Thread: [\[TUT\] How to setup Darkcomet 5.1.1 \[TUT\]](#)

Raz3d - April 8, 2012, 1:24 am

Hello and welcome to my Tutorial on how to setup Darkcomet!
Let's get started.

Search for www.darkcomet-rat.com
And click on the download button on their site.

Agree to the things on the picture.

After downloading now we must create a no-ip.
Go to no-ip.com
Now you must create your account.

Now click on create account.

And take the one which says : \$0 / year *
TRY BEFORE YOU BUY

Now go to your email and confirm your account.
After that you must login.

Now that you've logged in press Add a host.

Now fill out your no-ip and click on Create host.

Now you have created your No-ip
Now download the client and select your Operating System.

And click on download.

Now search for DUC and open it.
After opening it login, and now that you've logged in press on select hosts.
Now that you've opened Select Hosts pick your no-ip
Do what the picture says.

Now open your Darkcomet.
After opening press on:

Okay now that you've opened your client/Darkcomet, click on Socket/Net and left click on it once you've opened Socket/Net

Okay now once you've pressed on it left click and Add port to listen.

Remember to Mark yes at Try to forward automatically this will let Darkcomet portforward a port for you.

Now press on Darkcomet.

Now click on Server Module/Full Editor (Expert)

Now once you've opened let's start making your server.

Do not activate FWB (Firewall bypass) if you are going to crypt your server in the future.

Now go from Main Settings to Network Settings.

Now in IP/DNS put in your no-ip host mine was :MCSlim.no-ip.biz

After that click on add, if you want to bind or choose a icon do that also.

Now click build the Stub when done making your server.

Now click on

And click on Client settings.

Now put in the password at the highlighted point.

Now click on No-ip Updater and login with your no-ip details once doing that click on Update DNS.

Thanks for reading it took me 1,5h to write it.

Sorry if it's a bit messy but i did what i could.

James Franco - April 8, 2012, 1:30 am

+Vouch amazing I luv you so much <3

Krewella - April 8, 2012, 1:30 am

Nice TUT bro....

hope this will many n ewbies...

good work, keep it up

J0uk0 - April 8, 2012, 1:30 am

Vouch for MC Slim and this thread.

Helpful guy. Good job on it.

humangraffiti - April 8, 2012, 1:35 am

VERY HQ and helpful TUT Legit and very helpful member :D

good job mate

TmasLove - April 8, 2012, 1:37 am

Awesome tutorial. Vouch for this guy! This is going to help a lot of people out. (Me :D)

azdrubaal - April 8, 2012, 1:43 am

Wow, neat tutorial! I vouch! This looks very helpful!

moundown - April 8, 2012, 1:55 am

Great tut and great RAT. Thanks much mate

JamesBH - April 8, 2012, 2:01 am

Thanks alot , helped me out so much.

Raz3d - April 8, 2012, 2:16 am

Thanks alot for the good post's.

Happy i've made it actually for all the people who doesn't know how to setup one up.

Don Vito. - April 8, 2012, 2:20 am

Nice post man you just helped me setup my Dc!

Simplar - April 8, 2012, 3:53 am

when i infect my self it dont show up

Raz3d - April 8, 2012, 4:34 am

Great tutorial bro, big vouch to this guy!

?Phantom? - April 8, 2012, 6:09 am

Hey, i can only get this to work when i infect myself, but not the other PCs on my network, they are all fresh installs with no updates, so there shouldnt be anything blocking the rat..

raviteja84 - April 8, 2012, 6:40 am

Great tutorial dude! I hope you can do much more than this!

Raz3d - April 8, 2012, 7:31 am

(Apr 8, 2012 06:09 AM)DBerkley Wrote: [\[CITE\]](#) Hey, i can only get this to work when i infect myself, but not the other PCs on my network, they are all fresh installs with no updates, so there shouldnt be anything blocking the rat..

Dissable all antivirus programs, and your firewall try if that works.

Dardz - April 8, 2012, 9:11 am

I try to infect my own comp but when I run the file, my details and shit don't show up on darkcomet and I have port forwarded already.

K?ala - April 8, 2012, 9:53 am

Vouch! Very nice tutorial. Good job.

?Phantom? - April 8, 2012, 10:36 am

(Apr 8, 2012 07:31 AM)MC Slim Wrote: [\[CITE\]](#) Dissable all antivirus programs, and your firewall try if that works.

Theyre fresh installs, there are no Antiviruses, and the windows firewall is off.

preetam.kondekar - April 8, 2012, 10:45 am

HI, well, I have DC 5, working perfectly, with one of my friend on HF he crypted my server but that time he asked me whether I have checked module start up or not... I said Yes and he has crypted my server with the same settings on his cryptor so I got slaves but now I cant see them... should I build the server with that module start up check box on??

Sorry for my bad english.

Thanks in adv.

