with many of the ins and outs that confuse beginners... like error messages. I can teach, learn, and contribute to projects.

What I'm looking for: I'm looking to find a group of serious hobbyist programmers. I'm at a point where the projects I would like to create are too cumbersome for 1 programmer. I would love to produce some open-source applications.

Example programs: I share most of what I make here at some time or another. e.g.

Modesty - May 10, 2012, 9:24 am

Haven't been round the groups section of HF, but thought I might as well put an application towards

this and possibly my presence in the group will further it's advancement and progress. Just a little bit about myself...

I'm currently attending college and as my A levels I took Mathematics, Physics, Computing and Art. (FYI I attend one of the top grammar schools in my country, England, and being accepted into their sixth form requires you to be in the top 5% cohort of the country's population in terms of academic excellence.). As you can see from my choices, I've picked very mathematics-orientated subjects..and then you might ask, why art? Well, as a freelance web-designer I can utilize the concepts about design and object placement in art when designing websites for a multitude of clients. I'm hoping to finish my courses with straight As and A*s, giving me the opportunity to get accepted into some of the top universities in the world - Cambridge/Imperial/UCL where I'll be studying computer science.

Notable Work:

Software

-> ClientMesh RAT: www.clientmesh.com | <https://hackforums.net/showthread.php?tid=2235212>

-> Choopd www.choopd.com | <https://hackforums.net/showthread.php?tid=1833652>

(A popular screenshot sharing tool, unfortunately I can no longer afford to pay hosting bills and so now somebody else is managing the project, using my source.)

-> ClientMeshWeb - Currently in progress, read about it here:

<https://hackforums.net/showthread.php?tid=2290823>

-> Song Downloader: <https://hackforums.net/showthread.php?tid=1162746>

-> Album art retriever:

<http://crushedpixel.deviantart.com/art/Automatic-Album-Art-Finder-203482005>

-> IP & Location tracer: <https://hackforums.net/showthread.php?tid=852131>

-> File Shredder: <https://hackforums.net/showthread.php?tid=638153>

-> Network connections monitor: <https://hackforums.net/showthread.php?tid=506426>

You can also check my threads for all my little releases and such.

Web-Design & Web-Applications Development

www.strokenine.com - My Web-design and Software Development Agency

www.noiserush.com - An active community for new music artists

www.sol-space.co.uk - Online gallery for a multitude of artists

www.ashleywest.co.uk - Portfolio for Artist

www.suruchibarnet.com - Old website for a restaurant

All sites are programmed from scratch by myself and all utilize a huge amount of back-end programming (php + mysql) (excluding the restaurant's site)

Currently in development:

- Website for a high end clothing company which will be known as Lilly Li

Right so why do I want to get into the coders group? Well, I regard myself as having a substantial amount of knowledge on languages such as c# and vb.net as well as languages used for web-dev,

e.g. HTML, PHP (SQL knowledge too), JS etc..so with all this knowledge I believe that I can give a lot to the group, and as said before, help it progress. I'd love to do collaborative projects.

Also, only a fool would ever tell them self that they've learnt enough. There's always space to learn, and I'd probably enjoy learning new tips and tricks within this group. Always fun to have a new userbar, too.

cadanc3 - May 10, 2012, 11:36 am

I would like to join. I have already been a member (till the big group kick-out) and felt as a contributing member. I have ~5 years experience in PHP and HTML and I want to continue helping members and providing exclusive tutorials.

I can't name examples of my work off hand, but Honor Et Veritas has seen some and if you look through my post history, I've made quite a lot in the PHP section.

Thanks.

