Thread: [\[Private Shell\]Linux kernel Web 5.0 Private Shell by Susp3cT **IN DEVELOPMENT!**](#)

Susp3cT - April 16, 2012, 5:14 am

~ Susp3cT Web 5.0 Private Sh3ll! ~

[img]<http://dl.dropbox.com/u/66529409/susp3cth4x2.png>[/img]

First of all I would like to challenge you guys from HF, which has been judging me too fast!. I am about to develop a private sh3ll which will contain a 0day for this kind of webserver. I will be able to compromise a large company with this, and as well. I do have the ability to TakeDown, other web 5.0 kernels on linux.

Reason for developing this:

Code A bunch of skids around HF, are really about to piss me off, and therefore I have chosen to develop my own upcoming sh3ll, which ONLY ME, would be able to access.

Just to prove some kind of straightforward conclusion, of that if you guys think I can't code?! - well think twice before you assholes act.

[*] You will not be provided with the shell

[*] This is only a preview, on it!

[*] Only ME, would be able to exploit this.

And now a quick review on the sh3ll, on login screen.

Of course you always need to have a secure authentication in this progress!. So I did as well!

[img]<http://desmond.imageshack.us/Himg405/scaled.php?server=405&filename=susp3ctsh3ll.png&res=landing>[/img]

L8ter bitches !!!

Truth Will Out - April 16, 2012, 5:18 am

damn it looks pretty well, dont let the skids on hf bring you down, keep it up man :)

Th3PonyWizard - April 16, 2012, 5:31 am

You're developing a shell, only for you, and you post a thread about it.

You're developing a shell to prove you know how to code.

It's some kind of 0day that has never been seen before. YEAH RIGHT.

The preview is a shitty HTML page.

Looking at your other threads, looks like you claimed to code stuff which was a lie.

Attention thread much?

In addition, give me one good reason to actually care about your '[Private Shell]Linux kernel Web 5.0 Private Shell'.

Phizo - April 16, 2012, 5:33 am

I wonder where you got than inspiration, haha ;).
Looks cool.

AntiPaste - April 16, 2012, 5:37 am

<https://hackforums.net/showthread.php?tid=2405996>

I bet this shell will be awesome in the hands of a coder as good as you, it looks as though you just made the front page barely.

These lines made me laugh the most:

PHP Code

```
<?php  
echo "You are the best, " . $username || " This is NOT, the right username!";  
echo "<br>You did not enter a correct username buddy!<br>" or die;
```

Susp3cT - April 16, 2012, 6:48 am

Attention thread much?

In addition, give me one good reason to actually care about your '[Private Shell]Linux kernel Web 5.0 Private Shell'.

First of all, to point it out, I hate this kind of disrespect, I will not allow anyone to ruin what I can develop here. Not even you little skid, who are just posting a negative comment. You do not even know about me. Do you even know what an Ad-hoc network is ?!. NO you do not. fucking skid...

Just to prove a point, I got the inspiration from Phiz0 <3!

(Apr 16, 2012 05:33 AM)Phizo Wrote: [\[CITE\]](#) I wonder where you got than inspiration, haha ;).
Looks cool.

Thank you bro, if you did not motivated me to do this,
Well then I guess I did not even started ?

But I hate thoese assholes who are just judging me too fast!.

Watch and learn kids, when this is completed, there will be a tap for the Oday on the Web 5.0 Linux kernel. Trust me, I ain't giving up!.

I wanted to prove a point, when some suckers challenge me!, including Team Intra. Now you can wait to see a further preview ?

I'm a fighter, and that's why I NEVER BACK DOWN! ?

Muchos love for you Phiz0 <3

Lulz, watch and learn skid.

I did not implemented that code in my source!...

NOW, to all disrespect with you haste about me who are not tolerating people like you. I don't give a fuck.

I have no respect for people talking down to me like this.

This is the main reason for me starting this sh3ll, to prove a point of you guys from HF, which has commented negative on me!

HeXagone - April 16, 2012, 7:48 am

with -30 i'll not even think of use it !

Sorry not trusted enough

joomlafkr - April 16, 2012, 8:00 am

Man regardless of your reputation and your attitude !