G?dly - April 8, 2012, 2:34 pm

Vouch, great tut bro. KEEP UP THE GOOD WORK!!

richownz - April 8, 2012, 3:28 pm

i cant get darkcomet to open at all i've stopped all antiviruses (AVG) Shut off my firewall and everything that maybe cancelling permission to open the program, I'm really stop does anyone else have any suggestions?

Everytime i go to open it it just says Windows cannot access the specified device/Path you may not have the appropriate permissions to access the item :S Please help! :(

Thank's
never mind guys fixed it thanks anyway :)

Recycle Bin. - April 10, 2012, 10:08 am

Very help tutorial mate. Looks nice and will be helpfully to many members.

Jettthebuizel - April 10, 2012, 11:56 am

I vouch for MC SLIM on this tutorial. Great work!! I am gonna try this out later. Thanks for writing this.

Raz3d - April 10, 2012, 12:05 pm

(Apr 10, 2012 11:56 AM)Jettthebuizel Wrote: [\[CITE\]](#) I vouch for MC SLIM on this tutorial. Great work!! I am gonna try this out later. Thanks for writing this.
No problem bro.

Also thanks for your vouch.

Liberty Reserve© - April 10, 2012, 12:22 pm

Great tut and great RAT. Thanks much mate

Spunky14689 - April 10, 2012, 1:51 pm

Thank you this has helped me a lot for being new! ?

Marcsurf21 - April 10, 2012, 6:08 pm

Ok just a noob question. When i do this should i have my hotspot shield up to change my ip or is that what the no-ip does... Sorry guys i am really new at this and would like to get a rat out today if someone can give me a fast response. Thanks again everyone.

Subpar - April 10, 2012, 6:11 pm

Thanks for the tutorial on how to setup DC mayn!

Raz3d - April 11, 2012, 4:02 am

(Apr 10, 2012 06:11 PM)Qburt Wrote: [\[CITE\]](#) Thanks for the tutorial on how to setup DC mayn!
No problem mate.

(Apr 10, 2012 06:08 PM)Marcsurf21 Wrote: [\[CITE\]](#) Ok just a noob question. When i do this should i have my hotspot shield up to change my ip or is that what the no-ip does... What do you really want help with i really don't get what you are trying to say.

LuxiZz - April 11, 2012, 5:59 am

Nice TUT MAN TNX VERY MUCH GOODJOB !

Marcsurf21 - April 11, 2012, 7:25 am

(Apr 11, 2012 04:02 AM)MC Slim Wrote: [\[CITE\]](#) No problem mate.

What do you really want help with i really don't get what you are trying to say.

Well i followed your guide and now have my rat built and have my stub stored in my documents. When getting my stub out for people to download should i use an vpn program to hide my ip so no-one knows who sent it to them or is that what the no-ip site does? I understand that the no-ip site creates a free domain for you but no quite sure what the perpuse of this is. Also do you know of any ways to change the stub from a .exe file to any other type so that the person downloading doesn't know they are getting an .exe. Like maybe hiding it into a jpeg file within a picture. That way when they click to download the picture it will automatically download the .exe stub?

Raz3d - April 11, 2012, 7:51 am

I don't think its important to hide your IP.

The only IP he can get is your NO-IP IP it think.

But you can also use a VPN just update your IP thru Your DUC and NO-IP Updater.

Have fun.

Mandatory - April 11, 2012, 7:53 am

Thanks for this guide! Helps many people im sure!

You always help :D

yoyokyoya - April 11, 2012, 8:27 am

thanks for the post, i should try this later on :D

Th? Jok3?™ - April 11, 2012, 11:48 am

Pretty good tutorial bro, keep it up :)

shragiel - April 11, 2012, 12:02 pm

Thanks alot!

Good tutorial ill try it :)

Astronome - April 11, 2012, 12:02 pm

Vouch, this is an awesome tutorial thank you so much.

Celebris - April 12, 2012, 11:26 am

I tried the tutorial and I'm able to successfully connect to my PC, but I can't connect to any other PC. I tried to turn off the antivirus and firewall on the computer with darkcomet, but it didn't help.

According to the task manager the program succesfully runs on the other PC. Does anybody know what could be the problem?

Hirsch4 - April 14, 2012, 3:02 am

Many many thanks to you really fine tut thanks from all noobs i hope many many of them read this one!!!!

bikash - April 14, 2012, 3:50 am

Great Help with Tutorials Thank you.... :D

Darkcomet portforwards automaticly :)

Harold Wren - April 14, 2012, 6:21 am

But then why do all the other tutorials say i need to do it??
not hating im just a newby sorry.

halo4196 - April 14, 2012, 6:51 am

thank you very much help me set it up qucikley

Grape - April 14, 2012, 6:52 am

HQ Tutorial and very well explained. Thanks!