Gr0wlit - May 10, 2012, 12:10 pm

Name: Gr0wlit

From: Italy

Age: 18

Some my works:

<https://hackforums.net/showthread.php?tid=2253424>

<https://hackforums.net/showthread.php?tid=2441064>

<https://hackforums.net/showthread.php?tid=2176508>

<https://hackforums.net/showthread.php?tid=2152981>

<https://hackforums.net/showthread.php?tid=1827223>

<https://hackforums.net/showthread.php?tid=2124988>

<https://hackforums.net/showthread.php?tid=2116165>

<https://hackforums.net/showthread.php?tid=2095702>

Why i like to join:

I'm here on HF from about 1 year, and this is the second group that i really like and i want to join. I can offer my knowledge, but i really want to learn from those people know a lot more of programming language. Hope you can accept me!

0xStack - May 10, 2012, 1:16 pm

Hi, I have recently seen a lot of members in the coders group and it sounds pretty cool and there are a lot of good, knowledgeable coders in the group. I can contribute to the group, my PHP & MySQL knowledge. I currently have two websites:

www.phpal.in (need to update soon)

and

www.salazar.tv

A lot of my works are on phpal, but I have also posted a number of things here that I didn't want on there:

my one click config file grabber and auto MySQL dumper:

<https://hackforums.net/showthread.php?tid=2203152>

-this tool could be setup to use MyBB databases for example and do a mass dump of multiple.
<https://hackforums.net/showthread.php?tid=2030665>
-project I did with a VB coder (semi-game like/learning experience)
<https://hackforums.net/showthread.php?tid=2152192>
-MW3 sig generator, never developed it further to look better/more for me to learn about the GD lib.

Other than that I am do a lot for a site called:

www.oddfuturetalk.com

(might mean something to you if you know what odd future is)

Other notes:

I am currently residing in the USA, age 17.

Phaxol - May 10, 2012, 4:03 pm

This is my official application for this group. Let me start off by saying that my posts right now are not that HQ, that is because I have not been that active because of being away a lot. I am here for good now though, so expect a lot of HQ posts from me. I am a experienced coder in a bunch of languages. Here is a list of what I think I am best at. VB.NET

C#

JAVA

BATCH

SQLi

XSS

LFI

RATTING

SOCIAL ENGINEERING

DISINFECTING SYSTEMS

I still don't consider myself to be a "hacker"; as I am still striving to learn about computers. My search for knowledge really never ends. I have skype if necessary. Thank you for taking the time to read my application. I hope to get accepted.

Nash - May 10, 2012, 6:24 pm

I'm really good with Java & I even have my succesfull sales thread going for my driveby:

<https://hackforums.net/showthread.php?tid=2483200>

I'm also coding my crypter in VB6 which will go up in the marketplace pretty soon. Anyways i'm really active with no warning level or negative reputation.

If you want to know more about me feel free to ask.

Social Engineer - May 11, 2012, 8:22 pm

I sent you a pm regarding a query I had, still waiting for a reply, Thanks.

Han. - May 12, 2012, 8:45 am

(May 10, 2012 07:23 AM)mattymatt Wrote: [CITE](#) Application

About me: My name is Matt (if you couldn't figure) and I'm 23 from New York. Computers have always been a hobby of mine since my Mom brought home our first computer running Windows Me. After breaking a couple of computers I finally started learning how to fix them. After my interest was ignited, I took my high schools only computer science class that didn't involve html, or learning how to use Word and PowerPoint, and learned some Visual Basic. Before the semester was over I had ordered C Primer Plus by Stephen Prata, and that is where I say it all began. After high school I went on to the local community college studying computer science and computer programming in C++. Unfortunately, family issues forced us to move, and getting back into school has been a big issue since. But alas, I have never stopped learning, and I always try to teach.

Knowledge Base:
Netwide Assembler

C/C++

Java

Linux

Windows

I'm familiar with many other languages like perl, python and html

Currently Working on:
AS400

Report Program Generator language

Learning more C++

A full learning center for beginner programmers (this is to profit off of, to help go back to school)

What I have to offer: I have a good amount of time racked up learning C and C++, and I'm familiar with many of the ins and outs that confuse beginners... like error messages. I can teach, learn, and contribute to projects.

What I'm looking for: I'm looking to find a group of serious hobbyist programmers. I'm at a point where the projects I would like to create are too cumbersome for 1 programmer. I would love to produce some open-source applications.

