Thread: [Lots of SQL Errors?](#)

Zinthertar - March 31, 2012, 12:41 pm

Is it just me? I'm not sure. I can't seem to load 2 pages without the third becoming an error.

Dopey - March 31, 2012, 12:42 pm

Yea, I am getting the same thing. Keep having to refresh.

Cryptic™ - March 31, 2012, 12:42 pm

Yeah happening to mee as well. hF being attacked? Server Over load? Whats going on...

RoyalYeo™ - March 31, 2012, 12:42 pm

Same happening to me i can go click on a thread without getting the error

Barneyyz™ - March 31, 2012, 12:43 pm

Hackforums is currently shitting its self, for what reason I have no idea.

:C

The Janitor - March 31, 2012, 12:43 pm

April fools I guess, omni is acting as if we are being hacked

SIM-55193 - March 31, 2012, 12:44 pm

I've been getting the same thing. Actually the site been running slow for me.

Razmus - March 31, 2012, 12:44 pm

It's not just you, I have also those errors.

Bentley - March 31, 2012, 12:44 pm

I can't do anything :| I have to keep refreshing.

Elegant - March 31, 2012, 12:44 pm

Yeah, this happened to me too, wasn't sure if just me.

Rebellion. - March 31, 2012, 12:44 pm

Same thing happening with me :S Hope its not a prank by omni :P !!

Broda - March 31, 2012, 12:44 pm

Attacked or then this is a bad april fool's prank :)

Dr. Strangelove - March 31, 2012, 12:45 pm

DDoS attack or forum maintenance, calm down my children.

Vivacious - March 31, 2012, 12:46 pm

The April fools joke is more annoying than funny...

Nav - March 31, 2012, 12:47 pm

Same here, I got about 30 errors trying to open this thread.

ByteMayr - March 31, 2012, 12:47 pm

I am getting the same thing as well. It is VERY%2

Nitrox - March 31, 2012, 12:48 pm

Don't worry, Omni's ddosing HF on the eve of April Fool's day! xD

JK, I got the same annoying thing. :|

Grammar Rays - March 31, 2012, 12:50 pm

Some Ameriphag should call Omniscient. I would but I cannot decrypt your weird'ass phone numbers.

This is a poor attempt at April Fools, me thinks.

TheGreenMarine - March 31, 2012, 12:50 pm

HF is getting ddosed by stanislav from opensc

Weapon X - March 31, 2012, 12:51 pm

i think hf is being attacked lol its lagging like mad and every other page is a error code

.au3 - March 31, 2012, 12:54 pm

Yep i've been getting this every time I go to user CP.

Farcast - March 31, 2012, 2:14 pm

Load up your booters, target Opensc, i jk ofc lmfao

Stay Plural - March 31, 2012, 2:16 pm

Wow these skids are just stupid. It was down for me for a good while.

Invisus - March 31, 2012, 2:16 pm

Less HF more time for girlfriend. Someone is happy I'm sure.

Lemonade - March 31, 2012, 2:23 pm

Just be patient Omniscient is most likely fixing something. You can follow any news in the future on the HackForums Twitter account. <http://twitter.com/#!/hackforumsnet>

Zinthertar - March 31, 2012, 2:28 pm

It looks like it's all back up and better now

tonyjabbour - March 31, 2012, 2:36 pm

i got SQL error on some pages
and server not found some time
the port was down i think

Hexicidal - March 31, 2012, 2:39 pm

If you will notice we are on "Index2". This will usually means we are under a DDoS attack.

tonyjabbour - March 31, 2012, 2:47 pm

yes you right we are under DDOS attack , its great idea to make that redirection when its needed ,
when we get attacked

Judge Dredd - March 31, 2012, 2:55 pm

Morons I swear.
