Get cryptex. As for a RAT get Darkcomet its good enough for a beginner like you.

I would not buy BlackShades, downtime 7/10

TBH Crypter you should get No\$ It's amazing and FUD uptime is amazing, Im not hating on Blackshades but they are down a lot due to DDOS or something.

No you can't but you can't do that for any of the paid rats, The downtime is just this week.
