Thread: [Good VPS to host PuTTY Booter on](#)

MrPaxio - April 12, 2012, 8:59 pm

I've been using 2host.com for the past month to host my PuTTY and it hit people offline pretty fast but it wouldn't hit people offline who had good internet. I've checked my 2host VPS and it shows it only runs at 9.7mb/s... I'm going to buy a new VPS tomorrow and I have been looking for faster VPS and I have found one at rethinkvps.com, SHARED 1000mb/s for only \$8(\$3 more than 2host) What would my speed be if it's a SHARED 1000mb/s? and would it be worth it? if you know any good VPS I should check out in the \$10 range please tell me about them :)

I have tested the download speed of the 2host VPS and it only downloads at 2.4M/s :/

DaDDy DDoS - April 12, 2012, 9:07 pm

Hey there.

I am new to Hackforums.

However, I am great when it comes to networking.

For \$10 you're not going to find anything that great, I know a site that allows it, but it's \$25 monthly

1gbps
unmetered b/w
offshore

MrPaxio - April 12, 2012, 9:11 pm

Thanks, But what kind of affect will the SHARED 1gb/s have on my VPS?

DaDDy DDoS - April 12, 2012, 9:23 pm

The VPS I stated above is unshared as well, if it is shared you will get a fraction of the 1000mbp/s, that is because the Dedicated server is 1000mbp/s, I can't give you an exact number.

That is, because the hosting provider may over sell the server, even if they do not, I would not waste my money on it.

MrPaxio - April 12, 2012, 9:28 pm

Thanks for the help :) could I get a link to that \$25/m VPS you have been talking about? oh also how can I use Remote desktop connector to connect to my VPS? I tried to use it but it didn't work on my vps...

Brav.e - April 12, 2012, 9:33 pm

Well, depends on how much money you're willing to pay. A great reliable VPS is hosthatch.com. Very powerful and reliable as well. Now, some people sell cheap and strong VPSs here as well. I got a; Unmetered Bandwidth, 1GB/s, VPS for about 3\$ a month. You gotta look around in the Marketplace section and see what you find.

anonymousshacking - February 25, 2013, 10:02 pm

yes my vps puts out 200mb and I sell it for 10.00 a month add my skype zackwif

DannySellsPuTTYs - July 19, 2016, 12:30 pm

Selling PuTTY Booters add me on skype- scarybarry12 10 paypal for normal server hits off less than 10 seconds add on skype for more details and prices and power.