Example programs: I share most of what I make here at some time or another. e.g.
<https://hackforums.net/showthread.php?tid=2279369&page=2>
Vouch for mattymatt. Good programmer and HQ member.

Achromat - May 12, 2012, 10:54 am

Greetings & Salutations,

I'm a long time HF member and wish to join the official Coders group. My name is Khalid and I'm 22 years of age, I was raised here in Canada and always had a strong passion around the programming and web design range, I program with multiple languages including but not limited to, html, php, java, python, perl, ruby, along with the C# family.

Joining this group will give me the opportunity to meet more great coders, making new friends, and sharing my talent with the rest.

Below are some of my programming and requested tutorials:

Python Programming Tutorial - Numbers & Math Calculations

<http://www.youtube.com/watch?v=boXDSOJ2ONg>

Python Programming Tutorial - Variables

<http://www.youtube.com/watch?v=8Fc7e3En1Qs>

Python Programming Tutorial - Modules & Functions

<http://www.youtube.com/watch?v=PJN79ENz2Xk>

Python Programming Tutorial - Save & Execute Your Program

http://www.youtube.com/watch?v=6dfBes3eh_4

Python Programming Tutorial - Strings & Escape Characters

<http://www.youtube.com/watch?v=iwBWxZi22Gc>

Shu7down - May 12, 2012, 5:48 pm

I'm interested in joining this group. I have created much products, like Batch Virus Creator , Virtual OS, and much more. My current work is hard hitting ddoser. I code in VB.NET also. I have coded a crypter too. But it is not FUD . I'm trying to find methods on Re-Fuding it :D

I hope I will get accepted

1337B345T3R - May 12, 2012, 6:55 pm

Name: Jonte/1337B345T3R

Age:(If you're below 16, you will be expected to act in a manner thats up to par with atleast a 16 year old) I am 15 years old and quite mature for my age!

Languages you know: VB.NET

VB6

PHP

C#

C++

HTML

Languages you are fluent in:(coding, not spoken)VB.NET

VB6

HTML

Why do you want to be a part of Coders: I want to join the Coders mainly to teach other people how to code as I already have a lot of people messaging me on HF asking if I can help them out on a problem or specific area of learning. I want to spread my knowledge around the forums by releasing tutorial threads, source codes and coding services.

What is your experience in the field of coding/programming: I have quite an advanced knowledge of Visual Basic .NET and VB6. I have many programs that I have coded over the years using those two languages primarily. I also do know a bit of PHP as my second language, although I do want to extend my knowledge with PHP as I will expand more on in the next paragraph. I have been coding for around three years now and I have no will to stop anytime soon! Coding is my passion as I am sure it is yours too. Coding just gives me a massive sense of achievement when I figure out a solution to my own problem, or finish a massive project that I have been working non-stop on like my life depended in it!

If you do not have much experience, what is your willingness to learn/practice? I wish to learn more PHP as it is a language that seems so enticing as you can do so much if you know the language! I have seen some pretty neat things coded with PHP. I am already very advanced in VB.NET as you will see below from my current projects and products.

Any past work/examples of your work?(If you have them, post them, as this will greatly increase your chance of acceptance)

[Elite Stresser](#)

[Elite Auth](#)

[Elite Recovery](#)

Elite MP3 (Junked by Omni for illegal music downloading :P)

Projects I am currently working on: YouTube bot

R.A.T

DDoSers

Chat System

Booter Source

ETC..

What can you contribute to coders? I can teach people a vast amount of skills involving all different types of coding languages, namely VB.NET as I am quite fluent with the language, and find that I enjoy teaching other people code very much! I quite often find that I learn a lot myself from teaching people and that is why I enjoy it so much. I will also make some coding tutorial threads for beginners, intermediates and of course people that are already advanced with the language and that want to take it to the next level!

