Chriss Crypter Modded Edition is not a valid win32 application.

Seems like your generic RAT fake error -.-

-mothered- - *May 26, 2010, 6:55 am*

Yeah, upon downloading and executing, my Norton AV 2010 was going crazy with alerts, thus ceasing the execution of the file.

I'll give It a crack on my other 2 lappies (with Trend and Kaspersky) and take It from there.

Cheers:)