Why are you trying to re-invent the wheel ? there are many good shells out there , and you can consider to take them as a skeleton and add your "private exploits" :p

We both know you can't succeed to write a decent shell from scratch ! just consider my advice ! and good luck !

" It's not personal, Susp3cT. It's strictly business"

I do not berate people without a reason. If you had a humbler attitude there would be no problem.

You post a thread about creating a fully equipped PHP shell with a 0-day exploit that you requested for only 4 days ago[\[1\]](#), using coding skills equivalent to one who has just started PHP[\[2\]](#) and act extremely arrogant about it ("You will not be provided with the shell.", "Only ME, would be able to exploit this."). Can you not see yourself why this reputation has been brought upon you?

The fool doth think he is wise, but the wise man knows himself to be a fool.

- William Shakespeare.

FastFive - April 16, 2012, 9:36 am

why the fuck is there a link to ebay on william shakespeare

this is pretty funny btw good trolling

Lion™ - April 16, 2012, 9:38 am

Exploited one website.

"IM NOW A PRO HACKZOR AND I WILL KICK UR ASS AND Hackforums"

Edit: If you see correctly, hes on "localhost" in url bar. On XAMPP.

Th3PonyWizard - April 16, 2012, 9:51 am

(Apr 16, 2012 06:48 AM)Susp3cT Wrote: [\[CITE\]](#) First of all, to point it out, I hate this kind of disrespect, I will not allow anyone to ruin what I can develop here. Just to prove a point, I got the inspiration from Phiz0 <3!

>You do not even know about me.

Gee, I'm a little confused here.

Based on your recent threads & Attitude & Overall lack of IQ, I'm calling you a liar, Script Kiddie, and immature. I don't 'know' you, I am stating my opinions which are quite based (Above) by your, again, threads & Attitude & Overall lack of IQ.

>Not even you little skid

Please tell me more about how the implied lack of my skills is related to my comment.

In addition (I'll quote you here): "You do not even know about me." Therefore you have no right nor ability to call me a 'Skid'.

>Do you even know what an Ad-hoc network is ?!. NO you do not. fucking skid...

One thing is to open a dumb thread and start bitching about it, but arguing over my knowledge level is just plain chlidish. And no, I've got no idea what the flying fuck you talk about, because I am kindly a web-platform developer (Unlike you <3) that sticks his nose only in his own pile of shit.

Do the world a favour, and somehow close this thread. It hurts my mind knowing people like you exist.

Susp3cT - April 16, 2012, 12:51 pm

Okay I really do not give a damn about all these negatives comments.
You will see Operation #TakeDown soon in action.

Watch and learn kids. You all think, you are that smart.
Well guess what, when I finish developing this,
you will be begging on you're knees to grab this shell.

- To all you fuckkers, who do not know my reliabilty of work, well as told, I am a fighter,
I do not give up, untill I reached my goal.
I never back down!...

/ Over & Out .. You should have expected it coming!

To also just mess with you Team Intra bitches, I do not give a damn, and do challenge you guys.
Come at me. Show me what you got. I am 1 person, you are several.

Let's see you're hacking skills, when it comes down to reality.

Appliance Warehouse - April 16, 2012, 1:02 pm

Wow! Very impressive. Why would you try to re invent the wheel?
Also, what does this shell do specifically that makes it sooo awesome? Have any proof?

HiniAes - April 16, 2012, 1:04 pm

I lol'd at this thread.

I read your whole reputation history and I have a one word to sum your behavior on HF "Skiddie".
Don't feel bad your just wasting SQL space on this web server. No one cares about your private
shell if your just using it, unless you share it. I've already developed my own PHP shell.

My opinion about this thread or "Quick Reply".

I you can't my Windows XP SP2 not even updated pure XP SP2.

+ Stop arguing, I always finish the job. Anyways honestly the login page looks -OK- for your shell.

Susp3cT - April 16, 2012, 2:08 pm

(Apr 16, 2012 01:02 PM)Uranium Wrote: [\[CITE\]](#) Wow! Very impressive. Why would you try to re
invent the wheel?

Also, what does this shell do specifically that makes it sooo awesome? Have any proof?

It's not just you, who are think of this should be impressive.

Many are jaloux cause I got the knowledge... People do just not understand it.

I am currently working on layout, GUI interfaces, and how the site is about to be organized, in my
own way, which I want.

