Thread: [??? \[FREE\] Massive Photoshop Resource Warehouse \[ALL\] ???](#)

Nitrox - April 8, 2012, 11:17 am

This giveaway is powered by Illuminati. We care for people and hence this mega thread for Photoshop resources.

So, this thread will be update regularly with different Photoshop resources, all being .PSD's for icons, banners, logos, thread designs, GUI's and what not.

Not to make things simpler and cut down the bullshit of "Post here and PM me", I am going to provide direct links to the file download. No adfly links, no spam links, direct download link to filefactory.

No intent is being made here to gain money by downloads, it's purely being done out of goodwill by the "Illuminati" group.

The "Download" and "Sign Up" pictures are going to be extremely useful for me. Thanks for the share!

????d?? - April 8, 2012, 11:28 am

Thnx for the share mate...soon i'm also going to make a giveaway thread :D

WoHeM - April 8, 2012, 11:35 am

Thanks man , This is very useful to me

All of these looks awesome, well done and I can't wait to see more of this!

Nitrox - April 14, 2012, 4:20 am

I am beginning to think this thread is becoming pointless. Over 130 views and just 6 replies? o.O

Come on guys, a 35 character reply isn't that hard to give, is it? If you don't want this thread, just make a post and I'll gladly close it. No offense.

Theres alot of leechers in this world,

I really admire your work please carry on doing these and dont give up

Nitrox - April 15, 2012, 4:28 am

Sometimes I feel asking people to post in this thread for the download link isn't a bad idea considering HF is full of leechers.

To be honest, I don't have the urge anymore to give away these .psd's.

BlueLight™ - April 15, 2012, 5:13 am

Thanks for these designs! I absolutely love the style of them and would be great use for my future designs! Really hope to see more.

Grape - April 15, 2012, 5:19 am

Thanks! I find this very helpful and useful, great share.

Ghost. - April 15, 2012, 9:26 am

that last one is awesome ;D

i know what you mean about the not replying thing. its so annoying when people do that, it's why i always do the post and pm thing even though it annoys some people.

great work anyway

Nitrox - April 15, 2012, 9:29 am

@Ghost. : I could have tried out the same "Post and PM" thing. But I feel it's useless wasting time of both mine and the guy who's requesting; you PM me and I PM you back doesn't happen instantly. Just tried to make things a lot easier, direct download link does that. But sometimes, when you see not even 10% of views as replies, it really puts me off.

BlueLight™ - April 15, 2012, 9:39 am

I know how you feel. If people don't reply then your topic just gets buried. You have done an amazing job releasing these packs for us.

Isaac Newton - April 15, 2012, 10:09 am

Nice work again. Appreciate the hard work you're putting in.

You can add the new packs in OP in a spoiler along with adding them in new posts. People must know how awesome these designs are.

Yeah, I will be doing that. ?

I have that in mind, would be easier to track. But only if I see this thread is going somewhere. Else I might just close it down. ?

I can't actually upload any file now, because Filefactory is giving an error about an issue they are facing.

What I am planning to do it create an account in mediafire and upload all the contents. Not many good sites allow you to upload files without signing up, after what happened with megaupload.
