Not another deface page... But you should change the background, the black text box don't fit on it. Plus the background is kind of old now, so try to find another one. But i do like the black text box.

Don't be a fucking dumbass, if you dislike people posting about their deface page then move on, and don't post.

I -3 arseholes like you, and will make it first on my agenda for tomorrow.

And to rate your page, it's alright, but I would prefer it if the text went faster, and there was sound/music. And you're spelling of "Security" is incorrect.

Re-check grammar. And it takes sooo long!

WhoAmI??

Okay thanks for pointing it out, much appreciated.

I would change the background its used far to much. Speed up the text as i can't see anyone waiting that long to see what you are saying. Correct all of your spelling mistakes. major example below.

Website secuirty... 0%

Your border is the wrong size to fit your text in so major overlap going on.

No music?

Overall 0/10

I am not being nasty just giving you a rating.

If you need any help you can send me a pm i am always willing to help anyone :)

mggot4life - April 13, 2012, 1:34 pm

I think that it needs some tunes, really can make a difference in it.

Ganzul - April 13, 2012, 1:39 pm

I like your deface but the text is not in the group

Fix typo :3, security instead of security.

Other than that nice work.

I wish people would stop admitting to defacing websites to HackForums.

No wonder prisons are running out of space.
