looks great mate! =) would like to get a direct link =)

noober1001 - April 25, 2012, 12:42 pm

GUI is too good bro.

I would like to get it.

Please send me direct link.

Thanks

BaussHacker - April 25, 2012, 12:45 pm

Should make a php page and put it on a free host, then just send a httprequest from the keylogger to the php page and let it send the mail or even store the datas on there. That way your personal data is not in danger, but good job anyways.

ScreamX - April 25, 2012, 2:03 pm

It looks like something Microsoft would make :P. Anyway, good job!

Chappie - April 25, 2012, 6:21 pm

Looks good DeadLine, nice work man.

Wow nice Release , Like ur style ..

pm'd you for the downloadlink by the way :)

Homer Simpson - April 26, 2012, 5:07 pm

I'd love to have the source to this, might make a few custom modifications too...

:P

proTWiiZ - May 2, 2012, 4:45 pm

can i get this please? PMing you now..(:

magix2012 - May 3, 2012, 4:33 am

Just sent you a PM, I'd really appreciate it if you could send me the source :D

OiX - May 4, 2012, 4:17 pm

Looks Nice. Thanks!

Please send it to me.

OELABOELA - May 5, 2012, 8:07 am

Hey man, could you pm me the link? Thanks :)

Sending u a pm Thanks for the Share m8

simonbenyo - June 22, 2012, 4:17 am

it looks nice thanks br0 i would like to have direct link because there is no surveys for my country and keep up the good work ?

Ghoster - June 23, 2012, 6:34 am

I'll PM you. Looks interesting. I could probably learn from it.

mastermarre - June 23, 2012, 1:37 pm

I would very much like to see the source code for learning purposes.

PMing you now.

+Bourbon - June 23, 2012, 2:39 pm

Good job bro, seems to work quite efficiently. I'd suggest that you improve the format of your logs though perhaps by including the active Window Title.

FreeKushh - June 23, 2012, 2:56 pm

Could I get a download link?

Much appreciated.

You will need to open the .sln file or the solution file in order to open the project ;)

zapfen - June 29, 2012, 8:52 am

Hey Deadline :D

The Keylogger looks very nice if its possible for you to make an tutorial about the keylogger (without the gui and the sending to your mail)

would be very nice :D

k i did and its sending the logs! but its terrible: this is an example of a log i got:
DeadLine's Keylogger Log:
'delete' 820 'delete' 10000fut webb 'delete' app 'rshiftkey' 'enter' 'enter' luke 'Capslock' u
'Capslock' nicorns97f5f9davef9 'rshiftkey' 'rshiftkey' 'rshiftkey' 'rshiftkey' 'rshiftkey' 'rshiftkey' 11f9
'Capslock' h 'Capslock' ello 'Capslock' hey can you tell me what i did wrong plz 'Capslock' fraps
'enter'

like what the fuck is this im trying to steal someones password and this shit comes up

like it doesnt even tell me what website he typed it in

Jezus wat zijn ze allemaal dom hier niet erg beledigend bedoelt but this is a FUCKING source , not a binary file.

People only come her for the binary :S

Maar ja nice project deadline :P , ik leer nu php , kijken of ik straks php scriptje kan maken die ik c# kan gebruiken :D

Gelukkig verstaan de meesten je niet ;)

Maar wel goed dat je verschillende talen leert, en als je tijd hebt moet je zeker ook java leren en XNA, zeker aanraders !

By the way,

Enjoy your day !

Heh DeadLine is ook nl ?

Maar je hebt mijn vraag nog niet beantwoord:

What method do you use for logging the keys?

Sorry, heb er vast over gekeken,

I use a global keyboardhook

Have a look:

Inderdaad , xna heb ik al een beetje bestudeert , het ziet er niet al te moeilijk uit.

and guess java is my next step :)

@eternal ja was ik al eerder achter gekomen haha :)
Alleen ik denk niet dat de mod's het leuk vinden dat we allemaal in het nederlands gaan praten :P.

Anyways Eternal && Deadline enjoy your day also ;-)

They are not, they just record everything.

You know, if you want you can always adjust things, the source codes are yours after all ;)

Enhypen - June 30, 2012, 6:55 pm

do you know how i can make it organized. like it shows me the website. such as:

[Facebook-Google Chrome]

hey man whats uo<delete>p

Exactly what I was thinking, lol. There's a thread somewhere on this forum actually, that teaches you how to sniff the email/password or FTP information from a keylogger xD

paulicask8 - September 14, 2012, 11:53 pm

Can i get a new link ? :D The actual one is dead :(