Why do you deserve to be a part of Coders?(This is a highly prestigious group, and requires dedication. If you do not fill out this spot, you will not be accepted, or even considered) I definitely feel I deserve to be a part of Coders because of my vast coding knowledge. I have the ability to always lend a helping hand to all my fellow HF buddies! I have done a lot of coding work for people over the years, mostly work for the kind people of Hack Forums. I have coded many projects in my main language, Visual Basic .NET, many finished like Elite Stresser also many unfinished projects that I am working on now, most of which are listed in the above! The Coders looks like a great up and coming group and I would quite honestly be proud to be a part of such a fine looking group. I believe that the coding section of Hack Forums would really appreciate my commitment to the hobby I love so dearly, I will make sure to submit my best work in all that I do, may that be whilst writing up tutorials, doing some coding work for someone or just messing around with my codes.

Extra:

I started coding a few years ago when I started taking interest in programs and wondering how they worked. It was when I saw Cybergate R.A.T that I just thought to myself "Hey, I really want to make something like that!" from that point onward, I decided to teach myself through video and of course text tutorials all over the internet and eventually I gathered up a vast knowledge of the Visual Basic .NET coding language that I had learned to love oh-so much! Thank you so much for reading through my application for the HF coders, I do hope that I get considered for this group, it looks very promising and enticing! Good luck to all the other applicants as well, you have my best well wishes!

- 1337B345T3R

Esanity™ - May 12, 2012, 7:16 pm

Name: James

Age: 15, I am quite intellectual and mature for my age.

Languages:

HTML (aware this is a mark up language, just trying to be useful.)

Learning Java

Why do I want join?

I want to better my understanding of the vast languages to better myself and my community. I would use this knowledge to further myself in a career in coding websites, and possibly create video games, which has been a goal for myself for quite sometime.

Contribute:

In reality I cannot contribute much that has not already, most likely, been given. However it is in my personality to exceed in whatever I do, therefore I will stride to excel myself in all areas of the HF and Coders community. I am also a level headed, and genuinely nice person who contributes with HQ posts an whatever

else I can.

Why I deserve to be apart of this prestigious group?:

I am someone who prides himself on knowledge, and the will to learn. I feel that his group would be a remarkable collection to my library of knowledge, if of course, you are willing to take me on. I also gain satisfaction in helping others. Learning from this group would enable me to do far more for HF, and that is a main reason I would like to be apart of this esteemed group.

Extra:

Thank you for reading my application, I hope you are willing to give me a chance. I know I would be an excellent member and would become more activate as I learned. I would also like to make it clear that I have not spent much time in the coding section, simply because I haven't had anything to contribute and am lost in terms of where to start. I know that being a person who loves to learn that this group will be perfect for me, and I would be able to make some contributions as I go.

Thanks in advance.
Sincerely James.

Continuum™ - May 12, 2012, 7:28 pm

Name: XeonComplex

Age: 21

Languages you know: VB,C#,C++,.NET and some other lang

Why do you want to be a part of Coders: Well, i want to learning and showing me skills and share source code.

What is your experience in the field of coding/programming: Well, ive coded me owm worm and crypter busy with coding a RAT.

If you do not have much experience, what is your willingness to learn/practice? Well i have some experience but i will put in all my effort to try and learn more so im become a better coder!

Any past work/examples of your work? Well, ive coded me worm you have see me show Honor Et Veritas on join.me ^<^

What can you contribute? I can teach people how to code .NET and get money from your bots fast/easy and im also a good active member!

Why do you deserve to be a part of Coders? Because i really learning more about coding and showing me skills

EKNOZ - May 13, 2012, 3:37 am

Vouch For Honor El Veritas. His group is awesome and really hq, supportive, and helpful.

- EKNOZ

Vuln - May 13, 2012, 6:47 am

I would like to join this group. I recently heard a lot about it and I guess I meet the requirements.

