Thread: [Joomla Shell upload \[2 Methods\]](#)

Zhen. - April 19, 2012, 10:55 am

Hey guys, I haven't written any tutorial here for a long time now.

Thought I'd share my video with you guys on how to shell Joomla sites using two methods.

I had only 20 min free time to make this. So I hope you'll like it.

2 text tutorials have been made on this method.

Visit Hax0r's or HeXagone's profile for more info on Joomla shelling.

Greetings to all my brothers. (They know themselves <3)

Dear sir,

Nice tut!.

Which kind of theme are you using for the background & mouse n' stuff.
Really looks nice! - would love to get that ?

Sincerly,

R3verse

No one knows o.o

But I know one thing, I'm somewhere invisible in your room D:

It's a custom theme I've made on my own.

Thanks for your feedback :)

nice video man. quality is great and methods are nicely laid out for people to follow. Should be great reference for everyone to use. HQ as usual!

BeggFoMercy - April 19, 2012, 3:25 pm

Dont tell me that u got a way to shell joomla's Last version update.. Because it has no access to edit the template HTML :)

I have more than 2 methods of shelling a Joomla site.

The latest version prevents the templates from being updated, but I have another method that doesn't involve using templates.

Will be posting it soon. :)
