Thread: [UNOLOCK/JAILBREAK iPhone 3G, 3GS, 4, and 4S remotely!](#)

Chuiy - April 6, 2012, 4:31 pm

Why should you unlock/jailbreak your iPhone?

Because you can:

1. Use ANY cellphone / broadband service provider.
2. Use FACETIME over the 3G network anywhere you like. Without WIFI!
3. Use ANY feature that Apple thinks is "inappropriate".
4. FREE tethering (normal monthrate in the USA is \$25 a month).
5. You can install VoIP software.
6. It's risk-free. Worst case scenario, you can restore your iPhone to the factory settings
7. Install third-party applications with Cydia
8. Add custom notification sounds and ringtones for free
9. Use a free turn by turn GPS with xGPS
10. Get video recording for your iPhone 2G or 3G with Cycorder
11. Stream live videos with Qik
12. Use Voice Over IP apps over 3G and Edge with VoIPover3G
13. Enable Flash with iMobileCinema
14. Download and save YouTube videos on your iPhone with MxTube
15. Tether your iPhone with PDAnet
16. View your iPhone on your TV with TVOut
17. Play Game Boy, Game Boy Advance, NES and PlayStation games with emulators
18. Watch every single episode of South Park, American Dad, Family Guy, the Simpsons, the Office, and Futurama for free
19. Filter incoming calls with iBlackList
20. Email your voicemails with Voicemail Forwarder
21. Customize the look and feel of your iPhone with WinterBoard
22. Quickly manage your settings preferences with BossPrefs
23. Sort your apps into folders with Categories
24. Run apps in the background with Backgrounder
25. Track your lost/stolen iPhone with iLocalis
26. Display information such as emails, SMS, calendar and more directly on your lock screen with IntelliScreen
27. Change your iPhone fonts with FontSwap
28. Show a picture of your contacts in your contact list with Cyntact
29. Easily transfer files via Bluetooth with iBluetooth
30. Enable battery percentage on the 2G and 3G with Battery Percentage
- 31 You DONT HAVE to send me your iPhone (yes others do ask you to do this) and you DONT HAVE to wait for someone to come online to unlock and jailbreak your iPhone. You can have it done safely online, from your home, and in under 15 minutes.

At the moment, we charge \$23 per iPhone and you can purchase it [here](#) we offer a lifelong guarantee, and a 100% no questions asked money back guarantee.

Ab\$olute Money - April 7, 2012, 9:28 am

Chuiy you bad boy putting your referral link and all :)

Chuiy - April 7, 2012, 10:58 am

Yes you can. Our software FULLY supports iOS 5.0.1 for iPhone 4 and 4S, as well as the 04.11.08 baseband.

In case an issue does arise, you are backed by a 100% money back guarantee. Refunds usually take (up to) ten days, in most cases three days.
