Thread: [\[XSS\] Oracle - Bigpond - AdultSwim \[More included\]](#)

I forgot I saved a list of XSS vulnerabilities I found in big sites, just happened to stumble across it today looking for something.

Anyway, since 90% of HF is mainly interested in XSS now, feel free to claim and use check these out, check out the source code of the pages and learn how I came to the conclusion of a possible XSS vulnerability.

My XSS tutorial: <https://hackforums.net/showthread.php?tid=1212236>

Okay, so you can do Javascript alerts: <https://hackforums.net/showthread.php?tid=2395216> <--- Even though I'm doing the same, I posted these for learning purposes, not trying to be 1337 h3k3rz.

They can be found in sites large or small. It just depends where you look and how you look.

However, great job brother :)

I shall put that in :).

I feel like a hypocrite, since I did the same in a way, however these are big sites.

But I have no intention of causing damage, just trying to help educate users.