I am nineteen years old and I'm following a law-related education in The Netherlands. I don't have a

lot of spare time, but when I do, I usually spend my time on coding. I have been coding for about 4 years and I'm releasing -free- projects more often now. I know the basics of VB/C++/Java/PHP/ASP.NET but I mainly code in C#.NET.

Here are a couple of my releases (most of them not on HF though):

Simple Bind (open source advanced binder):

- http://www.youtube.com/watch?v=hOZW3u_MFEo&feature=youtu.be&hd=1

MPB (highly customizable phisher-generator, used by a lot of people):

- <http://upit.cc/i/7dedca20.png>

- <http://upit.cc/i/51707314.png>

MNC (generates sql scripts, used by various WoW private servers):

- <http://upit.cc/i/0ae0b2d9.png>

Blobkit (malware generator tool)

- <http://upit.cc/i/18cc13bd.png>

Facebook Client:

- <http://upit.cc/i/1d992660.png>

Accounts Panel:

- <http://upit.cc/i/06185462.png>

And a lot more...

Besides releasing tools, tutorials and projects I'm also eager to learn from others and share ideas, experiences or even work together on projects.

Kind regards,
Tom

AmlRight - May 14, 2012, 2:39 am

I'll be filling out a application later on, hope you can resolve the hacker problem.

Vinnie - May 14, 2012, 8:03 am

I've got to know the owner quite well now and I thought about applying. This is definitely something that I do in my spare time. Proof will be listed below. This thread made by me ShadowCloud and bugga involved SQLi and XSS and it's ways to keep safe from it.

<https://hackforums.net/showthread.php?tid=2464318>

Here is my software.

[img]http://screensnapr.com/e/gENBtZ.png[/img]

And here is the eBook I learned off.

[img]http://screensnapr.com/e/8sskqi.png[/img]

Ramisme - May 14, 2012, 12:49 pm

I've wanted to join this group for quite a while now and now that the applications are open again, I'll apply as quickly as I can before they close.

The programming languages that I know are Python, C++, and Java. I've been coding in total for about four years starting with Python. I wrote a few programs in Python including a simple Magic 8 Ball style game that randomly gave you messages when clicking the "roll" button. It was very simple, but one of my first programs.

I later got into C++ and have the "C++ How to Program 7th Edition" book for that. I didn't really get much into C++, but I have thought about going back and learning just for the sake of knowing the language.

I recently started to code in Java when I got into Minecraft. I do code Minecraft clients, but I make sure to code it in a more organized manner (Object Oriented Programming) instead of just throwing a bunch of mods together.

I'm not exactly the most organized or best coder, but I'm happy to learn and take suggestions ?

EDIT: Also, it's nice to see Honor get his account back. I can't imagine being hacked :/

EDIT2: I've also done a few simple web page designs with HTML, but I didn't think that would be important enough to really write about.

JustinH - May 14, 2012, 2:33 pm

Hello.

My names is justin. Im 17 years old. Im looking for many experienced coders to learn stuff from. Im learning VB.net at the moment and after this i will go to step on PHP.

Well i know im not a coder but im looking for advanced coders group to learn things from. this could improve my skills.

Law - May 14, 2012, 8:46 pm

Can I get my invite back, sure you remember me.

I_GOT_MODZ - May 14, 2012, 9:08 pm

I felt this was a good group for me to try to apply for since it is what I currently do. I started learning Java a little while ago, and I made a simple program that allows you to access the internet easier. Since then, I have mainly used Java for coding in games. I started learning HTML and PhP as well as I wanted to get a vast knowledge of all the different languages, but I never got around to learning them fully, and hopefully this group could help me. I am not a master in any language but with patience and persistence I'm sure I could learn everything there is to know about tons of different languages. I do code Java, HTML, & PhP almost every day to every other day. I'm always trying to think of new ideas and new things no one has created yet. I would love to join this group to help me get a grasp of some necessary info I'm missing about coding. Thank you for reading this.

-Modz

EDIT: Sorry forgot to post the link to the program. Here it is.

