Thread: [How To Upload And Give Direct Download Link To Crypter \(Only They Can Download It\)](#)

Morchid - April 23, 2012, 1:25 am

I need to know how to upload my keylogger and send the direct link to this user to crypt:

<https://hackforums.net/showthread.php?tid=2401159>

How would I do this without them needing to complete any surveys/captchas and make them the only one that can download it? Thanks.

If possible a private link that only their account can view or a code that only they know - What website and how do I make it private?

daliborg - April 23, 2012, 5:11 am

Upload ti to mediafire and send him link.

Or you can use a free webhosting and upload your file. As long its not .php or .html You should be fine.