Harold Wren - April 14, 2012, 7:04 am

all done but i can't infect my self i did before but it won't work now... :(

Guess Who Is Back - April 14, 2012, 7:10 am

I must say pretty good tutorial. Keep up the good work with tutorials :)

Raz3d - April 14, 2012, 7:12 am

(Apr 14, 2012 07:10 AM)Guess Who Is Back Wrote: [\[CITE\]](#) I must say pretty good tutorial. Keep up the good work with tutorials :)

Harold Wren - April 14, 2012, 7:20 am

good tutorial but im having problems still

carltonvandersloot - April 14, 2012, 8:09 am

Awesum TUT dude, easy to understand :)

sm00rhz - April 14, 2012, 10:11 am

Very helpful tutorial, vouch for this user!

Copic - April 28, 2012, 3:53 am

Thanks for the tutorial OP!
Very HQ and informative!

RULE? - April 28, 2012, 5:47 am

100% Vouch for this. Works amazing!

Kosmos - April 28, 2012, 6:40 am

Is this up-to-date with the newest version of DarkComet? If not, could you please make another tutorial?

Raz3d - April 28, 2012, 6:47 am

(Apr 28, 2012 06:40 AM)GmZ Wrote: [\[CITE\]](#) Is this up-to-date with the newest version of DarkComet? If not, could you please make another tutorial?
I'm sure this works with the newest version aswell.

Setup is still the same maybe design and shit has been changed but the setup is still the same.

K?ala - April 29, 2012, 12:48 am

Very nice. Easy to understand tutorial. Must have for beginners.

Turkey Dunce - May 8, 2012, 8:45 am

Wow, neat tutorial! I vouch! This looks very helpful!

PandaHaxor - May 11, 2012, 10:50 am

Helped me set this shit up.
Thanks for this tut OP

Mayweather - May 11, 2012, 12:24 pm

finaly someone uploaded this guide.

thanks man

XiX Eb0y XiX - May 13, 2012, 1:20 am

Should help out alot of people.
Nice guide man! I can see alot of people use it.

LoG?c - May 13, 2012, 6:56 am

Very HQ thread, Bumping this because you're my friend and your tutorial deserves to be at the top.

Haval - May 13, 2012, 11:04 am

Excellent tutorial, everything worked. I can vouch for this guy.

Daitcho - May 15, 2012, 8:31 am

Following this now. Was just what i was looking for !
Thanks <3

Performer - May 15, 2012, 8:32 am

Niceguide man! I love you soooo much :* (no gay)

hackingeveryone - May 15, 2012, 9:19 am

Thanks. There was an error posting your reply:

The message is . Please enter a message longer than 35 characters.

Mattymul - May 15, 2012, 9:50 am

Thanks very useful! I,am learning to rat at this momment!

DLT. - May 15, 2012, 10:46 am

Nice Tutorial, this should help alot of beginners :)

NightBeast - May 15, 2012, 12:38 pm

darkcomet always works well than other rats

Rick R?ss - May 16, 2012, 7:16 pm

So what do I do after this? Lmao. I'm new to this xD

Molliwopped Sensei - May 22, 2012, 10:18 pm

Thanks for the tutorial mate. :)

I will need this soon!

Prez - May 22, 2012, 11:37 pm

Very helpful tutorial looks nice bro!

LolRats - June 5, 2012, 8:39 pm

GREAT Tutorial, i think it helped everyone out a great deal, keep up the hard work! ?

Epik_Reign - June 5, 2012, 9:05 pm

thank you for this great tut I appreciate the effort you put in this.

newfaghacker - June 5, 2012, 9:31 pm

Lol 1st post.

Ok so I think I did everything correct. Now what? So all that needs to happen is for somebody to run that file you create?

I ran it myself nothing happened.

Please Help. Thanks :D

Edit : Sorry I'm so noobish this is my first day messing around with RAT, also I'm really new to all this hacking stuff (as you can see from my name).

bharath123 - June 5, 2012, 11:00 pm

i setup the server but its not showing can u pls help me out

Configz - June 7, 2012, 4:05 am

Thanks for the great Tutorial bro!

- Configz

haz3d - June 9, 2012, 4:55 am

Great tutorial Cudd, easy to follow. ?

iamveryveryverygay - June 9, 2012, 8:10 am

Thanks this helped a lot even though I'm using 5.3.1.

Tibit - *August 8, 2012, 11:11 am*

Nice guide mate, I know these guides help people with help desks so much, it keeps the questions at a lower number :)

Skiezo™ - *August 8, 2012, 11:12 am*

nice tutorial Cyber

Although there many of them.

But this one of a Noob-friendly Tutorial.

People need this a lot <3

Rulio739 - *August 8, 2012, 1:03 pm*

Thanks alot , helped me out so much.

kaliowned97 - *November 12, 2015, 2:10 am*

Great job on the tutorial!
