Thread: [\[VB6\] Binder Source Code \(SXB\)](#)

SaLiXeM - January 17, 2010, 9:54 am

OK, i'm going to release my first binder's source code. It can bind two EXE files with icon changing option. It's called [SXB](#). It's too old now and it's detected. But u can make it UD with making some changes.

You are free to compile it or use part of the code, but please don't forget credits. ?

Maybe in near future i release [SFB 1](#) source code! ?

nice.. i like the GUI...

autorunman22 - October 28, 2010, 1:08 am

This is sexy ! i gotta try this ! thnks!!

C-Zero1 - October 28, 2010, 4:48 am

Looks nice but download link valid..

I have deleted the source code from my hdd and i cant upload it again. sorry!

autorunman22 - November 7, 2010, 5:59 am

can u make it again ? im sure you can cause u made it once. :)

I'm not gonna waste my time on coding an old binder again. I'm sorry.

NigSup - November 7, 2010, 6:50 am

Nice program there mate => , To bad you lost it :'

You know that this thread is nearly 5 years old, right?

PapaBeans - March 27, 2015, 5:10 am

It's VB6.... the old thread should be the least of his worries.
