Thread: [Witch keylogger isnt detectable on norton??](#)

00kiko00 - April 10, 2012, 1:09 pm

I want to send my friend a keylogger but he has norton so i need some free keylogger that isn't detectable on norton pm me or comment please! ?

Highmen ? - April 10, 2012, 1:10 pm

If you crypt the infected file FUD, then it won't show up on Norton.

Cheers.

I pretty sure all free keyloggers will be detected on Norton. Crypting it might work, but the one build in to DarkComet does the trick.
