Thread: [\[TUT\]How To Earn Money And Spread Your Virus 2\[TUT\]](#)

lorens13 - January 23, 2010, 9:51 pm

Hello HF members! Today I am going to show you my second part of How To Earn Money And Spread Your Virus. This tutorial is for education only and I am not responsible for anything that will happen to you. WARNING!!! 100% ILLEGAL!!!

1. First of all, create your server (RAT, Keylogger, Stealer and ETC.).
2. Have a CD inserted on your CD ROM.
3. Make an autorun.inf.
4. Burn or write all of the files (server and autorun) into the CD.
5. Make a lot of copies of the CD.
7. Create a title for your CD.

Example:

COD MW2 Game cracked
Porn or whatever you like

8. Get far far away from your house.
9. Find a good place to sell the CDs.
10. Price the CDs for how much you want.
11. If all of your copies are sold. Go back to your house and don't go back to the place where you sold the CDs.
12. Open your computer and see how many did you infected.
13. There ypu go!!!

I know this is freaking fucking weird but I am not taking responsible if you get arrested or killed and I am not forcing you to do this, if you have an evil or criminal mind I know you will do this. This is for educational purpose only. Don't flame me because this is what is running in my mind right now.

I repeat WARNING!!! 100% ILLEGAL!!!

PS: sorry for my bad grammars or sentence

Dr. House - January 23, 2010, 9:56 pm

The bad thing about this is you may be caught by the cops easily. Since you're breaking 2 laws, no license to sell and distributing viruses. But you can spread way quicker on-line :P. But this is a good way too.

Riseing - January 23, 2010, 9:57 pm

This reminds me of the USB drop.

Put a worm on a USB drive and then leave it were some poor fool will find it.

Yeah,I know this is illegal and you could get caught by the cops but this is what you will do if you are really running low on your money.Thanks for replying on my post^^

You can do this also but you will waste money for buying a USB or if you have an old one,you will not earn any money.Thanks for replying in my post^^

TehShrink - January 23, 2010, 10:44 pm

Spreading .iso's over torrent sites is 100% free, and you might get some bank accounts with keyloggers.

lorens13 - January 23, 2010, 11:04 pm

Nice suggestion.Thanks for that and for replying^^

kingfisher - February 6, 2010, 8:35 pm

nice way to spreading virus.. i m scard of cops..?

lorens13 - February 7, 2010, 12:35 am

Thanks,well you have to do this if you really don't have money

RvsK - February 7, 2010, 1:03 am

Or you can bind real working hacks, etc. to your virus and upload to ShareCash make youtube videos etc.

This is too illegal to try for me :P

lorens13 - February 7, 2010, 2:51 am

Yes,you can also do that and yeah,this is too illegal to try unless you really have a criminal mind^^BTW thanks for replying

GameOver* - February 7, 2010, 2:55 am

very nice virus man! thanks for share ?

lorens13 - February 7, 2010, 3:11 am

Thanks very much^^

too short

Relentless™ - February 7, 2010, 10:38 am

This seems like a good method - I could easily infect my friends by giving them movie copies >:D

vip002 - February 7, 2010, 12:24 pm

Yeah, using CDs and risking your life is a bit too much and yields little profit.

WinA - February 8, 2010, 9:39 pm

or u can STEAL Alot of CDs Burn em
and leave them around schools

el pollo grande - February 8, 2010, 10:02 pm

Something similar would be to make mad CD's (wal-mart 100pk. \$6) put "LIL WAYNE 2010 MIXTAPE" shit like that go home 100+ I guarantee

Franken-Stein - February 9, 2010, 8:02 pm

Well if you were scared of this not being legal how come you joined a hacking site ? ;).

bobsagetfullhouse - February 9, 2010, 8:42 pm

If you're actually stupid enough to do this in person then you deserve to go to jail. There are hundreds of ways to do the same thing online.

WinA - February 9, 2010, 8:57 pm

easiest way is to steal the student email list and make them download something!

Hecker21 - February 9, 2010, 9:02 pm

make copies, write on it "XXX HARDCORE PORNO" or what ever, take it to school, leave the disc somewhere a teacher or some other kid will find it, let them put it in there computer, fuck up there computer or spread your rat/keylogger.
lol.

ScHauFFy - February 10, 2010, 11:11 am

This is actually a very effective way of making money and spreading viruses. I put windows 7 setup, along with my rat binded to it, on a disk and sold it to like 10 friends. I made 50\$ and got 7 rats.

SivaKuMar - June 27, 2010, 7:26 am

!!!! - June 28, 2010, 5:36 am

this is funny byt how do u expect someone to buy it coz they wont trust you anyway.

This may work with friends or someone u know only!

avalanch - June 28, 2010, 8:15 am

Another easy way is just hop on a bike & go down a few streets, look for vehicles on the side of the road with the window rolled down just a bit! Slip a cd with the "cracked game" (make sure it's labeled). Drop off all your cd's like this & wait about a week. Drop off some more in another 2-3 weeks time.

noobert227 - June 28, 2010, 8:39 pm

pretty nice tut! keep up the good work![/php]

lorens13 - June 29, 2010, 1:39 am

I picked one up before acctually when i came home and inserted it my antivirus detected it lol nice one!

niian - April 29, 2012, 10:19 pm

Then why not just sell weed instead? Bet there's alot more profit in that... Selling CD's haha

Ultimatum™ - April 30, 2012, 12:27 am

Very informative, but dangerous and is not practical. I wouldn't really recommend it.

There are many ways online where you can get thousands of installs in 1 week then getting like 10 in one day. But good tutorial never the less.

dpavan5 - April 30, 2012, 1:23 am

this is not hacking method it is cheating

hackers would earn more money without cheating

Kampfkrapfen - May 23, 2012, 1:43 pm

thank you for posting this
thanks anyway!

thesaltydalty - May 23, 2012, 4:54 pm

I thought of an idea like this today. Find a website where you can get a bunch of flash drives for cheap, put your crypted server on them, then leave them in places. Drop them in the street, leave them in a starbucks or other places with free wifi. Whoever finds it will either not care and toss it or plug it into their computer to either use it or find out whose it is. You could bind your server to a txt file name "If Found" or something. If anyone knows a website to get around 50 or so flash drives for cheap PM me please.

propsta - May 23, 2012, 4:57 pm

Not a bad TUT.. Thanks for the share..

?Sakura? - May 23, 2012, 5:47 pm

Lol, nice method! but everyone is scared of cops.. :P

FireMoney - May 24, 2012, 8:27 am

Hehe :) Omg man!
This is big joke :)

xx_energizer_xx - May 24, 2012, 8:40 am

Spreading online would definitely get you more victims.

haskabab - June 3, 2012, 7:15 pm

Don't think you will get a lot of buyers either. Unless you sell something everybody wants and that won't go unnoticed i guess. But if you work at a market or something. Or like a flee market, that would be a better cover to sell your virusses.

PrettyFlackito - June 3, 2012, 7:49 pm

ahahah thats funny,so funny idk what im sayingbut its soo funny, lol who is going ti watch the heat game tonight they are winning right now the score is 69 73 boston is winning
