HowTo: Decompile .NET programs

Tutorial created by:

[IMG]http://i46.[censored].com/qs9xja.png[/IMG]

Download/Install .Net Reflector

Visit the official download location [here](#)

You should come to a page that looks similar to this..Spoiler [\(Click to View\)](#)

[IMG]http://i50.[censored].com/2ezo38l.png[/IMG]

Once the download is complete, execute the installer, and finish the installation.

Decompile with the reflector

Open the reflector program

Chose which language the .net program was written in [the program you will be decompiling]

Spoiler [\(Click to View\)](#) [IMG]http://i48.[censored].com/1hy1vk.png[/IMG]

Once the programming language has been selected, you can just drag and drop your program into the window

Spoiler [\(Click to View\)](#) [IMG]http://i45.[censored].com/2najzt3.png[/IMG]

Press the plus sign, next to the program name, and if you see anything that interests you, just right-click it, and press decompile

Have fun messing around with the decompiled source :)

Other..

Of course, I take no credit for the creation of this program. All credits for it go to "Red Gate Software".

Virus scan [HERE](#)

If you liked this, please reply.

Anything you didn't understand, or need help with, post here as well.

If you would like me to add something, let me know it a reply to this thread also. I would be more than glad to add it.

EpicPwn - January 17, 2010, 11:35 am

Woah, trying this now.

Thanks

65 views and only 1 reply D:

-raiN- - January 17, 2010, 2:50 pm

I might need this thanks

iRtehLeet™ - January 17, 2010, 3:21 pm

Unless coded by a real programmer, this is useless :D {obfuscation/anti debuggers}

CustomSync - January 17, 2010, 3:40 pm

Go into detail. How can it be coded by a "fake" programmer, and are you saying this doesn't work? Because if you were, you'd be wrong.

Dead #45 - January 17, 2010, 4:08 pm

Hello CustomSync.Im new to hacking so this may sound little nooby&strange.But what do i get with decompiling a .NET program?

It source?

CustomSync - January 17, 2010, 4:48 pm

Yes, if a program [made with .NET] in unencrypted, just straight out of the compiler then you can decompile it, and have its source.

Good guess, and good luck

Sub-Z3r0 - March 6, 2010, 11:55 am

Nice sharing mate! Thanks alot

69flyman - March 6, 2010, 12:47 pm

i might check this out nice

CustomSync - March 6, 2010, 4:15 pm

Thanks for the feedback, glad you guys like it.

Try_ME - March 6, 2010, 6:52 pm

This is is pretty useful, but the only problem is if the programmer isn't a complete dumb ass he will obfuscate/encrypt his code keeping it hidden if you use this tool. Luckily there are alot of dumb asses out there, hahaha. Nice work.

CustomSync - March 6, 2010, 7:04 pm

I agree, a lot of programmers don't take proper measures to prevent this from working. Thanks for the feedback.

Universal - March 6, 2010, 8:38 pm

Obfuscation = All this bullshit will stop!

Status - March 6, 2010, 8:45 pm

Lol cool share, but the programs worth decompiling are probably protected.

CustomSync - March 7, 2010, 12:33 am

True :D Thanks for sharing, will keep it in mind.

protocol - March 7, 2010, 2:37 am

very nice share mate

thanks

HaXZX0r - March 7, 2010, 2:38 am

Nice share! I'll try this out

The Name's Bing - March 7, 2010, 4:15 am

Thanks for the program, and good TuT on how to use it too.

Great job bro :)
