Thread: [THREAD DESIGN | TUTORIAL | AMAZING | EASY TO FOLLOW](#)

Ghost. - April 16, 2012, 11:42 am

I've always loved the apple operating system found on ipads and ipods etc so i decided to make a tutorial based on that theme.

A lot of time and effort has been put into this and i hope you enjoy it.

Tex - November 4, 2012, 3:03 pm

awesome bro thanks for this awesome tutorial :)

Ray Bands - November 5, 2012, 8:04 am

Can you tell me what the color codes are for the gradients that you used?

It's hard for me to go based on a picture, I'm colorblind :/

Edit:

God damn it! This is so frustrating.

I've got the first gradient down, it's the vector shapes that I'm having trouble with. I can't get the divider to fade properly.

ProtectNull™ - March 29, 2013, 5:37 pm

Thank you for the tutorial. This is the tut i was looking for. Now i can make awesome threads!
