Thread: [WHAT the FUCK? Who the FUCK do they think they are?](#)

Bboy Lee - April 21, 2012, 4:18 pm

Seriously. Here I am, ratted them and black mailing them with the chat box option in DC. Then guess what happens..

THEY FUCKING IGNORE ME AND GO ON WITH THEIR DAY. Sadly, Dark Comet doesn't have a stop mouse and keyboard(or do they?) option, so I'm in no position to say anything. Should I pretend to be the FBI?

Hawtie - April 21, 2012, 4:20 pm

They do dude, go to Remote Desktop then click on View Options then Disable Mouse and Keyboard. It doesn't work on all computers.

Prospect™ - April 21, 2012, 4:21 pm

Happened to me 2 times yesterday along with dark comet.. Trying to get BSHADES to work

Enlightened - April 21, 2012, 4:23 pm

I seriously recommend you refrain from incriminating yourself here. Blackmail is a serious crime.

Bboy Lee - April 21, 2012, 4:23 pm

That whole TRY to disable thing doesn't work.

Hawtie - April 21, 2012, 4:26 pm

Hmm, just block them from going to the website they are going on.

Cody8295 - April 21, 2012, 4:27 pm

Yes, try something like sending messageboxes with the info.

Bboy Lee - April 21, 2012, 4:33 pm

Oh but why? I'm just a prepubescent 12 year old that is pretending to have ratted someone! That's all!!!

Yeah, they've all been ignoring me.

j00l - April 21, 2012, 4:34 pm

You'd be surprised, this has happened to me a good few times too. Start to fuck shit up on their computer, delete important looking files (i.e. I used work files) and make sure they see you doing it.

Caillou - April 21, 2012, 4:36 pm

GO into the fun manager and his everything.

Then go to their windows and end every window.

Then go back to fun manger and spam message boxes saying you'll delete their files.

Next, open up a chatbox where you can negotiate.

If they still ignore you, delete everything LOL
