Thread: [\[Tutorial\] How to make Stars in photoshop from scratch!](#)

siemz - April 12, 2012, 6:29 am

Hey hack forums!

This will be my first tutorial on this forum, so please dont be too-hard with the judging, im only 15.
Also sorry or my bad English , i have dyslexia.!

What will u learn ?

To make photoshop generate stars out of nothing but a black background ! (As the sky ofcourse)

What do u need , any downloads ?

Nope, u need nothing at all , thats how simple this tutorial is , so lets start ?

Step 1 .

What u want to do is create a layer , and make the it all black with the (paint-)bucket-tool

Step 2 , the first step to generating the stars !

Go to :

Filter > Noise > Add Noise

Step 3

A Little window will pop-up that looks like this :

[img]http://www.habbbpad.nl/star2.png[/img]

Set the settings the same :

Amount : 10 %

Distribution : Gaussian

And Check the little box saying: "MonoChromatic"

Now it will look somethng like this :

Step 4 (Last step already !)

Go to :

Image > Adjustments > Levels

set the settings the following :

Preset : Custom

Channel : RGB

Input levels : 65 > 1,00 > 99

Output levels : Dont change this .

Now it will look something like this :

Done!

If u want to change the color press :

Control + U

And use the controls and play around with it till u get something u like, add text,.. and TADA
Done :)

Warning 1920x1080 IMG

Nice tutorial. The output is a really cool effect.

siemz - April 13, 2012, 8:12 am

Thanks :) ,

Sorry i forgot to include :

When u go recolor them and use control + U

(or cmd + u on a MAC)

Check the box "Color"

:)

Pretty nice, stars are prett pixely but that might just be cause u pixelated them with mosaic? (Random guess ?) ,

nice i like it :) Maybe bit overlighted, but thats all

4/5

Cyanide. - April 17, 2012, 10:43 am

ya i pixilated them purposely i think they look better like that and as for the lighting i know that, i couldnt get a balance between good lighting and not covering the text but i think as for the first pic i put on hf its not bad ... Thanks for the rating :)

this one is without pixilation
