Thread: [Sorry i always get these mixed up is a TCP shell a get shell, and UDP and post shell?](#)

ShaneClare-HF - April 17, 2012, 9:20 am

Sorry i always get these mixed up is a TCP shell a get shell, and UDP and post shell? Thanks

Skep - April 17, 2012, 9:21 am

Vise-versa really.

UDP GET

TCP POST.

wacked3 - April 17, 2012, 1:02 pm

I am sure that you will just reply that you were trolling and not serious at all. Sure.

Your signature implies that you have advanced knowledge and thus noobs will believe this and spread that kind of bullshit.

UDP GET

TCP POST.

Damn i've seen some epic trolls before, but this is by far one of the best yet.

Way to go ?

GET and POST refers to the way the script receives the target info. It's either passed on from a direct url (GET request) or it's sent POST from a from inside the page or on another page, post can also be sent in the header when using sockets from an application or another script.

Swish - April 17, 2012, 2:41 pm

They both are UDP, it's just the way the forms sends the information.

POST = UDP

GET = UDP
