Thread: [Propitious | Beginner Hacking Classes/Mentors | Lessons list](#)

-?Divine- - April 21, 2012, 12:55 pm

Awaken. You have been lost for too long, buried, in the mist of unknown shadows. Awaken. Your cries have been heard and they shall not be neglected. Come forward. You are grasping in the dark, blind for what is before you. Awaken, for I shall be your eyes. Call my name, and I will breach the darkness in path before you. Take my hand, and I will be the light that illuminates your journey. Come forward, and walk with us, for we are the vanguard of your purification. Dance in the rhythm of silence.

Classes will be held every Saturday. This is beginner hacking class, but since my knowledge is quite extended I will teach about anything.

Lessons:[Propitious | Lesson 1 - All about RATs](#)

[Propitious | Lesson 2 - Extension Spoofing](#)

[Propitious | Lesson 3 - Java Drive Bys](#)

[Propitious | Lesson 4 - Crypting & Spreading](#)

[Propitious | Lesson 5 - Malware Removal & Security](#)
