Thread: [\[Tutorial\] How To Make Your Own Signature If You're Not A GFX Artist \[Tutorial\]](#)

Sir - April 10, 2012, 4:59 pm

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/CYOS.png>[/IMG]

Writer: [Starstruck](#) I know there are a lot of members on here that don't have skills in GFX Design. So in this tutorial I will be teaching you the simplest way to create your very own signature that you can be proud of. And no programs are necessary!

Key Features:

Fill

Spoiler [\(Click to View\)](#) [IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Fill.png>[/IMG]

Outline Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Outline.png>[/IMG]

Shadow

Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Shadow.png>[/IMG] Effect

Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Effect.png>[/IMG]

Colors Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Color12.png>[/IMG]

Layout

Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/Layout.png>[/IMG]

Follow these steps and you can create your very own text signature:

Go to <http://www.cooltext.com>

On this site you can create your own logos, buttons, banners, etc.

Select the type of logo you would like as your sample.

Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/cooltext1.png>[/IMG]

I usually use the one shown in the spoiler, because to me it seem that I have more options on what to do with it.

Editing your Logo

I'm going to create a logo using the logo style I selected in the previous step.

Spoiler [\(Click to View\)](#)

[IMG]<http://i19.photobucket.com/albums/b168/OmegaSaiyan/cooltext2.png>[/IMG]

The first thing I am going to do is change the order of the objects in the logo. To do that you simply click "Layout" and I'm going to make it so the picture next to the Text is centered behind it.

You want to set the picture color number to #333333 (Be sure to set the Fill and the Shadow to "None"). That will make the picture transparent on Hack Forums. I will then set the size of picture to 10, so it's as small as it can be.

Then go to where it says Line 2. Change the font size to 5, and set the color to #333333 (Be sure to set the Fill and the Shadow to "None"). Then replace the text "Graphics Generator" with a "." so that it's virtually invisible on HF.

Now go back to Line 1. Change the text to whatever you desire, in this case I'm going to use "The Alliance."

This is what it will look like so far:

Spoiler ([Click to View](#))

[IMG]http://i19.photobucket.com/albums/b168/OmegaSaiyan/cooltext3.png[/IMG]

I'm then going to change the type of font I would like to use, there is a mass list of different styles of fonts that can be used or downloaded here.

I am then going to go to "Gothic" and select "Plain Black."

Then I will change the Render on "Line 1" to "Three-Dimensional Sharp."

This is what it looks like so far:

Spoiler ([Click to View](#))

[IMG]http://i19.photobucket.com/albums/b168/OmegaSaiyan/cooltext4.png[/IMG]

Now I'm going to start changing some colors. I am going to change "Color 1" to Red and Change "Color 2" to White.

You can then change your Shadow, in this case I want to use "Glow."

And I'm done with my logo, now all I do is save it to "My Documents" and then upload it on an image hosting site.

Examples:

i.imgur.com

photobucket.com

Then I will Copy the [IMG] code on the image, and paste it here on Hack Forums.

Here are the results: Spoiler ([Click to View](#))

I hope you all enjoyed this tutorial, and I hope you guys find this nifty. I will be posting more beneficial things in the near future. Enjoy!

Sw1x - April 11, 2012, 12:08 pm

This deserves comments, people come on. :O

Thanks for this.

Sir - April 11, 2012, 12:14 pm

Thanks for the support. Hope this is helpful for some people.

Raf Simons - April 11, 2012, 6:42 pm

Nice tutorial. Great for people who don't have Photoshop. I used to do this.

Snow. - April 12, 2012, 5:18 am

Now this is a very nice and well detailed tutorial will definitely help newcomers.

Sir - April 22, 2012, 1:19 pm

I'm glad that all of you liked it, hopefully people that aren't able to easily navigate PS could use this to an advantage.

Pretty cool! Thanks for the share. Will help some people

Sir - April 23, 2012, 9:17 pm

You can change the font from default on there. Just thought you should know lol.

Justice - April 23, 2012, 9:22 pm

Nice tutorial man, very informative. Keep up the hard work.

?

Sir - April 23, 2012, 9:33 pm

See Jupiter, you can do things like this:

Gheckoz - May 19, 2012, 2:11 pm

Nice tutorial! I'm a beginner GFX and this is a great way to make a signature.

Akemi Nakamura - May 20, 2012, 12:04 pm

Nice Tutorial

I got this on my first try

Sir - May 20, 2012, 8:29 pm

Glad you found this useful. That looks very nice.

Visualize - May 20, 2012, 9:37 pm

Wow this is really cool! I wish I could use pictures in my avatar so I can put this to use.

Very nice tut Starstruck!

DeTaiLz - May 21, 2012, 4:42 pm

Very nice tutorial for new people!

Really nice.

Sir - May 22, 2012, 12:30 am

I am glad that you liked it. Hopefully I can release more detailed tutorials when I return.
