Thread: [i need a portable c & c++ compiler](#)

zander345 - April 23, 2012, 8:45 pm

i need a compiler you don't need to install, does anyone know of one and if so can you post a link.

UPDATE:

i really need a linux one!

MUT4NT - April 23, 2012, 8:58 pm

borland compiler:

<http://www.bloodshed.net/devcpp.html>

He wants one which functions on server side, without having to download anything. Not sure if that's even created, I might be wrong.

But download Dev-C++

zander345 - April 23, 2012, 9:01 pm

i want one that can be run from a folder on my desktop and linux is the priority

That's not even the Borland compiler nor has DevC++ ever been endorsed with Borland.

OP, there doesn't seem compiler that doesn't require an "install" and is portable. Linux and Mac come with GCC (I think map comes with Crang or something) so you don't need another compiler.

D3vildog - April 23, 2012, 9:06 pm

Why not just install it to a flash drive? That would do the job. (Done it before)

zander345 - April 23, 2012, 9:07 pm

theres a compiler called PCC but i cannot find a download for it

MUT4NT - April 23, 2012, 9:41 pm

JosephKony: yeah, I got confused with Bloodshed :P

the Broodshed project is was discontinued, BUT there is "someone", that continued the project, the new version:

SUCHTI - April 24, 2012, 4:44 am

1: svn checkout svn://gcc.gnu.org/svn/gcc/trunk gcc

2: Then Compile it like you want it.

iVision - April 24, 2012, 6:03 am

Just install any IDE on usb, btw linux has standard a compiler I heard..?

That Poppy - April 24, 2012, 6:08 am

codeblocks maybe?

thats what this nubbie uses o-o

What are you talkin, why should a IDE only be made for beginners. Its the coder not the IDE who makes you good. Everyone has his preferences.