I'm going to add some tabs, in the sh3ll index

To make the shell a bit more secure, I added a login screen as you may see.. Secure is a high set
of aspect now days.. So I added mine too!

By the way, if you are wondering about the submit button,
I'm the only one who like some sort of joke perhaps! ... ?

[*] Execute commands & Read output files

[*] Oday Exploit for Web 5.0 Linux Kernel (private sh3ll by Susp3cT)
[*] Symlinking
[*] Reverse engineering! - aka. enumeration
[*] Automatically mass deface!

Here is an example on the interface which is DONE!..
now back to coding..

[img]<http://desmond.imageshack.us/Himg171/scaled.php?server=171&filename=susp3ctsh3ll.png&res=landing>[/img]

-DownFall - April 16, 2012, 2:36 pm

Not to put you're work down or anything, but considering the attitude you brought into the thread, I'm going to be honest...Your shell looks crappy as hell lol. Why make a thread bragging about your private shell you aren't giving away when there's public shells out there 10x better? This is something you should keep to yourself and not share with the assholes of HF lol.

Susp3cT - April 16, 2012, 2:38 pm

(Apr 16, 2012 02:36 PM)-DownFall Wrote: [\[CITE\]](#) Not to put you're work down or anything, but considering the attitude you brought into the thread, I'm going to be honest...Your shell looks crappy as hell lol. Just so you know ... This aint the shell ? Only an authentication restriction! ...

You need a authorized user to be able to use the shell, which will after redirect you to the right page,
where you will see all these tabs & nice layout.

Might do some research, before you start posting! ;-) ... There is NO Web 5.0 Linux kernel exploits out there..

Only I'm the one who are going to code this son of a bitch

I am going to provide prove, soon or later. Do not haste... Keep it real.

Malwarebytes® - April 16, 2012, 2:40 pm

looks fucking sweet bro....are you going to be giving away a couple logins for free?

Susp3cT - April 16, 2012, 2:44 pm

If you guys were even nice to me, I might wanted to might give some access for a review.

But since all are against me, and not speaking nice to me... Well I do not give a fuck anymore..

All thoese who had being disrespecting me, are going to take it back, afterwards I have finish developing...

I want to make a difference!. WHICH I AM GOING TO!.
NEVER BACK DOWN!

I like to see people get jaloux ? !

Malwarebytes® - April 16, 2012, 3:20 pm

im down to helping you bro....please pm me

Sasori - April 16, 2012, 3:30 pm

Lol'd hard at this thread.

Here we go.

(Apr 16, 2012 05:14 AM)Susp3cT Wrote: [\[CITE\]](#) I will be able to compromise a large company with this, and as well. Alright, well when you do so, make sure to post it for us. L33t hax0r.

You failed dude...

an ad-hoc network is defined as an Independent Basic Service Set - IBSS.
It consist of at least two stations communicating without an AP (peer to peer mode)
AP = Access point.

AP is usally refered to as "Master mode", while STA is usally called "Managed mode".

Good luck skid, try again, when you got the expertise ?
Haha! u just got trolled!

Sasori - April 16, 2012, 4:24 pm

You know, the whole point is not to review the whole damn code ...

That is why I did it like this. Just to proof some concept, that it's on going project. Still in development. ?

fobber - April 17, 2012, 7:07 am

Hey Susp3ct.

I've never had anything against you. But you do seem to have some temperament problems. In most of your posts you call someone "Skid", "Asshole", "Idiot" or something similar. That's not the best way to get respected.

Anyway. Good luck with your shell, Susp3ct!;)

Susp3cT - April 17, 2012, 9:40 am

"Fuck off everyone... This was just an Idea."

You don't copy a sh3lls code, put it in as yours with your own logo, and call it an idea.

An idea would be a thought in your mind of how it should look.

Your such a good coder, you shouldn't need to do this, at all.

"I'm going to make my own code you fucking skids! -GTFO my thread, if you do not speak nice to me."

Why do you get so protective? Why can't you act mature, and actually do something by yourself for once?

I'm starting to think you're just a troll. I mean seriously.

Apparently your the top dog here as well as the guy who speaks nice to everyone.

Then we are the skids who know nothing about hacking, especially when we catch you lieing.

