Thread: [\[ADVANCED NETWORK ANALYSIS\]\[\\$699 VALUE\]Capsa Pro 7\[FREE\]\[TODAY ONLY!\]](#)

Ziexxx - April 10, 2012, 4:13 pm

Hey guys, I just wanted to give you a link I am sure some of you will enjoy.

~I did not make the software or the website distributing it, just telling you it is available ~

Capsa Pro 7

[img]http://www.giveawayoftheday.com/wp-content/uploads/2012/03/capsa120.jpg[/img]

Information:

Capsa Professional is a portable network analyzer for real-time packet capturing, 24/7 network monitoring, advanced protocol analysis, in-depth packet decoding, and automatic expert diagnosis.

An edition for network professionals. Capsa Pro offers all the necessary features of a top notch network analyzing & monitoring tool at an inviting price. It will far exceed the basic needs of IT professionals for network traffic monitoring and protocol analysis.

Market Price:

USD 699.00

Key Features:

Real-time capture and save data transmitted over local networks, including wired network and wireless network like 802.11a/b/g/n;

Identify and analyze more than 300 network protocols, as well as network applications based on the protocols;

Monitor network bandwidth and usage by capturing data packets transmitted over the network and providing summary and decoding information about these packets;

View network statistics at a single glance, allowing easy capture and interpretation of network utilization data;

Monitor Internet, e-mail and instant messaging traffic, helping keep employee productivity to a maximum;

Diagnose and pinpoint network problems in seconds by detecting and locating suspicious hosts;

Map out the details, including traffic, IP address, and MAC, of each host on the network, allowing for easy identification of each host and the traffic that passes through each;

Visualize the entire network in an ellipse that shows the connections and traffic between each host.

Notes:

- 1) No free technical support
- 2) No free upgrades to future versions

Hidden™ - April 10, 2012, 4:19 pm

Thank you very much. A great share for sure.

Ziexxx - April 10, 2012, 10:03 pm

BUMB

Sorry for the really LQ post here, but this is expiring in a few hours, and just making sure everyone who wanted it has a chance to get it.

To add some more quality, here are the system reqs for the software:

Recommended System:

CPU: Intel Core Duo 2.4GHz

RAM: 4GB or more

Internet Explorer 6.0 or higher

Rubber - April 10, 2012, 10:06 pm

Nice share man, pretty insane, expensive software for free and no shitcash to get to it. <3
