Lol there was more GUI work in that then actual code, and look at the design :P. Anyways contributing is contributing good job.

sm00rhz - April 20, 2012, 8:31 pm

I vouch for this user right here, he is an old friend.

OfficialJunR - April 21, 2012, 4:34 am

Very simple to make this program in vb.net

Deadly Weathers - April 21, 2012, 6:51 am

Would you mind scanning the executable file?

zander345 - April 21, 2012, 6:54 am

yeh you can just type into the terminal:

Code ping circuitload.comor

Code nmap circuitload.com

replace with any url of course

And what point are you trying to make here?

1337 Haxxor - April 22, 2012, 1:17 pm

Version 2 Will be out soon. Here is a list of things that the update might/might not bringMassive GUI Update

IP/Website Online Checker

Help Page

Information Page

Thanks man & yeah i know that you can do it in CMD that's why ill be adding a lot more options to the program ?

NottzSoSimpl3 - May 3, 2012, 9:41 am

Amazing that is thanks man, thats going to be really helpful. I will use it to good use.