"I do not tolerate people like you!"

I can't stand to tolerate an imbecile like you.

I was careful, however sometimes you can never escape your fate.

I know very well what you're capable of, they consist of the following:Copy and pasting code.

Terrible English, grammar and punctuation.

Immature kid who acts powerful with his 31337 sh3|| that isn't even his.

The list is endless however. I'll be waiting for you next reply, should be rather amusing. It will most definitely consist of "skid" and "GTFO", not excluding the almighty Susp3cT's catch phrase "you will bow to your knees when this is done".

Phizo - April 18, 2012, 2:27 am

(Apr 18, 2012 02:21 AM)Susp3cT Wrote: [\[CITE\]](#) Don't you worry motherfucker, let's see what's happen when I post something to the goverment about you.

You should not be using this forum. and for the sake of disrespecting, YOU, are the one who are going to bow down you're knees when I'm going to figure out about some nice dox to handle out to

the FBI & PET, also the government, which had hold on you're sorry ass.

Let's see what you got kid. ?

Don't you worry motherfucker, let's see what's happen when I post something to the government about you.

Good luck with that, I've been permitted access as long as I don't perform any malicious acts. There's a flaw to every plan.

YOU, are the one who are going to bow down you're knees when I'm going to figure out about some nice dox to handle out to the FBI & PET

I told you, you would definitely use that catchphrase. You're stupidity never fails to amuse me. Also, good luck with getting a dox on me, and good luck reporting it to the FBI & PET since they can't even get near me. They weren't even the ones who caught me in the first place, you truly are an imbecile.

Stupidity sure is a hideous thing. I'll be waiting for your next reply, amuse me.

Sasori - April 18, 2012, 2:50 am

(Apr 18, 2012 02:43 AM)Susp3cT Wrote: [\[CITE\]](#) Oh yeha, that's too sad, cause the FBI & PET do not know as much as I do ;-) .. I will do a nice dox, don't you worry on that. I will handle it out to them, since you did attempt on a SQLi, which is illegal, even though it was as a challenge. This is still a malicious attempt, also with the XSS statement, which you posted in the thread.

Okay, I have all the paste bins with your name on it.

I have tons of documentation of all your posts, threads and recent activity on here.

This includes, but is not limited to:

'Building' a sh3ll.

Hacking into websites.

Stupidity.

Should I bother to report you? I think I have a good DOX still with your details on it. Unless you're a certified White Hat, you can do tons of time.

Zhen. - April 18, 2012, 2:50 am

I couldn't help it noticing how you fail so badly Susp3ct.

First, you go on developing your own shell and you ended up copying the GNY shell.

Now you're becoming a fuckin' pussy claiming that you have what it takes to bring the feds and arrest Phizo.

Judging by your posts and attitude, either your dad was totally mistaken not using a condom when he fucked your mom, or you're a fucking inbred son.

GTFO of HF before you fail even harder in such a way your mom will notice and stick a pole up your ass.

Phizo - April 18, 2012, 2:51 am

Instead of some XSS threads flooding the forum.. why not make a secondary user, and start flaming users. ?

XSS threads flooding the forum, I totally agree with you.

"skid 1337 h4x0r" who codes in "python"

[img]http://screensnapr.com/e/8so9QP.jpg[/img]

Please, learn some things before posting. Oh and yeah, you should read the above requirements especially the first one.

Seriously?

I knew this troll was a waste of time.

It's his secondary account, he must be someone else here.

Seconday ? - if you know how to get a public ip & new mac address, then no forum can detect, if you got another user...

You can have that many users you want to. But the thing is, if you get detected... It's OVER, with the first user ;)!

And you thought I don't know that?

You're so smart! /sarcasm

Ironic, isn't it? The user who complains about XSS threads is also the one helping flood the section with XSS threads.

I will gladly forward that message to admins and get you banned =).

Oh and for some reason it's not GhostMX anymore but here's your 2nd account:

Nice find right there Exotz.

This fag was against Intra before, I believe I have every information about him including his Facebook profile. He IS really a skid, not to mention a wannabe hacker.

Phizo - April 18, 2012, 5:19 am

Good work to the two users above, this fool is just making himself look more idiotic by each post. He has broken a numerous amount of rules, let us see how long it will take for him to be banned.
