Thread: ([Help](#)) [How to make a Deface page ?!](#)

einstijn - April 13, 2012, 6:37 am

Need help to made my own Deface page, And how i can use it ?

kugeldusch - April 13, 2012, 6:40 am

you make a deface page by writing it in a web language of your choice like html
you use it by inserting it in the publichtml folder of the server and name it index.xxx
xxx stands for the extension used by your page

The Rad Russian - April 13, 2012, 6:44 am

You should learn HTML and some Javascript. It's probably the easiest thing to learn (HTML). There are some tutorials on XSS in the website and forum hacking section.

Grin - April 13, 2012, 6:48 am

You can learn HTML or just get a program that soes it.

crimezy - April 13, 2012, 7:37 am

Yeah, I quote.

You'll be able to make great deface pages learning HTML, because it's the simplest language for web pages.

If you don't feel like studying, then get an HTML editor, so you'll create your own page without difficulties, then you'll save it as the index.html

Hope I helped!

The following resource should be useful for you if you're interested in learning how to make a basic deface page. If you're looking for something more advanced, you'll need to google PHP and Photoshop for more information. ;)
