Thread: [Any method to obtain free domain?](#)

prohost - April 14, 2012, 11:07 am

Hello there,

I'm wondering if there's any working method that is able to get you a free working domain.

I remember the intuit method, however I've lost the method when I re-formatted my PC.

I would be very glad if someone could point me to one. I would not like to comit any fraud.

Regards,
ProHost.

Hello there,

Is it possible to obtain a .net?
That's what I'm mainly looking for.

Regards,
ProHost.

I'm pretty sure, 000webhosting.com offers free webhosting only downside is you have to design it on there own site which limits features!
