Thread: [How can I make a USB automatically install my RAT?](#)

SIM-964740 - April 5, 2012, 1:13 am

I am looking for a method that can make my USB automatically install my RAT, I would like to infect my brother fast and efficiently.

Any help, links to tutorials or what ever would be appreciated!

Cheers,

?MM98?

<http://dailycupoftech.com/usb-drive-autoruninf-tweaking/>

Now that wasn't too hard, was it?

Use a crpyter with a usb spread option or just simply go on his computer when he is out and put it deep in his system 32 files and exe it 3 times to make sure it works

Your not going to be able to JUST plug in usb and he is infected. Vista and 7 protected themselves from that. Easiest thing to do is to put your fud server on usb go to his pc and open it. Ive tried those tutorials in the past, and have been here 3 years. They dont work because autorun is disabled in those pc versions. If you tried it, you would get several popups, asking what you want to do etc.
