Thread: [\[Tutorial\] How to crypt DC with CryptE'm \[Tutorial\]](#)

Stenography - April 3, 2012, 4:08 am

Hi guys.

Lately I've been receiving alot of PM's from customers regarding our crypter and DarkComet. I had a talk with iKrizzy and came to decision I should make this tutorial.

Building a DC server.

Let's begin.

First, Make sure that the port/s you chosen on dark comet are forwarded as well. (

<http://canyouseeme.org>)

Spoiler [\(Click to View\)](#)[img]

Click the big blue button on the top of DC and choose Client Settings option.Spoiler [\(Click to View\)](#)

[img]

When you did, Enter a password in the field below: Spoiler [\(Click to View\)](#)

[img]

*Make sure you wrote it somewhere because you will need it later !

After we added traffic encryption merged key we can now begin compiling the server !

Spoiler [\(Click to View\)](#)[img]

OK, The first thing you must do is enter the security password You've entered in the client settings ! (or it won't work)

Spoiler [\(Click to View\)](#)

[img]

Uncheck the checkbox "Active FWB" and randomize some mutex.

Spoiler [\(Click to View\)](#)

[img]

After you did, Click in the small menu in the left side of the window "Network Settings" and write down your no-ip and port below and press add.

Spoiler [\(Click to View\)](#)[img]

Now, Go straight to "Stub Finalization" and follow the settings below: Spoiler [\(Click to View\)](#)

[img]

Crypting with CryptE'm.

Open CryptE'm and follow the .GIF:

virus scan: <http://my-avscan.net/result.php?scan=NDMxMTM1>

I hope you guys found my tutorial helpful to you.

If you are interested in buying this crypter feel free to PM me.

Izzy - April 3, 2012, 10:30 am

Thanks you for helping and making this guide for Crypt E'm
You Are Awsome!

Stenography - April 3, 2012, 10:32 am

haha thanks mate :)

The crypter is FUD and up for sale !

????DRO3D??? - April 3, 2012, 4:02 pm

Good tutorial . . I bought already the crypter all I can say is that it's very easy to use and FUD!

Stenography - April 3, 2012, 8:17 pm

Thank you mate !

I just undetected the crypter again because of some kid scanning it on virustotal.

Bryan | Darc - April 3, 2012, 8:57 pm

Nice tutorial man, should help alot of new members with setting up a rat for the first time.

Stenography - April 4, 2012, 5:37 am

Setting up a rat for crypters *

Alot of customers are having issues with compiling the server..

paintkrew - April 4, 2012, 4:53 pm

Cool just what i was looking gotta save up to check this out thanks.

Stenography - April 4, 2012, 8:54 pm

I'm glad you liked the tutorial mate. :)

dafuq ? 192 views and only 4 comments ?

preetam.kondekar - April 4, 2012, 10:37 pm

Thanks for the tut mate... will help me a lot.. thanks a tone.

Stenography - April 10, 2012, 7:55 am

No problem mate.

I'm planning to make at least 2 new tutorials regarding R.A.T.'s and Keylogger's and CryptE'm. :)

Impurity - April 10, 2012, 8:06 am

Good tutorial, definitely gonna be useful. Very well written btw :)

paintkrew - April 11, 2012, 12:17 pm

Thanks just got it the other day works good,

would be cool if you could re-size the window, to make it bigger or smaller on the screen.

Looking forward to your other tutorials.

Typhillion - April 29, 2012, 10:56 pm

Ahh.. Can you make a new tut? It's detected 4/37 for me.

And I've followed all the instructions exactly.

Thanks
