Thread: [SaLiLoG Pro \[Beta\] Advanced Hidden Keylogger + Screenshot Option And More... \(Free\)](#)

SaLiXeM - January 17, 2010, 3:32 am

Features:

- *Hidden process (Not visible in taskmanager)
- *Hidden startup (Not visible in msconfig or any startup editors)
- *Screenshot option with custom picture quality (Will be attached to mail)
- *Supports all email services
- *Custom log sending interval
- *No need to .NET Framework
- *Logs all the keys
- *Very very low CPU usage
- *Runs before user logs into windows!
- *Automatically copies itself to system directory
- *Sends complete user's system information
- *Icon changer option
- *File pumper option (Increases file size)
- *Stub 5/24 (Only by some not famous AV's)
- *Removable with a code

How to use

I think it's very simple to use but if you had any any problems with creating server you can ask.

Note 1

This is beta version and needs to be completed. All the features in this version works with no bugs, but i will add new features to it in passing the time. Please tell me if there was any bugs or you have any new idea or a feature that you want to be added.

Note 2

This is only working on XP

Removal Note

Press SHIFT+F9 in any active window to open up the code entering form. Enter your removal code there and press Enter.

You can run the server on your computer test if it works or not.Then you can remove it.

gunzee - January 17, 2010, 4:52 am

i use vista ultimate, and i get that MSINET.OCX is missing or not working

tux1 - January 17, 2010, 4:53 am

cool but does it encrypt strings?

Freakkz - January 17, 2010, 4:53 am

Sorry but for me it doesnt Open !!!!

That's because you don't have VB6 runtime files.

Download this and copy it to system directory or application path.

SHARB - January 17, 2010, 9:55 am

Nice man ;] i go try this

mih33r - January 17, 2010, 10:13 am

great tool

there are very less keyloggers which do not require .Net framework

good work

Jeff. - January 17, 2010, 11:09 am

Dont know used standard code just to try maybe a leecher or something ;T? xDDD

but works greaaaaaaaaaaaaaat thnx ;D

freakshow10000 - January 17, 2010, 11:21 am

This is only working on XP

=(

Anybody how try it on vista or windos7?

wat shud i give in stub option?? which stub?

Asselesion - January 18, 2010, 7:41 am

the stub in the rar.

Jeff. - January 18, 2010, 12:24 pm

I cant remove the keylogger? even with the code ??

HELP PLZ ??? and rllly i cant remove it is ther any other way o.O

hedera - January 18, 2010, 1:42 pm

does it logs non english characters?

edit:i have used it, it is fud for nod32 and both editor,server,remover worked on my vista. but unfortunately doesnt support some characters and ofcourse non english chars.

Excellent work! Many thanks!!!!

Has tried on itself.... Has hardly removed!

Asselesion - January 19, 2010, 5:08 am

Very nice keylogger just make a cureyourself and FUD and its will be perfect keylogger

Jeff. - January 19, 2010, 5:13 am

Cant remove it i think in the ther is like 1 or 2 i cant remeber so a cure button would a RL must xD

EDIT :crypt the ketlogger with infinte by soul and its FUD xD

sidelko - January 19, 2010, 6:08 am

Very nice but i have little problem i ran it on Vista made a server.exe i ran it for testing but it doesnt work it showed me compile this thru keylogger. This is ok its not for vista but if i restarted my computer i get thid msg again and i cant acess removal windows because keylogger isnt runnig its only showing me error messages after restart. I tried to search in registry and system folder but cant find it. Have you any ideas plz.

that error is for running stub file without compiling.are you sure that you have ran the server and not the stub?!

By the way download this and run it: <http://www.2shared.com/file/10775621/4417b0d7/rmv.html>

(Note that this only removes the not running keylogger and it's only for u!)

hedera - January 19, 2010, 6:37 pm

i have same problem. i press shift and f9 and enter the key, it says removed but after restart it stats again and giving error, but leylogging and sends the logs.

Not: I couldnt download rmv.exe from your link can you upload it to another location?

Download this: <http://#.com/files/338044106/rmv.exe.html>

Boot in safe mode and run it.

I will fix this problem and create an external remover for it today.

Sorry for this bug, as i said it's beta version and may have problems!!

hedera - January 19, 2010, 10:07 pm

So i am a beta tester and here for tesging bugs and reporting them. Dont be sorry for bug :) Good job keep on

Jeff. - January 19, 2010, 11:53 pm

Hoping for the external remover :D

ill try this keylogg

clayd - February 8, 2010, 8:24 pm

Those people having msinet.ocx problems look here:

Step 1:

Download the msinet.ocs from here

http://www.ocxdump.com/download-ocx-files_new.php/ocxfiles/M/MSINET.OCX/6.01.9782/download.html

Step 2:

Put the msinet.ocx in C:\Windows\System32 or C:\Windows\SysWOW64 (64-bit Vista).

Step 3:

Open your start menu and search for "CMD" now right click on it and select "run as administrator"

Step 4:

Write "regsvr32 msinet.ocx" and press enter.

DONE!

Also

when I try opening the program it created when I hit create, nothing happens. I am also not receiving emails etc.

After running the created server you will see nothing and program will start logging invisibly.

Choose stub file and the output file.Stub file is included in the ZIP file, and the output will be your keylogger server.

Don't say this this program is great and I'm waiting you;re new version
or you make a new keylogger that have the same features with added ones .
please.
cease you are genius .
thanks .

Hey, I just came to this forum to find an easy tool to get a live screenshot everytime I request it from
another computer. Does this tool do it?
Does it work with Win7?

If you could make a program like this without it being detectable by too many Anti-virus software I
would easily donate \$\$.

I tried to PM you, but since this is my first post I can't do it.

best regards

or how long does it take before the picture is sent to the current e-mail? is it instantly or does it take
some time?

The keylogger isn't FUD anymore. Try using crypters to FUD it.
