Simple, but the message gets across. I fixed some gramatical errors and posted the text that should be there.

Some images and stuff would look nice though as well.

Tau - April 14, 2012, 6:25 am

That is some pretty dramatic music you have there. The Admin is going to shit bricks when you
deface a site. Nice page ;3

Deer With No Eye - April 14, 2012, 6:25 am

I must say, this is my favourite deface. Although I cant get into the technical stuff because I honestly
dont know much about defacing a page, but this is just the best. I love the sense of control and
calmness in your message. 9/10 (as nothing can be perfect!)

404NameNotFound - April 14, 2012, 6:46 am

That's pretty sick man, I'm just getting into that shit myself :D

Spitfire - April 14, 2012, 6:52 am

Nice deface.

Only thing is that your image have some texts on and last one (Tango down!) have black color.
(9/10)

I didn't actually hear the music, but the deface page is really nice. I like the whole green text pages,
but it tends to be over done. This is a good balance of simple, clean. With that hacking feel.

8/10 (due to not being able to comment on the music)
