Thread: [\[Release\] Packet Dropper / Force Lagger](#)

Killer1478 - April 19, 2012, 4:05 pm

Packet Dropper v3

What Is It?

Most useful in a P2P Environment, it causes latency + drops packets. Which, If you've ever played a P2P Game, can give you a advantage.

What Are The Features?

- Two Different Methods [Constant Method/Spike Method]
- Speeds Can Be Set Anywhere From 8MB/s -> 7KB/s
- Tool Tips Incase You Need Extra Help
- Easy To Use; But Good Looking UI
- Built-In Latest Version Check
- Built-In Hit Counter
- Multiple Threads

Can You Prove It Works?

Regular Ping Test

[img]http://www.pingtest.net/result/61262710.png[/img]

Packet Dropper Enabled

[.Net Framework 4.0](#)

Insightful Information

- The Speed Is Based On Sleep Time! The Lower The Number, The Faster The Attack.
- It Is HIGHLY Recommended To Use A Network Meter So You Don't Go TOO Fast.
- If You Would Like To See The Source, Post Here Then PM Me!
- If You Have Any Questions, Post Here Or PM Me!
- This Does Connect With My Website To Check For Updates!
- Was Not Obfuscated. Feel Free To Look Through It!

Special Thanks

Sent. Enjoy.

@Smasher, Its unprotected because it's not like there is anything revolutionary that I have to prevent people from taking.

li0nsar3c00l - April 19, 2012, 11:09 pm

Id like to get the source. nevee saw something like this before

Jash - April 20, 2012, 12:28 am

Will you share the source with me too, please?

:) :) :) :)

Percocet - April 20, 2012, 12:32 am

You should also mention that if you use it too long you'll get disconnected...

Note: This uses your home connection, so be careful.

Penthos - April 20, 2012, 1:34 am

Looks good nice share :D and nice simple effective layout :D

Killer1478 - April 20, 2012, 10:23 am

If you disconnect, you did not configure it correctly. Maybe I should have specified a little more.

You are supposed to set it so you get a little bit more latency, as you see, the dropper only added about 40 latency to me, but added 50~ jitter.

Source sent to those who have asked/PM'd

Nitrate - April 20, 2012, 11:08 am

Can i Please Have The Source ?

i would like to add more features to my Force logger :D

ill give credit :D

anyways whats the theme you used and how did you apply it ?

Killer1478 - April 20, 2012, 12:06 pm

Sent.

The theme was a slightly modified Ghost 2.0 Theme.

Modified very slightly what happens in the control box.

Meerkat.? - April 20, 2012, 2:19 pm

The program looks very nice! I hate it when people lag the fuck out of a game though, but it's very nicely done :)

Thanks for giving me credits too, not a lot of people do that!

Killer1478 - April 20, 2012, 2:24 pm

Wow thanks, yeah I really like your themes, they are some of the best I could find. I hope you didn't mind me editing it slightly; and yeah, you obviously deserved credit for the theme and that was one of the requirements on your thread, so I went ahead and did it :p

D'awww, thanks :)

I really don't mind if people edit my themes. I really love it when people change it to their own needs.

Lol, thats good. Some people are purists and demand nothing be changed at all. Thanks again though. I can't wait to see if you have any new work planned.

i dont code or use vb or anything i was just want the program itself cuz all others out there is the

same as yours but with malware.

xwerswoodx - August 14, 2012, 3:29 pm

The program looks very nice i love it

Might wanna turn the speed down a bit, you seem to be lagging yourself a little too much.

MAtch335 - April 21, 2015, 4:19 pm

Can you send me the download link please? the one you posted isn't working. Thanks a lot :)
