Method: "Symlink Bypass"

Symlink Bypassing is a method which is used to access folders on a server which the user isn't permitted. For example the home directory can only be accessed by a root level user. However with symlink bypass you can touch files inside home directory. It allows attackers to bypass open base Dir and extract the configuration file from other domains/websites hosted on the server your shell is on.

Here's a Step-by-Step Video Tutorial using the WSO shell and the Needed scripts to achieve symlinking from your uploaded shell.

Thanks for viewing my thread. & Enjoy! ?

BeggFoMercy - April 12, 2012, 3:16 pm

Awesome dude , Gonna take a look at it , Keep it up

HeXagone - April 12, 2012, 3:17 pm

Finally someone made a tutorial about symlinking
That will help a lot of hackers
Good work

HeXagone - April 13, 2012, 5:12 pm

(Apr 13, 2012 04:21 PM)m0bil3_xT Wrote: [\[CITE\]](#) Thanks I've been meaning to post this method but I wanted to test it to see if I could get it to work for me, and it did. I use the WSO shell alot so it was fairly simple..but I think symlinking is alittle more advanced to the average skid so I dont think there will be many replys on this thread until they underdstand that other sites hosted on that server are all accessible. ?

Agree but there are some who can understand this and hopefully they succeed hacking a lot of websites !

Skids if they don't learn they'll never hack

If they don't hack they'll never learn

CyberSyringe - April 17, 2012, 2:30 pm

For some reason the web server doesn't execute perl. Apparently .pl files don't execute on the webserver.

Anyway to fix this? Or do I have to actually install perl client sided?

The Ion - April 30, 2012, 4:28 am

Good work dude keep it up will be using it good job

nck0099 - April 30, 2012, 6:52 am

Good work dude keep it up . Really a nice article

sh0v0n - April 30, 2012, 7:29 am

thank you dude.It helped me alot about hacking.Now hacking things

Error667 - April 30, 2012, 7:42 am

Thanks for this, i will try this really soon.

Binsbergen - April 30, 2012, 12:17 pm

Just watched your tut. Looks great to me, and I am going to give it a try myself right now - Thanks!

Arata Goru - May 12, 2015, 5:14 pm

Can you give me the shell that you used in you tutorial?

BenkaTv - May 12, 2015, 10:43 pm

Cool guide ;) i will check it out thanks bud

NiggaNeww - May 13, 2015, 8:36 am

Awesome, just watched it. It's pretty nice!

Unpuzzled - May 13, 2015, 10:12 am

Finally someone made a tutorial about symlinking

That will help a lot of hackers
Good work

nepHaXOr - May 20, 2015, 7:46 am

This is awesome. but it doesn't work on my site

seedhabandha - September 30, 2016, 1:04 pm

i am facing this ERROR 500 - INTERNAL SERVER ERROR when i copy/paste and click on get config button. ?

cwaz - September 30, 2016, 2:45 pm

Going to give it a go and try this. Thank you
