Thread: [Need md5 hashes cracked, support appreciated](#)

bch195 - April 10, 2012, 2:17 pm

Hey guys, I managed to get hashes to a very important site and some hashes cracked would be very nice.

Here are the first 2 hashes, more are coming up, there are 19 possible admin accounts in all.

I think they are MD5 hashes.

Code e217968af5fd5f7037386687093f359f
4dce8605bb9c19692fdfde6d168ad598

Thanks alot my friends and il post the shell link if I am able to get into the admin area.

asatuz - April 10, 2012, 2:21 pm

Hey have you tried them against any online databases? If you have then you/our options are rainbow tables and bruteforcing, which less people will be willing to do (due to huge strain on resources) but I will see what I can do

bch195 - April 10, 2012, 2:23 pm

Thanks mate, Iv tried searching but dont have a powerful enough computer to decode it.

asatuz - April 10, 2012, 2:25 pm

Fuck.. sorry mate recently deleted my rainbow tables.... oh well might as well start bruteforcing them :p

bch195 - April 10, 2012, 2:26 pm

Thanks bro, any help would be greatly appreciated.

asatuz - April 10, 2012, 2:42 pm

I think its salted, not sure though

bch195 - April 10, 2012, 2:43 pm

Its not, this was one of the passwords.

Code 5f4dcc3b5aa765d61d8327deb882cf99
but the account is locked out as a admin user.
All the accounts keep timing out for some reason...

Anyone know why?

Keeper - April 10, 2012, 2:46 pm

Idk if any online decrypter has these in its database but hashcat (CPU) + 3GB of wordlists worked for me.

e217968af5fd5f7037386687093f359f --> kanguru1360
4dce8605bb9c19692fdfde6d168ad598 --> Kanguru1360

Take care.

bch195 - April 10, 2012, 3:27 pm

Thanks alot, I tried uploading some shells, with a FCKEDITOR but it returns the jpg images as:

Anyone know why it does that?

zer0pwn - April 10, 2012, 3:30 pm

Anyone know why it does that?

Probably because it grabs the file name before you actually edit the HTTP Header. You'd be better off uploading as *.php and seeing if you can change it to *.jpg and see if it'll do anything.

bch195 - April 10, 2012, 3:32 pm

I tried doing it, but it didnt work, they dont have the official FCKEDITOR like link, would you like me to link to the one im using in a PM, maybe you can have better luck.

Yeah, I can take a look if you want :)

bch195 - April 10, 2012, 4:53 pm

One more hash if possible someone could crack for me.

Code 40947165304a6d11f42cdfc25d35bd16:4J
e08fc485843af6d9fb32681c7ffcc790:m7
06a3debae1899e25803cc511b5cb4115:O5
Im not sure what the data after : is used for.

VipVince - April 10, 2012, 5:02 pm

FCKEDITOR is not the greatest for getting shells uploaded I have noticed.

bch195 - April 10, 2012, 5:06 pm

Yeah its very unreliable.

Anyways, Vip, you able to crash that hash I am having trouble with?
