Thread: [\[TuT\] How to spread rat{TuT} EASY{N00b} FRIENDLY](#)

Malwarebytes® - April 4, 2012, 8:05 pm

hello everyone this is my first tut so i hope you enjoy it.

The best way i think to spread you rat is by online chat rooms. In just one hour i got 6 new slaves. So lets find out how:

1. the website i use is <http://www.chat-buddy.com/chat-room.html>
2. you don't need to register a account just check the box that says quest and select a "sexy" username...like hornygirl, or sexyslut.
3. then once the chat room loads up with in secs men will be sending you pms aka instant messages.
4. now there going to start asking dirty question, but most of them are going to ask you if you have a webcam or cam, that's when you say "yes , but i am using it on my live video stream.
5. that's when they say can i get the link to it and that's when you send them the link to your RAT.

{this will work prefect if you have java drive by setup on your server}

7. then you send them the link to the RAT and make you tell them "you may need to update your player or something link that" and that's when they install the RAT.

And if no one instant message you just post something on the chat board like "I'm horny" and watch the pms come in. there are a lot of horny men logging in every sec so the method is a GREAT and easy slave builder!

holythunder - April 5, 2012, 3:08 am

This chatroom is awesomergasmic! So many horny man, you can get slaves like that!

firesnow - April 5, 2012, 3:18 am

Why would you like to 'slave' them in first place?

tempest nE - April 5, 2012, 5:55 am

SocialManfree - April 5, 2012, 6:08 am

i got rats but im just having trouble port forward anyone help me???

Shadow Thief - April 5, 2012, 6:12 am

hhahah yeeeah !greeeeat way to get innocent men

404™ - April 5, 2012, 6:31 am

Nice i will to test this soon :) (Thanks you)

alignment - April 5, 2012, 7:20 am

100 connections on my DC in 2 hours wow!!!

Thank you so much for this method man rep++

holythunder - April 5, 2012, 8:02 am

Because you can never have enough slaves...

Malwarebytes® - April 5, 2012, 1:44 pm

thanks everyone hope everyone will benefit from well from the TuT!!

sdkulkarniB - April 6, 2012, 5:52 am

Bro Nice Trick but having little problem ! Some chat don't allow to post links ?

Hey bro how u got 100 connections in just 2 hours ?? Please tell me this trick too ! ?

Malwarebytes® - April 6, 2012, 11:00 am

i updated the thread bro for everyone to see...sorry for not including it in the first place

in order to send ur link to them put quotes in it like this: "urlink.com"

Timothy91 - April 6, 2012, 1:07 pm

Hmm how can I add my RAT in a link then? because I only have it executable made on my desktop and AV's see it..

I use DarkComet btw, If anyone can help me out I would be thankful!

Malwarebytes® - April 6, 2012, 3:36 pm

well first u need to get a hosting place starka is a good spot for that thats where u can store ur RAT..next you need to crypt your .EXE..i can do that for a small fee....and that will make it not detectable by AV

Totally off topic and somewhat gravedigging, but wow, I didn't know that Malwarebytes had a hackforums account. For the record I should feel bad and do feel bad about posting in a two year old thread. I'll go now, I know where the door is.

Jader - June 7, 2014, 3:59 am

Thanks! I'm definitely going to try this site ?
