ok commented i've found a software that i wanna share with u all... i've been surfing for quiet sum time,n i found this software(been using it quite sumtimes). and thanks to l33t cod3r for this great program!!

- run this program(run this program before u run zynga poker)
- open ur zynga poker.
- take a seat
- wait for a hand,click on review card.
- the card will review as it is the reviewing card round(when the winner takes the prize)
- this is by fooling the round that think that it is time to review all the player card to see who wins the round,but instead all player can see the card,it is u the who see all the cards.
