jcshooter - August 21, 2012, 12:06 am

looks like a cool booter i would love to try this

hello_motto - August 21, 2012, 4:01 pm

can you upload on youtube it's beter than mediafire

7ewis - August 21, 2012, 4:52 pm

You can't upload files to YouTube?

OP- I skimmed through the video, as it was a bit long to watch without the sound, I know it's not your fault though, so just to go over what you did quickly..

Setup a site with SPAM, uploaded some files and a database (Legion) then logged in and started booting?

I read about the shells, but didn't see that part of the video. I am new to shells and don't really know what they are, and how they work. Please could you explain or give me a link? Also do you have to upload them too?

skillzforme - August 22, 2012, 5:53 am

guys you know any webhosting site that will allow you to upload those sources? i tried it to 5-6 and i got suspend ..

Humanity - August 22, 2012, 9:44 pm

When my friend tries to get on the site it says its under investigation.Or something like that please help!

Photo. - January 29, 2013, 4:06 pm

Welcome to HF sir! I would just like to point out for people who want to use this for prodigy + team313 source DO NOT USE SPAM it does not work as it disables 'set_time_limit' I'm not sure if there are any hosts anymore that allow this function.

Best Regards

As I said before, I am not almost new to the hacking world. I want to see if I can do it for fun ! I know how to get cover so I believe that with some help I can get admin control.

PS. I'd like to see some data related to our marks. Also, here in Greece, we have just finished school so I have nothing better to do than play games when I am at my PC. (I of course go swimming in the afternoons !)

Yes, the site will not work without mysql. That part contains all of the login information and most likely shells.
