Thread: [Need Help Installing Nulled vBulletin](#)

Bladder - April 17, 2012, 4:43 pm

I am going to start a forum and want to see how it goes out.

I want to use a nulled version of vBulletin for now since a license is pretty expensive but I will eventually get one after seeing how my site goes.

The only problem is I dont know how to install it and was wondering if someone can install it for me and maybe add a skin. I would like the latest version of vBulletin if possible.

To be honest I dont have money to offer especially since I dont have PayPal. But if someone is generous enough to do it for free that would be great, I would be more than happy to make you an admin on my site if you decide to stay.

Please PM me if someone can help.

Thanks

adamturner123 - April 17, 2012, 4:43 pm

i can get u someone to set it up find me a web shell source ill help u if u help me u got aim

You don't know how to make a forum, nor do you have access to money. I guarantee you this site your trying to make is going to fail.

Not trying to be mean, but it's the truth.

EliteKane - April 17, 2012, 5:59 pm

I'm willing to set-up your vBulletin for free, no problems. You may add me on Skype @ elite.kane or YIM @ y.games_kane

You never succeed without first failing.

You never succeed without first failing. Seems logical, OP should realize that this will only serve as experience, and nothing else.

If this is going to be your first website/forum I suggest you use it as practice and learn to set it up

yourself.

You're not going to succeed asking people to do your work for you.
