Hey guys, Today I'm releasing my source I had whipped up in about 40 minutes.

I'm tired of seeing questions asked by people on how to make 'shell booters'

Well now Im releasing my source; here's the features: Uses webrequests
cool way of importing your shells
uses unlimited amount of shells in a foreach loop
cool GUI
resolve/ping a host
and ofcourse ddosing
glitch free resizing with double panel things.

Here's a preview:

[img]http://zediasoft.webs.com/uploads/images/zediaboot.gif[/img]

DOWNLOAD: <http://www.mediafire.com/?d2d4bn0uk9ftejg>

Password: Didn't want to have to do this but 20 downloads and 2 posts?

I'll be giving the password to those that I deem worthy

Post here to get the password.

Alternatively you can download it right now from here:

<http://adf.ly/7qgN2>

Do Not PM Me.

The code isn't commented and it might be abit messy, especially the resolving part, but it's a free source so.. :)

Please please please please PLEASE do not spam up the market with your "100% fully custom coded shell booters" Half the exe booters in the marketplace are already crap, and please if you're going to release it give credits.

ShadowZA - April 8, 2012, 12:52 pm

The Password is (zediasoft) btw.

Ow and nice release, keep it up.

That's because you're a smith.

I was probably at this level like 3 years ago. I was one of the first shell booters before all this tyler777 shit and prodigy shit came out.

I had a booter when there were no tutorials on how to make one or any of that shit.

Pings are considered ICMP floods and are way more ineffective than UDP floods.
Learn your shit, and P.S it was hitting over 5 gbps taking down major sites such as ask.com, sprite.com and etc.

KENSTER - May 26, 2012, 6:54 am

this looks really sick and i want to know how a shellbooter works, i know something about keylogging, but a shellbooter would be also nice to learn to code. would you send me the password?

EKNOZ - May 26, 2012, 1:14 pm

I like how he did this, i recommend this to people that are in need of a .net booter :D