Cyber_NA - May 15, 2012, 11:16 am

Why I think you should accept me in to the Coders: I have been trying to learn many coding languages over the past 2 years and haven't found any useful material to learn from. I am hoping to learn well from this group and be able to use the knowledge in my future career.

A little about me: I am 17 years of age, I am simply intrigued with computer software and hardware. After the Air Force, I will hopefully be moving on to become a software engineer or a computer engineer. I know little of coding languages besides BBCode and HTML. I truly believe that I can help other people by learning from the best on Hack Forums and I hope you see the same

Languages I want to learn: C#, C++, Java, PHP, Javascript, and Delphi.

bobjon - May 15, 2012, 11:18 am

NO MR. KITTY NO!

In all seriousness, good luck with getting accepted. ;)

APTO - May 15, 2012, 1:44 pm

Hey, so this is my application form to be part of the coders group. There is no template so i guess i will make my own.

Name : Josh

Age : 17

Occupation : Chef/Full time education

Studying : Software Development

About me : So i have been interested in coding and have been tinkering around with programs for the past 3 years. However the only language which i can say i am really comfortable with is VB.NET. Yes i know this is a simple and easy language but i have been getting my feet on the ground and now i am starting to learn C#. At college i recently completed my procedural programming unit at a distinction and am now working on little programs such as a UCAS calculator and a stock control system. My stock control is quite high quality using validation and now it is flawless without crashing with anything and the functionality is great, even though it is basically made up of loops.

Why i want to be in the group : i think that i could benefit greatly from being in the group with knowledge and different techniques, i am always very active and never treat anyone as a moron if they are not in the same intelligence group as me. Everyone knows nothing at one point and everyone learns at different speeds in different ways. I would try to contribute where i can and help others in a polite and acceptable manor.

My work :

This is my stock program and you can have a look through this if you wish. It reads from a file into an array and can be edited and saved back to the file.

<http://pastebin.com/r93AkL7R>

Thank you for reading my application.

Super Scumbag - May 16, 2012, 12:05 am

Guys, it was a great ride. I enjoyed leading Coders, and I think we may have brought something HQ to HF.

If you where a member of Coders, I want to say thank you for the experience. It was an amazing one.

Tomorrow Coders will be dismantled, and Coders will be no more.

Please carry on what we had and have as a group, to the HF community. The classes we had, take them to the programming sections.

Teach something to someone because it's the right thing to do, not because you think it will make a group look at you better.

Again, thanks for the ride. I really enjoyed it.

xDowwdeen - May 16, 2012, 3:10 am

If you where a member of Coders, I want to say thank you for the experience. It was an amazing one.

Tomorrow Coders will be dismantled, and Coders will be no more.

Please carry on what we had and have as a group, to the HF community. The classes we had, take them to the programming sections.

Teach something to someone because it's the right thing to do, not because you think it will make a group look at you better.

Again, thanks for the ride. I really enjoyed it.
So is the group going to be removed from HF?

-xDowwdeen

Notifications - May 16, 2012, 3:35 am

It is sad to see such a group leave HF, I was, also from many other applications interested in applying.

I hope you don't mind me asking, but is there a certain reason for which it's being dismissed? or is that information confidential?

Cheers.

Teach something to someone because it's the right thing to do, not because you think it will make a group look at you better.

Again, thanks for the ride. I really enjoyed it. That was short. Is Omni going to refund your money? If not, why not pass it on to someone else for awhile?

Maxorg - May 16, 2012, 5:02 am

It's really sad to see a great group like this go and yes if money not being refunded you can pass it on to someone else and let it live on :D it's a great group and it's too sad to see it die so soon D:

Emirates - May 16, 2012, 5:03 am

Why not just get a new leader? Don't take the ship down with you.

0_0_ - May 16, 2012, 5:16 am

Wow, that's a shame because I was working towards applying for this group. I hope someone reopens a similar coding group.

Zeus™ - May 16, 2012, 5:45 am

Hmm, this is sad, but I hope everything turns out okay. I think someone should take over, instead of it being dismantled.

