why you need gmail password? i think its account stealer...

(Jan 24, 2010 01:02 PM)mario713 Wrote: [\[CITE\]](#) why you need gmail password? i think its account stealer...

No, keyloggers require a password.

Nybble - January 24, 2010, 12:07 pm

It's not an account stealer rofl. Use a dummy account to test....it needs the password to give you the logs...

mario713 - January 24, 2010, 12:28 pm

oh, okay... i was thinking that keyloggers dont need passwords to send mail because in php i can do that without password but i see i was wrong :P

REPORTED.

Quote:+ REP Is always nice :D

This is called Reputation Abuse,

Please check the [RULES](#)

Nybble - January 24, 2010, 12:44 pm

It's not. I spent hours coding somethign and i barely hint that giving me rep would be nice, gtfo off my thread pl0x.

adn it wasnt asking for, it was an opinion. Giving me rep for this would be nice. That's an opinion.

Hibryd95 - January 24, 2010, 2:27 pm

can i use this keylogger on school coputers to hack facebook profiles???????reply fast

gob2000 - January 24, 2010, 3:08 pm

how to use this with usb drive?

deli_kral - January 24, 2010, 3:24 pm

tested does not work

Loader. - January 24, 2010, 4:10 pm

Vouch for this guy. Great keylogger and great service

gaylechris - January 24, 2010, 6:25 pm

is this working :) ????

Fireren - January 24, 2010, 6:49 pm

Content deleted??? Btw, if you guys don't trust him with your gmail pass there are other keyloggers...

Nybble - January 25, 2010, 5:12 am

wow wtf what did they remove?

Nybble - January 25, 2010, 12:16 pm

was removed because I "asked for rep/Rep abuse"

only thing removed was "rep would be cool"

JUAN9087™ - January 25, 2010, 10:26 pm

nice its still works?

blahblahbas - January 26, 2010, 12:22 am

Whats the stub.exe included in the dl??

How do i acutally use this / put it on peoples computers sorry im new.??

nishurockz - January 26, 2010, 1:36 am

gr8 work man.

thanx for it

@blahblas watever it is

you need not do nething wid that bt dont delete it
ur keylogger wont work.....

Nybble - January 26, 2010, 5:18 pm

The links on there bro. ;p

its right under where I got reported for +REP abuse >.<

No most keylog builders do require gmail user name and password to send the log to your email account. Another way of doing this is with ftp but email clients are easier to use and more noob friendly. If you need anymore help or info just pm me or send me a email :

moot9 - January 27, 2010, 8:12 am

the is a way to scan a key logger with bintext, and some times you can see the gmail and password (I think its called whaling),
is this one vulnerable to that?

rurouni83 - January 27, 2010, 8:50 am

is there a way to send this one through email? if so how?

it's not. it doesnt save the password to any form or any line of code.

tony979 - January 27, 2010, 8:28 pm

can i ask why i had it open on a friend's PC for almost 30 minutes and i got sent no logs?

nice work :D!!! Repping :D

shame_u_fail - January 29, 2010, 2:25 am

Sorry bout double post but how long in between ea logs sent i've been waiting lol

-mothered- - January 29, 2010, 3:19 am

Been looking for something like this, with a Gmail keylogging option, rather than an FTP.
Many thanks for the share :)

Nybble - January 29, 2010, 4:35 pm

I examined Server.exe with bintext and my gmail and pass are right there

any help?

I'm not sure why it is doing this, try binding it to something? if you use a junk email it wont matter. besides even advanced users wouldn't feel the need to examine this with bintext. ;) I'll look over the code for you, though.

EDIT: I'm going to run this through an obsuficator to block the viewing of password through bin.text

Nybble - January 29, 2010, 6:53 pm

Yeah, np. Ty for pointing out this vulnerability.

Nybble - January 30, 2010, 5:15 pm

Can I hear a bump??!?

BUMP!

ikuikuikuiku - January 30, 2010, 10:58 pm

why is the keylogger doesnt send me back any logs?? I think I have already put correct gmail account

LILW3D0 - January 30, 2010, 11:49 pm

didnt work for me....but hope you improve it good luck

Is their a way to test this bad boy out on myself before its showtime?

I would just like to see how the logs are sent, say if the person enters passwords in for different things, does the log file show all the info of the window and everything, the web adress if they are checking email or whatever else?

Also how often does it send log files?

I would just like to see for myself, if i run the server where is it saved and is it as simple as just deleteing the file after its ran on my computer?

a.a. - January 31, 2010, 1:44 pm

avira founds it

thank you for sharing

Nybble - January 31, 2010, 1:50 pm

yeah thats why it's "UD" :D

and np bro.

WarLOck - February 1, 2010, 9:54 am

very good !

my first keylogger btw ;P

WarLOck - February 1, 2010, 10:55 am

im confused lil bit .

can i try it on myself to be sure its working?

i need fast answer!

thanks :)

Always try stuff on yourself first. Just make sure you know how to delete the logger.

Oh, I wouldn't use my primary computer to test if I was you. :)

Are you serious? You can't be....just make a new Gmail account and use that, and so what if your pass and gmail is there, no ones gonna scam it unless they know it is their, and unless they now your gmail and pass are there...

xfox17 - May 11, 2010, 8:43 am

i dont know how ppl say " ow nice " and all what i find is fake logger , i got bored from these ppl :'(

lukedog5990 - May 12, 2010, 3:41 am

whats going on with this logger huh?

MrSlickBack - May 12, 2010, 10:02 am

what exactly does the anti sandbox and virtualbox do?

Does the anti bypass it in some way and run it on the pc anyway? or what is the function? I've always been wondering.

Looks good thanks for the free keylogger by the way!

VCC*online - May 12, 2010, 10:26 am

what is the password to get the logs?