For whatever reason you're leaving, I hope everything works out, and I hope to see you back soon.

Peace.

bobjon - May 16, 2012, 6:03 am

Damn that sucks! This was my first group on HF and I made so many friends, and learned a lot of things.

May I ask why this is happening? :(

Enterprise - May 16, 2012, 6:31 am

kyle I am sure people will help you now that you are official you are allowed to ask for donations but I know what is going on I will skype you.

xvisceral - May 16, 2012, 8:13 am

You get 2 months to pay it off, and you can keep it for those 2 months by only paying \$1000.

However I heard he bans the people who do this...

Eruditus - May 16, 2012, 8:15 am

What you really mean is:

"I didn't have the other \$2k to pay". Right?

I am leaving hackforums.

My little brother has Ebstein's anomaly.

I have over 95 thousand dollars, but our insurance has decided to not pay for the surgery.

Mhm, I apologise for my ignorance.

Best of luck to your brother.

Silicon - May 16, 2012, 8:29 am

Good luck HeV, it was a privilege to be part of Coders!

Phenomenal - May 16, 2012, 8:43 am

Good luck Kyle. It was a pleasure being part of the team while it was together.

.au3 - May 16, 2012, 9:25 am

Hope everything goes fine with your little brother and you return one day.

DaFreak - May 16, 2012, 9:38 am

It was great to be a part of Coders, I will miss this group <3

I wish all the best for your brother, it's clearly something you need to put first over everything else, it

was good to see you around Hf and it's a real shame this has happened, I wish you and your family all the best.

Rourke - May 16, 2012, 10:58 am

Why not sell it so people can keep the group? :S

Quote:Can I sell my group?

Yes. We would allow this for a \$250 one-time fee. Transfer of ownership would be as simple as telling me who the new forum moderator and group leader is. Once you're removed as owner your requests for the group will not be recognized as valid. The new owner has the option to change the group information including name, icons, and descriptions upon approval.

I'm sure someone on here is willing to pay \$250 to keep it alive.

Reptar - May 16, 2012, 11:03 am

That is what is being discussed in the subforum

Chunked - May 16, 2012, 11:03 am

He said he still owes \$1920 for it so he would hand it over for \$1920+\$250.

If i were Honor I would not let the group become that. People joined to become better coders etc. Not to listen to music -.-

Wait, wtf? Why is he taking money? Is it for the group or is it for Dylan?

(May 16, 2012 11:07 AM)Rourke Wrote: [\[CITE\]](#) If i were Honor I would not let the group become that. People joined to become better coders etc. Not to listen to music -.-
I was going to make it into Tryhards. Was that a bad idea too?

Rourke - May 16, 2012, 11:13 am

Nah, music is just a dumb idea in my opinion. People applied to learn to code so why not keep it as a coding group? Something actually relevant on HF. (We see alot of tryhards on here, so at least that's relevant)

Reptar - May 16, 2012, 11:15 am

People see a lot of Tryhards, but do they see what i make out of the word "Tryhard"?

I want a group that will stick out from everyone else's, that's basically FUN and not all serious. Hackforum shouldn't be so serious 100%. It SHOULD be fun

Rourke - May 16, 2012, 11:21 am

If I had the money Id buy it just to keep it the way it is. (even though I know zilch about coding lol)

bobjon - May 16, 2012, 11:28 am

I agree, HF should be fun. :D

Im all for that idea.

Super Scumbag - May 16, 2012, 11:37 am

The group isn't going to anyone. For any reason. For any price.

I have already asked Omni to dismantle the group, gossip about the group being sold is incorrect.

Sir - May 16, 2012, 11:44 am

There is gossip about the group being sold because you were trying to sell it. :P

Nickelodeon - May 16, 2012, 11:53 am

This group is officialy dead now.
I think i need open a dispute since i paid.

Super Scumbag - May 16, 2012, 11:55 am

Coders is closed.

Closing this thread.
